The Meter Provisioning charges will be calculated by applying a daily rate to the time period covered in the related NUoS bill.

These charges will be visible in the detailed Billing file, provided on a monthly basis. The charges will be presented in the "600" line structure.

- The "Quantity" field in this structure will reflect the number of days being charged for. In a situation where there are multiple Multi-Phase meters being charged under the same tariff, the "quantity" will be the number of days multiplied by the number of meters.
- The "EventDate" field will reflect the "EndDate" presented in the NUoS record.

These charges are applicable from 1-Jan-2006, and bills for periods that commence before this date will be pro-rated to ensure the charges are only for this period forward.
