Network Tariff Components:

- **Standing Charge:**
The standing charge is a fixed annual charge.
- **Summer Demand Incentive Charge:**
The demand measures the power (kW or kVA at maximum kW) per ½ hour period. The Summer Demand Incentive Charge (SDIC) is based on the highest power delivered between 3pm and 6pm DST Weekdays excluding public holidays in Summer. Summer is defined as 1 November to 31 March. The SDIC is calculated and charged monthly and is in addition to the Rolling Peak Demand Charge.
- **“HOT” Summer Demand Incentive Charge:**
The demand measures the power (maximum kW or kVA at maximum kW) per ½ hour period. The “HOT” Summer Demand Incentive Charge (SDIC) is based on the highest power delivered between 3pm and 6pm DST Summer Workdays forecast to be **equal to or above 30°C**. Summer is defined as 1 November to 31 March. The “HOT” SDIC is calculated and charged monthly and is in addition to the Rolling Peak Demand.
- **Rolling Peak Demand Charge:**
The demand measures the power (kVA at maximum kW) per ½ hour period. The Rolling Peak Demand Charge is based on the highest power delivered during Peak periods (defined as 7am to 7pm DST weekdays excluding public holidays) over 12 months to the end of the billing period. Where an existing Supply Contract exists, the minimum rolling peak demand charge is that set within the Supply Contract.
- **Summer Peak Energy Charge:**
Cost of electricity (consumption measured in kWh) transport during peak time periods in Summer (1 November to 31 March).
 - For TOU tariffs Peak is defined as 7am to 7pm DST weekdays excluding public holidays in Summer.
 - For other tariffs the peak period during Summer is anytime for all single rate tariffs and as applicable for multi-rate tariffs (eg: 7am to 11pm EST for 7 day tariffs and 7am to 11pm EST weekdays for 5 day tariffs).
- **Non-Summer Peak Energy Charge:**
The cost of electricity transport (consumption measured in kWh) during peak time periods in non-Summer (1 April to 31 October).
 - For TOU tariffs Peak is defined as 7am to 7pm DST weekdays excluding public holidays in non-Summer.
 - For other tariffs the peak period during non-Summer is anytime for all single rate tariffs and as applicable for multi-rate tariffs (eg: 7am to 11pm EST for 7 day tariffs and 7am to 11pm EST weekdays for 5 day tariffs).
- **Off-Peak Energy:**
Cost of electricity transport (kWh) during off-peak time periods.
 - For TOU tariffs the Off-Peak period is 7pm to 7am DST weekdays and all day weekends and Public Holidays.
 - For other tariffs the Off Peak period is as applicable for multi-rate tariffs. (eg: 11pm to 7am EST for 7 day and dedicated tariffs and 11pm to 7am EST weekdays and all day weekends for 5 day tariffs)
