

Adjustment of 2000/01 Distribution Tariffs for TUoS Rebate - Effective 1 July 2000

In accordance with the South Australian Electricity Pricing Order (EPO), ETSA Utilities has determined its network charges for 2000/01. ElectraNet SA has also advised ETSA Utilities of estimated rebates to its transmission network charges, effective from 1 July 2000. Prices have varied from those applying in June 2000, in accordance with the EPO, for several reasons including:

- Real price reductions;
- The introduction of a new tax system excluding GST (eg removal of wholesale sales tax);
- CPI movement; and
- Introduction of GST.

ETSA Utilities will pass on the transmission rebates by way of a 32% reduction in the transmission component of its network charges. The South Australian Independent Industry Regulator (SAIIR) has given interim approval of this pass-through, subject to the Australian Tax Office making a ruling on the impact of GST on the settlement residue auction proceeds. If, following this ruling, the SAIIR requires a different amount to be passed through, we will advise Retailers accordingly.

For customers on franchise tariff arrangements, these charges are paid by the franchise retailer, AGL. For customers who have entered into contestable sale agreements with retailers, the network charge is likely to be paid by the retailer. However, depending upon the contractual arrangements between customer and retailer, there may be a pass-through of the network charge and the rebate to the customer.

The invoice that ETSA Utilities forwards to its customers (retailers) for network usage will continue to be based upon the total network charge payable. It will be determined by the use of a network price that is derived from the transmission and distribution charges published in the Electricity Pricing Order less transmission rebate, as set out in the attached set of prices. The rebate will not be shown individually on each invoice. GST has been added as a separate price component in the price list. Our invoices will be GST-inclusive invoices.

The rebate can be calculated by using the billing quantities specified on the invoice and the transmission rebate price component as set out in the attached set of prices.

When the transmission rebate is amended in the future, an amended price list will be forwarded to licensed retailers by ETSA Utilities. We expect a change in the rebate rate from 1 January 2001, subject to advice from ElectraNet SA.

If retailers require clarification on these invoicing matters, please contact the Manager Customer Service, Graeme Baker on (08) 8404 5163.

ETSA UTILITIES DISTRIBUTION TARIFFS

APPLIES TO USAGE FROM 1 JULY 2000. PRICE COMPONENTS ARE GST EXCLUSIVE WITH TOTAL GST INCLUSIVE PRICE
