

SPJ4004 Schedule of fees - effective 1st July 2009

The revised schedule of fees is to incorporate the fees changes detailed in the AER Final Decision 2009-10/2013-14. The changes are highlighted in the schedule.

To ensure smooth transition to the new fees schedule, all fees issued on and after 1st July 2009 will be in accordance with this revised fees schedule.

The following notes provide additional information relating to the schedule of fees tables below.

- All fees are inclusive of GST.
- Cheques must be made payable to Integral Energy Australia.
- The administration and design related fees are to be paid prior to the design certification.
- The inspection and construction related fees are to be paid before the project commencement.
- Where the works are charged by the hour, the time will be estimated and based on the complexity of the work undertaken.
- Where two separate hourly rates shown against a fee schedule, Integral Energy reserves the right to utilise the appropriate technical resource to process the task in the most efficient manner.
- All hourly rates shown are for normal working hours 7:30am to 4:00pm Monday to Friday. If the works required outside normal hour due to request by the customer or to overcome network access constraints, an additional 75% of fees will be charged.
