

Price schedule for metering services – 1 July 2018

1. Price schedule for metering services – effective 1 July 2018

Under Power of Choice any new meters will be installed by the Retailers and their meter providers. Metering services will be charged for at the AER determined rates as provided in the tables below.

Meter Service Charges

Essential Energy will charge a metering service charge for all NMI's where Essential Energy provides type 5 & 6 metering services. Charges will be charged on a 'per service' basis as a daily fixed charge. This means each unique data stream will attract a charge, for example a site with a residential anytime tariff and a controlled load tariff will receive the applicable annual metering charge for both tariffs.

Table 1: Metering Service Daily Charges, excluding GST

Tariff Class	Pre-30 June Connections - Maintenance			Pre-30 June Connections - Capital			Post-1 July Connections - New Meters - Maintenance		
	MSC Tariff	Bill Print Description	Daily Charge \$/Day	MSC Tariff	Bill Print Description	Daily Charge \$/Day	MSC Tariff	Bill Print Description	Daily Charge \$/Day
Residential Anytime	BLNM1NC	MSC MAINT - RES ANYTIME	\$0.06689	BLNM1CA	MSC CAPITAL - RES ANYTIME	\$0.02774	BLNM1NM	MSC NM MAINT - RES ANYTIME	\$0.04442

2. Explanations and Definitions

Metering services

Metering services related to the provision, operation and maintenance of type 5 and 6 metering equipment, including:

- > Meter provision – the capital costs of purchase of metering equipment;
- > Meter maintenance – activities to inspect, test, maintain, repair and replace meters;
- > Meter reading – the quarterly or other regular reading of type 5 & 6 meters; and
- > Meter data services – services for the collection, processing, storage and delivery of metering data and the management of National Metering Identifier (NMI) standing data in accordance with the rules.

Metering service charges

The AER's Distribution Determination approves two types of metering service charges:

- > Upfront capital charge (for all new and upgraded meters installed from 1 July 2015)
- > Annual charge comprising of two components:
 - o Capital: metering asset base (MAB) recovery
 - o Non-capital: maintenance charge including operating expenditure and tax.

The adjacent figure depicts how the three regulated annual charge components relate to different metering customers.

Pre 30 June 2015 connections – capital charge (MSC CAPITAL)

Essential energy will charge will be applied to all existing sites where Essential Energy funded metering equipment to recover the costs of the regulated Metering Asset Base (MAB), being the capital costs of the meter/s installed at the connection point.

The capital charge is applied based on the tariff applicable as at 30 June 2015, the capital charge will remain fixed and will not change when future tariff changes are applied. Where a customer funds a regulated metering upgrade or switches to a competitive metering arrangement post 1 July 2015, the capital charge will continue to apply to recover the cost of previously installed regulated metering equipment funded by Essential Energy.

Pre 30 June 2015 connections – maintenance charge (MSC MAINT)

Essential Energy will charge a maintenance metering service charge for all NMI's where Essential Energy provides type 5 & 6 metering services. Essential Energy will be nominated as Responsible Person, Meter Provider and Meter Data Provider for the NMI in the National Electricity Market¹.

The maintenance metering service charge covers the ongoing operating expenditure for providing type 5 & 6 metering services.

Post 1 July 2015 connections – new meters – maintenance charge (MSC NM MAINT)

Essential Energy will charge an annual metering fee for all NMI's where Essential Energy provides type 5 & 6 metering services. Essential Energy will be nominated as Responsible Person, Meter Provider and Meter Data Provider for the NMI in the National Electricity Market.

Essential Energy will charge a reduced metering service charge for new NMI's connected from 1 July 2015 where the metering equipment has been subject to an upfront meter charge. This maintenance metering service charge covers the ongoing operating expenditure for providing type 5 & 6 metering services to new installations.
