1 Current tariffs

Electricity distribution

SPI Electricity Pty Ltd holds a licence to distribute electricity in eastern Victoria; the supply area extends from the outer eastern suburbs of Melbourne to the New South Wales border in the north east of the state. A map of the area is provided in Attachment 1. SPI Electricity Pty Ltd now trades under the name SP AusNet.

SP AusNet manages and maintains the electricity network aiming to deliver electricity to customers within the area in line with industry best practice. The primary source of funding for a range of prescribed services that SP AusNet undertakes is the revenue obtained from Network Tariffs.

Victorian electricity industry regulatory arrangements

Generation and electricity retailing are both competitive markets in Victoria. The efficient regulation and transparent pricing of monopoly transmission and distribution network services support and facilitate these competitive market sectors.

The move to create a competitive electricity market began with the 1991 Industry Commission Report on the Electricity Industry. In the intervening period, Federal and State Governments have worked to restructure the electricity industry and establish effective competition in electricity markets.

The National Electricity Market commenced in December 1998 and included the eastern mainland states of Victoria, New South Wales, Queensland, the Australian Capital Territory ('ACT') and South Australia. The National Electricity Market is governed by a set of market rules contained in the National Electricity Rules ('the Rules').

The Victorian Government has introduced competition in the state electricity retail market. Full retail competition was extended to all customers on 1 January 2002, allowing customers to choose their energy retail suppliers and has led to the deregulation of the retail electricity price. The Victorian government has determined regulated default retail prices that act as a 'safety net' for customers who elect not to participate in the competitive market and remain with their host retail supplier.

The Victorian electricity industry has undergone major structural change with the introduction of generation and retail sales competition. This has involved:

- The establishment and privatisation of SP AusNet and four other electricity distributors;
- The restructuring of each utility into separate retail and network service activities;
- The establishment of a privatised transmission owner;
- The establishment of a government owned transmission operator;
- The creation of privatised generation companies; and
- The introduction of the National Electricity Market and full retail competition.

These structural changes are a key component of competition reforms designed to offer customers substantial efficiency improvements, a choice of retail suppliers of energy, better customer service and a wider variety of innovative energy services.

As a holder of a Victorian Distribution Licence, SP AusNet's prices and the terms and conditions under which electricity is distributed, are regulated by the Essential Services Commission ('the Commission').

The Commission administers various regulatory instruments that establish the responsibilities of the Victorian distributors. These instruments consist of Acts of the Victorian Parliament; Orders made by the Governor in Council; Determinations made by the Commission; Guidelines published by the Commission; the National Electricity Rules; the System Code; the Electricity Distribution Code; the Energy Retail Code; the Electricity Customer Metering Code; the Public Lighting Code; and the Electricity Customer Transfer Code.

SP AusNet has produced this Network Tariff Report in response to the Commission's Final Decision under Volume 1, Section 12.1.2 of the 2006 – 2010 Electricity Distribution Price Review.

The purpose of this report is to enable distribution customers to understand the basis for the tariff policies adopted by SP AusNet and to communicate changes in tariffs.

Customers receive an electricity bill that contains the following elements:

- Distribution and transmission charges,
- Energy charges
- Retail charges

This report addresses only the distribution and transmission components of a customers' electricity bill and includes the following:

- a) The distribution and transmission tariffs charged by the distributor;
- b) A discussion of the policy framework and tariff principles adopted by the distributor in framing the structures and level of its tariffs;
- c) An explanation of the basis on which the distributor has determined the appropriate breakdown between fixed and variable charges;
- d) The rationale for the introduction of any new tariffs, or the withdrawal of tariffs;
- e) An explanation of how the distributor has had regard to the consideration of upper and lower bounds in determining its distribution tariffs;
- f) The extent to which the tariff structures adopted provide efficient consumption signals to distribution customers;
- g) The methodology adopted for allocating transmission-related costs to distribution customers through its transmission tariffs; and
- h) An estimate of the average annual distribution and transmission charge (in \$) for each combination of distribution and transmission tariff

Tariffs: DUoS, TUoS, NUoS, Excluded Services and Prescribed Metering charges

SP AusNet levies Network Tariffs on customers supplied with electricity within its Distribution Area outlined in Schedule 2 of its Distribution Licence as varied on 14th January 2005.

This report applies from 1 January 2006 to 31 December 2006 and is applicable to all customers in SP AusNet distribution area

The approved tariffs for 2006 are presented as follows:

- | | |
|---|--------------|
| • Distribution Tariffs (DUoS) | Attachment 2 |
| • Transmission Tariffs (TUoS) | Attachment 3 |
| • Network Tariffs (NUoS) | Attachment 4 |
| • Tariff Assignment & Contract Demand Rules | Attachment 5 |
| • Standard Services (Excluded Services) | Attachment 6 |
| • Prescribed Metering Charges | Attachment 7 |

Tariffs

1.1.1 Tariff categories

SP AusNet has the following Tariff Categories for network tariffs:

Low Voltage	Customers taking supply at less than 1000 Volts
Small	Customers using up to 160MWh a year
Medium	Customers using over 160MWh a year and up to 400MWh a year
Large	Customers using over 400MWh a year
High Voltage	Customers taking supply at greater than 1,000 Volts and up to 22,000 Volts
Sub Transmission	Customers taking supply at greater than 22,000 Volts

1.1.2 SP AusNet Tariffs

SP AusNet currently has the following approved Tariffs. Schedules setting out the current rates for each of these tariffs are attached to this document.

Low Voltage Small Customer Tariffs < 160 MWh usage per year

Tariff Code	Tariff Type
NEE11	Residential Single rate
NEE12	Business Single rate
NEE13	Residential Single rate & Dedicated Circuit
NEE14	Residential Single rate & Dedicated Circuit with afternoon boost
NEE15	Residential Single rate & Dedicated Circuit 8pm to 8am
NEE16	Business Single rate & Dedicated Circuit
NEE17	Business Single rate & Dedicated Circuit with afternoon boost
NEE18	Business Single rate & Dedicated Circuit 8pm to 8am
NEE20	Residential two rate five day
NEE21	Small Business two rate five day
Tariff Code	Tariff Type
NEE23	Photovoltaic two rate 5 day
NEE30	Dedicated Circuit
NEE31	Dedicated Circuit with afternoon boost

NEE32	Dedicated Circuit 8pm to 8am
-------	------------------------------

Low Voltage Medium Customer Tariffs > 160 MWh and < 400 MWh usage per year

Tariff Code	Tariff Type
NEE40	Single Rate
NEE41	Single Rate and Dedicated Circuit
NEE42	Single Rate and Dedicated Circuit with afternoon boost
NEE43	Single Rate and Dedicated Circuit 8pm to 8am
NEE51	Two rate 5 day
NEE52	Unmetered supplies
NEE54	Two rate 5 day interruptible
NEE55	Seasonal single rate
NEE56	Demand multirate
NEE60	Two rate 7 day

Low Voltage Large Customer Tariffs > 400 MWh

Tariff Code	Tariff Type
NEE71	Two rate 5 Day demand > 150kVA & < 750 MWh
NEE72	Two rate 5 Day demand > 280kVA & > 750 MWh
NEE74	Two rate 5 Day
NEE75	Multi rate 5 Day demand > 150kVA & < 750 MWh
NEE76	Multi rate 5 Day demand > 280kVA & > 750 MWh

High Voltage Customer Tariffs (6.6kV, 11kV & 22kV)

Tariff Code	Tariff Type
NEE81	Two rate 5 Day demand supplied at > 1kV
NEE82	Traction Two rate 5 Day demand supplied at > 1kV
NEE83	Multi rate 5 Day demand supplied at > 1kV

Sub Transmission Customer Tariffs (66kV)

Tariff Code	Tariff Type
NEE91	Two rate 5 Day demand supplied at 66kV
NEE93	Two rate 5 day tariff supply to Latrobe Valley mines.
NEE94	Two rate 5 Day demand supplied at 66kV
NEE95	Two rate 5 Day demand supplied at 66kV

2005 Network Tariff Description

1.1.3 Small Low Voltage Tariffs (Nominal Voltage < 1000 Volts), < 50 kVA and < 160MWh

1.1.3.1 Residential Tariffs

1.1.3.1.1 NEE11 – Small Residential Block Tariff

This Network Tariff applies only to residential customers who consume less than 160 MWh per annum. The minimum meter requirement for a customer on this tariff is a basic type 6 single register meter.

The Small Residential Block tariff consists of a standing charge and a block usage rate. The first block applies to all usage less than 1,020 kWh per quarter. The second block rate is higher than the first block rate and applies to all usage greater than 1,020 kWh per quarter. The consumption level of 1,020 kWh for the first block was based on the original retail Maximum Uniform Tariff GD/GR.

The two-part block tariff is targeted to allocating more of the demand-related costs to customers with larger annual energy consumption. The higher usage rate for the second block provides a pricing signal to these higher usage customers that relates to the increased demand these customers place on the network at peak times.

NEE11 - Small single rate

	Very Low 1.40 MWh	Low 3.28 MWh	Average 4.68 MWh	High 6.09 MWh	Very High 7.96 MWh
Energy					
Existing	\$ 118.78	\$ 217.14	\$ 290.92	\$ 364.69	\$ 463.06
Proposed	\$ 94.78	\$ 189.15	\$ 259.93	\$ 330.71	\$ 425.08
Change	-20.20%	-12.89%	-10.65%	-9.32%	-8.20%

The chart below shows 2006 DUoS and TUoS charges as a proportion of the network charge for an average user.

1.1.3.1.2 NEE20 – Small Residential Two Rate

The Small Residential two-rate tariff was originally based on the retail Maximum Uniform Tariff GH/GL for residential customers. These customers require, as a minimum, a basic type 6 dual register with an electronic timeswitch, capable of switching all load to off-peak overnight and at weekends.

The two-rate tariff provides customers with incentives to manage load, and is the optimum tariff for small residential customers who are able to move a high proportion of energy consumption to off-peak times over night and on weekends.

NEE20 - Small two rate

	Very Low	Low	Average	High	Very High
Energy	2.52 MWh	5.88 MWh	8.39 MWh	10.91 MWh	14.27 MWh
Existing	\$ 166.49	\$ 278.87	\$ 363.16	\$ 447.45	\$ 559.83
Proposed	\$ 144.45	\$ 263.45	\$ 352.70	\$ 441.95	\$ 560.94
Change	-13.24%	-5.53%	-2.88%	-1.23%	0.20%

The chart below shows 2006 DUoS and TUoS charges as a proportion of the network charge for an average user.

1.1.3.1.3 NEE23 – Photovoltaic Tariff

This tariff applies to small customers with grid-connected photovoltaic cells less than or equal to 2kW. Prior to 2003, these customers were placed on a standard network tariff and received payment for the electricity they generated equal to the price that was paid for electricity consumed, that is, export energy equally offset the energy consumed. The diversity of tariffs applied to these customers and offset arrangements created billing and administrative difficulties. NEE23 was been introduced to formalise photovoltaic cell billing arrangements and reduce administrative complexity.

Photovoltaic cells customers continue to receive an equal offset for electricity generation, as well as an additional payment for excess generation during summer peak periods (1 November – 30 March).

NEE23 - Photovoltaic

	Very Low	Low	Average	High	Very High
Energy	2.95 MWh	6.88 MWh	9.83 MWh	12.79 MWh	16.72 MWh
Existing	\$ 211.70	\$ 329.16	\$ 417.26	\$ 505.35	\$ 622.82
Proposed	\$ 178.32	\$ 289.67	\$ 373.19	\$ 456.71	\$ 568.06
Change	-15.77%	-12.00%	-10.56%	-9.63%	-8.79%

The chart below shows 2006 DUoS and TUoS charges as a proportion of the network charge for an average user.

1.1.3.2 Dedicated Supplies (Storage Water and Space Heating)

SP AusNet has three network tariffs for dedicated supplies. These tariffs are available for controlled loads such as storage water heating and space heating for residential and small business purposes only.

1.1.3.2.1 **NEE30 – Small Dedicated Circuit (closed to new entrants)**

This small dedicated circuit tariff applies to customers with off-peak hot water heating between 11pm and 7am each day. The minimum meter requirements are a basic type 6 single register meter switched by timing device, or a basic type 6 dual register meter with second register switched by timing device.

NEE30 - Small dedicated circuit

	Very Low	Low	Average	High	Very High
Energy	0.84 MWh	1.96 MWh	2.79 MWh	3.63 MWh	4.75 MWh
Existing	\$ 35.79	\$ 55.51	\$ 70.30	\$ 85.09	\$ 104.81
Proposed	\$ 26.64	\$ 49.37	\$ 66.41	\$ 83.46	\$ 106.18
Change	-25.55%	-11.06%	-5.53%	-1.92%	1.31%

The chart below shows 2006 DUoS and TUoS charges as a proportion of the network charge for an average user.

1.1.3.2.2 **NEE31 – Small Dedicated Circuit Afternoon Boost (closed to new entrants)**

The Small Dedicated Circuit Afternoon Boost tariff applies to customers with off-peak space heating, with or without off peak hot water. This tariff has an afternoon heating boost for three hours in addition to heating between 11pm and 7am each day.

The minimum meter requirements are a basic type 6 single register meter switched by timing device, or a basic type 6 dual register meter with second register switched by timing device.

NEE31 - Small dedicated circuit - afternoon boost

	Very Low	Low	Average	High	Very High
Energy	2.22 MWh	5.17 MWh	7.39 MWh	9.60 MWh	12.56 MWh
Existing	\$ 55.33	\$ 107.50	\$ 146.63	\$ 185.76	\$ 237.94
Proposed	\$ 44.26	\$ 96.88	\$ 136.34	\$ 175.80	\$ 228.42
Change	-20.00%	-9.88%	-7.02%	-5.36%	-4.00%

The chart below shows 2006 DUoS and TUoS charges as a proportion of the network charge for an average user.

1.1.3.2.3 NEE32 - Dedicated Circuit 8pm to 8am (closed to new entrants)

The Small Dedicated Circuit 8pm to 8am tariff was introduced in 2001 and allows SP AusNet to heat hot water for six to eight hours at any time between 8pm and 8am. This may be in two heating blocks of three to four hours. This arrangement allows SP AusNet to manage peak loads better, and is helpful in reducing peak constraint in rural areas. The minimum meter requirements are a basic type 6 single register meter switched by timing device, or a basic type 6 dual register meter with second register switched by timing device.

SP AusNet has over 160,000 customers with dedicated circuits for off peak water heating and space heating requirements. Many of these customers are in rural areas where there are limited alternative energy supplies. As a result the SP AusNet' local network experiences high levels of demand when these appliances switch on for their overnight heating. By introducing the Dedicated Circuit 8pm to 8am tariff which has a twelve hour period available for heating SP AusNet will have the flexibility to vary these switching times without impacting on the customers heating needs. In return for allowing SP AusNet this flexibility customers will in turn receive the benefit of lower charges that are the result of being able to defer some capital investment.

NEE32 - Dedicated circuit 8 to 8

	Very Low	Low	Average	High	Very High
Energy	0.87 MWh	2.02 MWh	2.89 MWh	3.75 MWh	4.91 MWh
Existing	\$ 34.70	\$ 52.97	\$ 66.68	\$ 80.38	\$ 98.65
Proposed	\$ 25.49	\$ 46.68	\$ 62.58	\$ 78.47	\$ 99.66
Change	-26.54%	-11.87%	-6.15%	-2.38%	1.02%

The chart below shows 2006 DUoS and TUoS charges as a proportion of the network charge for an average user.

1.1.3.2.4 NEE13 – Small Residential Block Tariff & Dedicated Circuit (closed to new entrants)

This tariff was introduced in 2002. It is a combination of the Small Residential Block tariff and Dedicated Circuit tariffs. The rates and metering requirements are the same as the individual tariffs. It was introduced to assist in the contestable market.

The impact of this network tariff on customers is equivalent to the impact of Network Tariffs NEE11 and NEE30

1.1.3.2.5 NEE14 – Small Residential Block Tariff & Dedicated Circuit Afternoon Boost (closed to new entrants)

This tariff was introduced in 2002. It is a combination of the Small Residential Block tariff and Dedicated Circuit Afternoon Boost tariffs. The rates and metering requirements are the same as the individual tariffs. This tariff was introduced to assist in the contestable market.

The impact of this network tariff on customers is equivalent to the impact of Network Tariffs NEE11 and NEE31.

1.1.3.2.6 NEE15 – Small Residential Block Tariff & Dedicated Circuit 8am to 8pm (closed to new entrants)

This tariff was introduced in 2002. It is a combination of the Small Residential Block tariff and Dedicated Circuit 8pm to 8am tariffs. The rates and metering requirements are the same as the individual tariffs. It was introduced to assist in the contestable market.

The impact of this network tariff on customers is equivalent to the impact of Network Tariffs NEE11 and NEE32.

1.1.3.3 Small Business Tariffs

1.1.3.3.1 NEE12 - Small Business Block Tariff

The Small Business block Tariff has been designed for SP AusNet small business customers with annual usage of less than 160MWh, and who have, as a minimum, a basic type 6 single register meter.

The Small Business Block tariff has lower energy charges for the first block, which applies to the first 1,020 kWh per quarter, to reflect the lower contribution these small business customers make to peak demand. As consumption increases the contribution to peak demand also increases. By having a higher rate for the second block (all consumption greater than 1,020 kWh) SP AusNet is able to recover the higher costs associated with greater peak demand on the system, and provide appropriate pricing signals to customers.

NEE12 - Small business single rate

	Very Low	Low	Average	High	Very High
Energy	1.71 MWh	4.00 MWh	5.71 MWh	7.42 MWh	9.71 MWh
Existing	\$ 163.07	\$ 304.49	\$ 410.56	\$ 516.63	\$ 658.05
Proposed	\$ 146.21	\$ 293.15	\$ 403.36	\$ 513.57	\$ 660.51
Change	-10.34%	-3.72%	-1.75%	-0.59%	0.37%

The chart below shows 2006 DUoS and TUoS charges as a proportion of the network charge for an average user.

1.1.3.3.2 NEE21 - Small Business two rate

SP AusNet has over 26,000 small business customers who are on the Small Business two-rate tariff. Customers on this tariff require, as a minimum, a basic type 6 dual register meter with an electronic timeswitch, capable of switching all load to off-peak overnight and at weekends.

The Small Business Tariff was opened in 2001 and is intended for businesses that use less than 160MWh per annum. These businesses tend to operate seven days a week and have a high proportion of overnight and weekend consumption. The Small Business tariff was opened to facilitate appropriate pricing to reflect the demand characteristics of these customers.

NEE21 - Small business two rate

	Very Low	Low	Average	High	Very High
Energy	7.20 MWh	16.81 MWh	24.01 MWh	31.21 MWh	40.82 MWh
Existing	\$ 643.47	\$ 1,249.43	\$ 1,703.90	\$ 2,158.37	\$ 2,764.33
Proposed	\$ 583.93	\$ 1,154.51	\$ 1,582.44	\$ 2,010.37	\$ 2,580.94
Change	-9.25%	-7.60%	-7.13%	-6.86%	-6.63%

The chart below shows 2006 DUoS and TUoS charges as a proportion of the network charge for an average user.

1.1.3.3.3 NEE16 – Small Business Block Tariff & Dedicated Circuit (closed to new entrants)

This tariff was introduced in 2002. It is a combination of the Small Business Block tariff and Dedicated Circuit tariffs. The rates and metering requirements are the same as the individual tariffs. This tariff was introduced to assist in the contestable market.

The impact of this network tariff on customers is equivalent to the impact of Network Tariffs NEE12 and NEE30.

1.1.3.3.4 NEE17 – Small Business Block Tariff & Dedicated Circuit Afternoon Boost (closed to new entrants)

This tariff was introduced in 2002. It is a combination of the Small Business Block tariff and Dedicated Circuit Afternoon Boost tariffs. The rates and metering requirements are the same as the individual tariffs. This tariff was introduced to assist in the contestable market.

The impact of this network tariff on customers is equivalent to the impact of Network Tariffs NEE12 and NEE31.

1.1.3.3.5 NEE18 – Small Business Single Rate & Dedicated Circuit 8am to 8pm (closed to new entrants)

This tariff was introduced in 2002. It is a combination of the Small Business Block tariff and Dedicated Circuit 8am to 8pm tariffs. The rates and metering requirements are the same as the individual tariffs. This tariff was introduced to assist in the contestable market.

The impact of this network tariff on customers is equivalent to the impact of Network Tariffs NEE12 and NEE32.

1.1.4 Medium Customer Tariffs > 50 kVA & < 150 kVA and > 160MWh & < 400MWh

Medium customers are customers that consume between 160MWh and 400MWh per annum, with a maximum demand less than 150 kVA. Examples of this customer class are medium sized commercial and light industrial businesses.

1.1.4.1.1 NEE40 – Medium Single Rate Tariff (closed to new entrants)

The Medium Single Rate tariff is applicable to business and industrial customers that consume between 160MWh and 400MWh per annum. The minimum meter requirements are a basic type 6 single register meter. This network tariff is most suitable for business customers with little overnight or weekend usage.

NEE40 - Medium single rate

	Very Low	Low	Average	High	Very High
Energy	3.71 MWh	8.66 MWh	12.38 MWh	16.09 MWh	21.04 MWh
Existing	\$ 312.94	\$ 653.40	\$ 908.75	\$ 1,164.09	\$ 1,504.55
Proposed	\$ 289.65	\$ 631.05	\$ 887.10	\$ 1,143.15	\$ 1,484.55
Change	-7.44%	-3.42%	-2.38%	-1.80%	-1.33%

The chart below shows 2006 DUoS and TUoS charges as a proportion of the network charge for an average user.

1.1.4.1.2 NEE41 – Medium Business Single Rate & Dedicated Circuit (closed to new entrants)

This tariff was introduced in 2002. It is a combination of the Medium Business Single Rate tariff and Dedicated Circuit tariffs. The rates and metering requirements are the same as the individual tariffs. This tariff was introduced to assist in the contestable market.

This network tariff is most suitable for business customers with little overnight or weekend usage, and customers with off-peak hot water services between 11pm and 7am each day.

The metering requirements are basic type 6 dual register meter, with one register capable of being switched for the dedicated circuit.

The impact of this network tariff on customers is equivalent to the impact of Network Tariffs NEE40 and NEE30.

1.1.4.1.3 NEE42 – Medium Business Single Rate & Dedicated Circuit Afternoon Boost (closed to new entrants)

This tariff was introduced in 2002. It is a combination of the Medium Business Single Rate tariff and Dedicated Circuit Afternoon Boost tariffs. The rates and metering requirements are the same as the individual tariffs. This tariff was introduced to assist in the contestable market.

This network tariff is most suitable for business customers with little overnight or weekend usage, and customers with off-peak load and off-peak space heating services between 11pm and 7am each day.

The metering requirements are basic type 6 dual register meter, with one register capable of being switched for the dedicated circuit.

The impact of this network tariff on customers is equivalent to the impact of Network Tariffs NEE40 and NEE31.

1.1.4.1.4 NEE43 – Medium Business Single Rate & Dedicated Circuit 8am to 8pm (closed to new entrants)

This tariff was introduced in 2002. It is a combination of the Medium Business Single Rate tariff and Dedicated Circuit 8am to 8pm tariffs. The rates and metering requirements are the same as the individual tariffs. This tariff was introduced to assist in the contestable market.

This network tariff is most suitable for business customers with little overnight or weekend usage, and customers with off-peak load and off-peak hot water heating services between 8pm and 8am each day.

The metering requirements are basic type 6 dual register meter, with one register capable of being switched for the dedicated circuit.

The impact of this network tariff on customers is equivalent to the impact of Network Tariffs NEE40 and NEE32.

1.1.4.1.5 NEE51 – Medium Two Rate 5-day (closed to new entrants)

The Medium Two Rate 5-day tariff is suitable for businesses with some overnight or weekend usage. Customers benefit from off-peak evening prices and weekend prices.

Customers on this tariff require, as a minimum, a basic type 6 dual register meter with an electronic timeswitch, capable of switching all load to off-peak overnight and at weekends.

NEE51 - Medium two rate 5 day

	Very Low	Low	Average	High	Very High
Energy	34.29 MWh	80.00 MWh	114.28 MWh	148.57 MWh	194.28 MWh
Existing	\$ 2,340.39	\$ 5,232.11	\$ 7,400.90	\$ 9,569.68	\$ 12,461.40
Proposed	\$ 2,225.96	\$ 5,089.90	\$ 7,237.86	\$ 9,385.82	\$ 12,249.77
Change	-4.89%	-2.72%	-2.20%	-1.92%	-1.70%

The chart below shows 2006 DUoS and TUoS charges as a proportion of the network charge for an average user.

1.1.4.1.6 NEE52 – Unmetered Supplies

The unmetered supplies tariff applies to approved supplies up to 50 watts, public lighting, traffic control system and other nominated installations.

There is no physical meter for this tariff. Contestable metrology procedures apply to public lighting installations and deemed loads for all other installations to determine usage.

NEE52 - Unmetered

	Very Low	Low	Average	High	Very High
Energy	0.21 MWh	0.50 MWh	0.72 MWh	0.93 MWh	1.22 MWh
Existing	\$ 9.82	\$ 22.91	\$ 32.73	\$ 42.55	\$ 55.64
Proposed	\$ 9.56	\$ 22.30	\$ 31.86	\$ 41.42	\$ 54.16
Change	-2.67%	-2.67%	-2.67%	-2.67%	-2.67%

The chart below shows 2006 DUoS and TUoS charges as a proportion of the network charge for an average user.

1.1.4.1.7 NEE54 - Small & Medium two rate 5 day Interruptible

SP AusNet has over 26,000 customers on small and medium two rate five day tariffs, a further 9,000 customers are on medium two rate seven day tariffs. These customers represent a significant portion of SP AusNet load in the rural network where there are a number of emerging supply constraints. Where these customers are able to allow SP AusNet to switch off a portion of their load for short periods of time during times of high local demand the benefit will be passed on to these customers through lower network charges. The maximum decrease in charges has been set at 12% of the peak energy charge that currently applies to Network Tariffs NEE21 and NEE51.

NEE54 - Medium two rate 5 day interruptible

	Very Low	Low	Average	High	Very High
Energy	35.04 MWh	81.76 MWh	116.81 MWh	151.85 MWh	198.57 MWh
Existing	\$ 1,924.95	\$ 4,262.74	\$ 6,016.09	\$ 7,769.44	\$ 10,107.23
Proposed	\$ 1,444.49	\$ 3,328.88	\$ 4,742.18	\$ 6,155.47	\$ 8,039.86
Change	-24.96%	-21.91%	-21.18%	-20.77%	-20.45%

The chart below shows 2006 DUoS and TUoS charges as a proportion of the network charge for an average user.

1.1.4.1.8 NEE55 – Snowfields Tariff

The Snowfields tariff was introduced in 2002. It applies to customers in specified alpine regions with off-peak (non-winter) consumption, that consume less than 400MWh per annum with maximum demand less than 150kVA.

The Snowfields tariff has been designed to reflect customer usage patterns in the alpine regions. The peak period is from the 1st of May to 30th September each year, and the off-peak period applies to all other times. The Snowfield tariff provides opportunities for tourism and businesses in alpine regions to expand during traditional low-season periods at reduced energy rates.

Customers in alpine regions who use off-peak electricity will benefit from a significantly reduced off-peak charge.

The minimum metering requirement is a basic type 6 single register meter.

As there is only one customer presently on network tariff NEE55, it is not considered appropriate to include an impact analysis.

1.1.4.1.9 NEE56 – Medium Demand Multi-rate Tariff

This tariff was introduced in 2003 and is applicable to all customers with metering installations capable of recording kVA, as required for all new customers consuming greater than 160 MWh per annum. The structure of this tariff ensures that customers are charged appropriately for the network unavoidable costs associated with these customers and, through the introduction of a shoulder rate, gives pricing signals that more appropriately capture the system load profile of SP

NEE56 - Medium demand multi-rate

	Very Low	Low	Average	High	Very High
Energy	70.30 MWh	164.03 MWh	234.33 MWh	304.63 MWh	398.36 MWh

Proposed	\$ 5,778.17	\$ 11,507.99	\$ 15,805.35	\$ 20,102.72	\$ 25,832.54
Change	-4.36%	-3.16%	-2.83%	-2.63%	-2.48%

AUSNET's network.

The chart below shows 2006 DUoS and TUoS charges as a proportion of the network charge for an average user.

1.1.4.1.10 NEE60 – Medium Two Rate 7-day Tariff (closed to new entrants)

Medium two rate 7-day tariff is most suited to 5-day operational businesses. The peak charge applies between 7pm and 11am, Monday to Sunday.

The minimum metering requirements is a basic type 6 dual register, with standard time switching capacity.

NEE60 - Medium two rate 7 day

	Very Low	Low	Average	High	Very High
Energy	6.25 MWh	14.57 MWh	20.82 MWh	27.07 MWh	35.39 MWh
Existing	\$ 677.46	\$ 1,324.75	\$ 1,810.21	\$ 2,295.67	\$ 2,942.95

Change	-11.27%	-3.90%	-1.84%	-0.64%	0.33%

The chart below shows 2006 DUoS and TUoS charges as a proportion of the network charge for an average user.

1.1.5 Large Low Voltage Customer Tariffs > 150 kVA and > 400MWh

Large customers are those customers who consume more than 400 MWh per annum, or a demand of greater than 150 kVA. Examples of large customers are large industrial sites, commercial buildings, and large public owned enterprises.

1.1.5.1.1 NEE71 – LV Large < 750 MWh Tariff (closed to new entrants)

NEE71 - LV Large < 750 MWh tariff applies to all large customers who either consume between 400 and 750 MWh per annum and more than 150 kVA, or less than 280 kVA and more than 750 MWh.

The minimum metering requirement is an interval meter, capable of measuring kWh and kVA integrated over a 30-minute period.

NEE71 - LV Large <750 kVA

	Very Low	Low	Average	High	Very High
Energy	204.08 MWh	476.19 MWh	680.26 MWh	884.34 MWh	1,156.45 MWh
Existing	\$ 14,607.87	\$ 29,937.02	\$ 41,433.89	\$ 52,930.76	\$ 68,259.91
Proposed	\$ 14,125.64	\$ 29,163.02	\$ 40,441.06	\$ 51,719.09	\$ 66,756.48
Change	-3.30%	-2.59%	-2.40%	-2.29%	-2.20%

The chart below shows 2006 DUoS and TUoS charges as a proportion of the network charge for an average user.

1.1.5.1.2 NEE72 – LV Large > 750 MWh Tariff (closed to new entrants)

NEE72 - LV Large > 750 MWh tariff applies to customers who consume more than 280 kVA per annum and more than 750 MWh per annum.

The minimum metering requirement is an interval meter, capable of measuring kWh and kVA integrated over a 30-minute period.

The chart below shows 2006 DUoS and TUoS charges as a proportion of the network charge for an average user.

NEE72 - LV Large > 750 kVA

	Very Low	Low	Average	High	Very High
Energy	648.12 MWh	1,512.29 MWh	2,160.41 MWh	2,808.53 MWh	3,672.70 MWh
Existing	\$ 34,661.46	\$ 76,728.74	\$ 108,279.20	\$ 139,829.66	\$ 181,896.94
Proposed	\$ 33,249.45	\$ 73,785.25	\$ 104,187.10	\$ 134,588.95	\$ 175,124.75
Change	-4.07%	-3.84%	-3.78%	-3.75%	-3.72%

The chart below shows 2006 DUoS and TUoS charges as a proportion of the network charge for an average user.

1.1.5.1.3 NEE74 – LV Large Two Rate 5-day Tariff (closed to new entrants)

The LV Large two rate 5-day tariff is for network customers who consume between 400 MWh and 750 MWh, and who were originally on the franchise retail maximum uniform tariff DH/DL.

No comparison is given for 'Very Low' consumption, as this would be below the minimum consumption for network tariff NEE74.

NEE74 - Large two rate 5 day

	Very Low	Low	Average	High	Very High
Energy	190.73 MWh	445.05 MWh	635.78 MWh	826.52 MWh	1,080.83 MWh
Existing	\$ 14,714.44	\$ 34,057.70	\$ 48,565.15	\$ 63,072.59	\$ 82,415.85
Proposed	\$ 14,568.52	\$ 33,844.41	\$ 48,301.32	\$ 62,758.24	\$ 82,034.13
Change	-0.99%	-0.63%	-0.54%	-0.50%	-0.46%

The chart below shows 2006 DUoS and TUoS charges as a proportion of the network charge for an average user.

1.1.5.1.4 NEE75 – LV Large Multi-rate <750 MWh Tariff

NEE75 was introduced in 2003 and applies to all large customers who either consume between 400 and 750 MWh per annum and more than 150 kVA, or less than 280 kVA and more than 750 MWh. It includes a shoulder component, aimed at giving pricing signals that more appropriately capture the system load profile of SP AUSNET's network.

The minimum metering requirement is an interval meter, capable of measuring kWh and kVA integrated over a 30-minute period.

NEE75 - Large multi-rate <750 kVA

	Very Low	Low	Average	High	Very High
Energy	147.75 MWh	344.75 MWh	492.50 MWh	640.24 MWh	837.24 MWh

The chart below shows 2006 DUoS and TUoS charges as a proportion of the network charge for an average user.

1.1.6 High Voltage Tariffs (NOMINAL VOLTAGE > 1000 VOLTS)

1.1.6.1.1 NEE81 – High Voltage Tariff

The High Voltage Demand tariff applies to high voltage customers such as large processors, manufacturers, and refineries. These customers receive supply at 6.6 kV or above and have a maximum demand of at least 1.15 MVA.

The minimum metering requirement is an interval meter, capable of measuring kWh and kVA integrated over a 30-minute period.

NEE81 - HV kVA

	Very Low	Low	Average	High	Very High
Energy	2,989.02 MWh	6,974.39 MWh	9,963.41 MWh	12,952.43 MWh	16,937.80 MWh
Existing	\$ 95,854.51	\$ 219,318.11	\$ 311,915.82	\$ 404,513.52	\$ 527,977.13
Proposed	\$ 76,599.39	\$ 174,751.10	\$ 248,364.89	\$ 321,978.67	\$ 420,130.39
Change	-20.09%	-20.32%	-20.37%	-20.40%	-20.43%

The chart below shows 2006 DUoS and TUoS charges as a proportion of the network charge for an average user.

1.1.6.1.2 NEE82 – Traction Tariff

NEE82 was introduced in 2003 and includes a shoulder rate that reflects daily usage patterns. All High Voltage traction sites were reassigned to this tariff.

NEE82 - Traction

	Very Low	Low	Average	High	Very High
Energy	1,114.75 MWh	2,601.09 MWh	3,715.84 MWh	4,830.59 MWh	6,316.93 MWh
Existing	\$ 51,349.58	\$ 115,473.28	\$ 163,566.06	\$ 211,658.83	\$ 275,782.54
Proposed	\$ 41,298.63	\$ 92,382.66	\$ 130,695.69	\$ 169,008.71	\$ 220,092.75
Change	-19.57%	-20.00%	-20.10%	-20.15%	-20.19%

The chart below shows 2006 DUoS and TUoS charges as a proportion of the network charge for an average user.

1.1.6.1.3 NEE83 – Small High Voltage Demand Tariff

This tariff applies to HV (NEE81) customers who have only small levels of consumption and demand. Assignment to this tariff is limited to customers with low load and energy requirements.

NEE83 - Small HV

	Very Low	Low	Average	High	Very High
Energy	327.98 MWh	765.29 MWh	1,093.27 MWh	1,421.25 MWh	1,858.56 MWh
Existing	\$ 21,310.09	\$ 45,381.14	\$ 63,434.43	\$ 81,487.71	\$ 105,558.76
Proposed	\$ 18,808.38	\$ 39,905.41	\$ 55,728.19	\$ 71,550.97	\$ 92,648.01
Change	-11.74%	-12.07%	-12.15%	-12.19%	-12.23%

The chart below shows 2006 DUoS and TUoS charges as a proportion of the network charge for an average user.

1.1.7 Sub-transmission Customer Tariffs

SP AusNet has only a small number of customers taking supply directly from the sub-transmission system. These customers are very diverse in terms of their location, the size of their load and their annual energy use. In recognition of this diversity SP AusNet has developed a pricing methodology that is based on customer's size and distance from Terminal Stations.

1.1.7.1.1 NEE91 – Sub-transmission Tariff

NEE91 – Sub-transmission tariff applies to customers who have a maximum demand less than 25000kVa and less than 20 km's from the terminal station.

The minimum metering requirement is an interval meter, capable of measuring kWh and kVA integrated over a 30-minute period.

1.1.7.1.2 NEE94 - Sub-transmission >25000kVA <20km from Terminal Station

This network tariff recognises that customers with very high load and usage located less than 20km from a Terminal Station impose a lower cost per kVA and kWh than do those with either lower load and usage or longer lines required to supply them. The 20km limit was chosen, as it is consistent with other market definitions of long and short sub-transmission lines.

1.1.7.1.3 NEE95 - Sub-transmission <25000kVA >20km from Terminal Station

SP AusNet owns and operates an extensive sub-transmission system in South west Gippsland and East Gippsland out of Morwell West Terminal Station and in North East Victoria out of Glenrowan Terminal Station, Mount Beauty Terminal Station and Thomastown Terminal Station. The urban network in the outer eastern suburbs of Melbourne is also quite extensive. Sub-transmission customers require a significant portion of these line assets to be held in reserve for their use. Furthermore, if high voltage customers transfer to sub-transmission supply they reduce the utilisation of significant portions of zone substation investment in these areas. SP AusNet has introduced this tariff in recognition of the higher costs associated with supplying remote sub-transmission customers as opposed to those that are relatively close to a Terminal Station.

The impact of 2004 and 2006 subtransmission tariffs on customers is shown below as a single average.¹

All 90s

	Very Low	Low	Average	High	Very High
Energy	23,621.49 MWh	55,116.80 MWh	78,738.29 MWh	102,359.78 MWh	133,855.09 MWh
Existing	\$ 221,032.72	\$ 490,843.82	\$ 693,202.14	\$ 895,560.46	\$ 1,165,371.55
Proposed	\$ 180,267.41	\$ 397,275.15	\$ 560,030.96	\$ 722,786.77	\$ 939,794.52
Change	-18.44%	-19.06%	-19.21%	-19.29%	-19.36%

¹ A single average is given for subtransmission customers as further disaggregated information may be commercially sensitive.

Tariffs Closed to New Entrants
 SP AusNet has not closed any tariffs in 2006

Forthcoming changes in network tariffs

Interval meters will allow SP AusNet to capture more information, allowing SP AUSNET to create more cost reflective and sophisticated tariffs. This is a process that will start in 2006.

Upper and lower bounds

SP Ausnet has modeled the tariffs based on long run marginal costs and allocated costs to tariff classes based on each classes' contribution to network maximum demand.

Pricing and future investment requirements

Time of use charges. Peak prices are higher than off peak charges as most of the future investment requirement is caused by peak usage.

SP AusNet's new tariffs will associate the variable tariff component with the pertinent variable costs of consumption. These costs will, where possible, have regard to the long run marginal costs consumption. When consumption is priced at long run marginal cost only efficient consumption occurs.

It is of course intensely difficult to accurately measure the long run marginal costs of consumption. These are in a state of constant flux, and are affected by both short and long run factors, they are reliant on accurate consumption forecasts, accurate costing of capital and labour costs, accurate knowledge of the timing of required capital investments costs and perfect information of future technological advances.

For this reason a certain amount of pragmatism is required in the allocation of variable costs to the variable tariff components. SP AusNet has undertaken a comprehensive allocation of variable costs between customer groups, tariffs, and tariff components, whilst having regard also to the long run marginal costs of consumption changes.

The fixed component of a customer's total bill is driven by those costs that do not vary with levels of consumption.

Re-assignments that have occurred and will take place, including a rationale

SP AusNet does not intend to undertake any Re-assignments for the forthcoming period (1st January 2006 –31st December 2006). Any long term re-assignments plan beyond this period can be found SP AusNet's Tariff Strategy Report.

Customers with contract demand reset (number, kVA value, and \$ value of reduction)

1.1.8 Load and demand management

SP Ausnet aims to reward customers who invest in load and demand management in order to utilise the network more efficiently. In recent times Demand management has been achieved mainly through power factor correction.

1.1.8.1 Power Factor Correction

When a customer takes action in order to correct their power factor, SP Ausnet will immediately reduce their demand charge to what is expected with the new power factor correction. The savings for the client are substantial and SP Ausnet benefits from a more efficient use of the network.

The following charts give the details on kVAR installed, dollar savings and customers.

1.1.8.2 Other load and demand management

1.1.9 *Demand Reset under 12 month notice Period*

Customers who manage the level of demand are entitled to apply for a demand reset, but a 12 month waiting period applies. Clients have made substantial savings over the years as the charts below show.

2 Usage/quantity information

Details on quantities (usage and customer numbers)

SP AusNet has provided information regarding customer numbers and energy usage as requested by the regulator. This information can be found on the tariff submission available on the ESC's website.

Future Network constraints

SP AusNet produces a Distribution System Planning Report, which outlines SP AusNet's plans to meet predicted demand for electricity and to improve reliability for customers. This report is available on SP AusNet's website at www.sp-ausnet.com.au

3 Annual adjustment variables

In 2006, SP AusNet reduced distribution tariffs by –5.8% on average. The maximum increase on any tariff was 0.3%. The changes were made up of the following:

Price Variation Elements	Percentage
CPI	3.0%
X Factor	-9.3%
S Factor	-0.82%

CPI: September Quarter of All Groups, Weighted Average of eight capital cities;
X Factor: Approved price path for regulatory period 2006-2010;
S Factor: Incentive mechanism on reliability that rewards (or penalises) distributors on the basis of performance against target.

Effect on individual tariffs components

Proposed tariff	Percentage Change		
	DUos	TUos	Total
NEE11 - Small single rate	-7.41%	45.02%	-1.31%

NEE94 - Subtransmission demand	-2.41%	82.12%	36.13%
NEE95 - Subtransmission demand	-3.51%	78.96%	32.76%

Impact of Network Tariffs

The following section provides a brief description of how SP AusNet has evaluated the impact on Network Tariffs as set out in section 1.5 where a comparison of the impact of changes between 2004 and 2006 Network Tariffs has been made. SP AusNet has made an evaluation of the impact by using five usage levels – very low, low, average, high and very high. Average consumption is calculated by dividing energy by the number of customers.² The remaining usage levels are calculated by applying a percentage, as shown below, to the average rate.

² Energy and customer numbers used relate to 2003, which are consistent with those submitted to the Essential Services Commission as part of the 2005 Network Tariff Submission.

To assess the impact of demand tariffs, a demand level was estimated according to the calculated consumption level in proportion to totals for the network tariff concerned. The demand charge used is the highest of either the calculated amount or the minimum demand for the tariff.

It should be noted that the calculated charges are based on SP AusNet customers and therefore are not comparable to the charges applicable to similar network tariffs for other Distribution Businesses.

Schedule Of Distribution Use Of System Tariffs

SPI Electricity Pty Ltd

Date of Application - 1 January 2006

GST not included

Small Customer Tariffs

Applies to < 90kVA & < 160 MWh/pa

NEE11 *Small Residential single rate*

Franchise Tariffs GD,GR

Standing Charge	\$/customer pa	\$ 24.00
Energy – First 1020/Quarter	c/kWh	3.955
Energy – Balance	c/kWh	4.489

NEE12 *Small Business single rate*

Franchise Tariffs B,E,G,N

Standing Charge	\$/customer pa	\$ 36.00
Energy – First 1020/Quarter	c/kWh	5.068
Energy – Balance	c/kWh	5.779

NEE13 *Small Residential single rate & Dedicated Circuit (closed to new entrants)*

Franchise Tariffs GD,GR & Y6,YT,Y8

Off Peak – 11:00PM to 7:00AM each day

Standing Charge	\$/customer pa	\$ 33.60
Energy – First 1020/Quarter	c/kWh	3.955
Energy – Balance	c/kWh	4.489
Off Peak Energy	c/kWh	1.718

NEE14 *Small Residential single rate & Dedicated Circuit – afternoon boost (closed to new entrants)*

Franchise Tariffs GD,GR & J,J6,JT,J8

Off Peak – 11:00PM to 7:00AM each day

Standing Charge	\$/customer pa	\$ 28.80
Energy – First 1020/Quarter	c/kWh	3.955
Energy – Balance	c/kWh	4.489
Off Peak Energy	c/kWh	1.476

NEE15 *Small Residential single rate & Dedicated circuit 8 to 8 (closed to new entrants)*

Franchise Tariffs GD,GR & Y6,YT,Y8

Off Peak – 6 or 8 hrs 8:00PM to 8:00AM each day

Standing Charge	\$/customer pa	\$ 33.60
Energy – First 1020/Quarter	c/kWh	3.955
Energy – Balance	c/kWh	4.489
Off Peak Energy	c/kWh	1.527

NEE16 *Small Business single rate & Dedicated Circuit (closed to new entrants)*

Franchise Tariffs B,E,G,N & Y6,YT,Y8

Off Peak – 11:00PM to 7:00AM each day

Standing Charge	\$/customer pa	\$ 45.60
Energy – First 1020/Quarter	c/kWh	5.068
Energy – Balance	c/kWh	5.779
Off Peak Energy	c/kWh	1.718

Date of Application - 1 January 2006

GST not included

NEE17 Small Business single rate & Dedicated Circuit – afternoon boost (closed to new entrants)*Franchise Tariffs B,E,G,N & J,J6,JT,J8*

Off Peak – 11:00PM to 7:00AM each day

Standing Charge	\$/customer pa	\$ 40.80
Energy – First 1020/Quarter	c/kWh	5.068
Energy – Balance	c/kWh	5.779
Off Peak Energy	c/kWh	1.476

NEE18 Small Business single rate & Dedicated circuit 8 to 8 (closed to new entrants)*Franchise Tariffs B,E,G,N & Y6,YT,Y8*

Off Peak – 6 or 8 hrs 8:00PM to 8:00AM each day

Standing Charge	\$/customer pa	\$ 45.60
Energy – First 1020/Quarter	c/kWh	5.068
Energy – Balance	c/kWh	5.779
Off Peak Energy	c/kWh	1.527

NEE20 Small Residential two rate*Franchise Tariffs GH/GL*

Peak Times – 7:00AM to 11:00PM Monday – Friday

Off Peak – All other times

Standing Charge	\$/customer pa	\$ 55.20
Peak Energy	c/kWh	5.592
Off Peak Energy	c/kWh	1.593

NEE21 Small Business two rate*Franchise Tariffs DH/DL*

Peak Times – 7:00AM to 11:00PM Monday – Friday

Off Peak – All other times

Standing Charge	\$/customer pa	\$ 156.00
Peak Energy	c/kWh	7.559
Off Peak Energy	c/kWh	2.434

NEE23 Photovoltaic*Franchise Tariffs GH/GL*

Peak Times – 7:00AM to 11:00PM Monday – Friday

Off Peak – All other times

Summer demand – 1 November to 30 March

Standing Charge	\$/customer pa	\$ 94.80
Peak Energy	c/kWh	4.219
Off Peak Energy	c/kWh	1.113
Summer peak payment	c/kWh	3.196

NEE30 Dedicated circuit (closed to new entrants)*Franchise Tariffs Y6,YT,Y8*

Off Peak – 11:00PM to 7:00AM each day

Standing Charge	\$/customer pa	\$ 9.60
Off Peak Energy	c/kWh	1.718

Attachment 2**Schedule Of Distribution Use Of System Tariffs****SPI Electricity Pty Ltd**

Date of Application - 1 January 2006

GST not included

NEE31 Dedicated circuit – afternoon boost (closed to new entrants)*Franchise Tariffs J,J6,JT,J8*

Off Peak – 3 hours per afternoon 11:00PM to 7:00AM each day

Standing Charge	\$/customer pa	\$ 4.80
Off Peak Energy	c/kWh	1.476

NEE32 Dedicated circuit 8 to 8 (closed to new entrants)*Franchise Tariffs Y6,YT,Y8*

Off Peak – 6 or 8 hrs 8:00PM to 8:00AM each day

Standing Charge	\$/customer pa	\$ 9.60
Off Peak Energy	c/kWh	1.527

NEE40 Medium single rate (closed to new entrants)*Franchise Tariffs B,E,G,N*

Standing Charge	\$/customer pa	\$ 33.60
Energy - All Consumption	c/kWh	5.958

NEE41 Medium single rate & Dedicated Circuit (closed to new entrants)*Franchise Tariffs B,E,G,N & Y6,YT,Y8*

Off Peak – 11:00PM to 7:00AM each day

Standing Charge	\$/customer pa	\$ 43.20
Peak Energy	c/kWh	5.958
Off Peak Energy	c/kWh	1.718

NEE42 Medium single rate & Dedicated Circuit – afternoon boost (closed to new entrants)*Franchise Tariffs B,E,G,N & J,J6,JT,J8*

Off Peak – 11:00PM to 7:00AM each day

Standing Charge	\$/customer pa	\$ 38.40
Peak Energy	c/kWh	5.958
Off Peak Energy	c/kWh	1.476

NEE43 Medium single rate & Dedicated circuit 8 to 8 (closed to new entrants)*Franchise Tariffs B,E,G,N & J,J6,JT,J8*

Off Peak – 11:00PM to 7:00AM each day

Standing Charge	\$/customer pa	\$ 43.20
Peak Energy	c/kWh	5.958
Off Peak Energy	c/kWh	1.527

Medium Customer Tariffs

Applies to > 50kVA & > 160 MWh/pa and < 400 MWh/pa

NEE51 Medium two rate 5 Day (closed to new entrants)

Peak Times – 7:00AM to 11:00PM Monday – Friday

Off Peak – All other times

Standing Charge	\$/customer pa	\$ 78.00
Peak Energy	c/kWh	7.873
Off Peak Energy	c/kWh	2.462

Attachment 2**Schedule Of Distribution Use Of System Tariffs****SPI Electricity Pty Ltd**

Date of Application - 1 January 2006

GST not included

NEE52 Unmetered supplies

Peak Times – 7:00AM to 11:00PM Monday – Friday

Off Peak – All other times

Peak Energy c/kWh 5.164

Off Peak Energy c/kWh 3.341

NEE54 Medium two rate 5 Day Interruptible

Available as an alternative to NEE21 or NEE51 in locations SPI Networks interruptibility

Peak Times – 7:00AM to 11:00PM Monday – Friday

Off Peak – All other times

Standing Charge \$/customer pa \$ 31.20

Peak Energy (Max Chg 10kVA) c/kWh 4.905

Peak Energy (Min Chg 100kVA) c/kWh 4.316

Off Peak Energy c/kWh 1.667

NEE55 Snowfields

Peak Times – 1 May to 30 September

Off Peak – All other times

Standing Charge \$/customer pa \$ 38.40

Peak Energy c/kWh 6.725

Off Peak Energy c/kWh 0.408

NEE56 Medium demand multi-rate

Peak Times – 7:00AM to 10:00AM and 4:00PM to 11:00PM Monday – Friday

Shoulder Times – 10:00AM to 4:00PM Monday – Friday

Off Peak – All other times

Standing Charge \$/customer pa \$ 1,480.80

Peak Energy c/kWh 3.775

Shoulder Energy c/kWh 3.458

Off Peak Energy c/kWh 2.646

Contract Demand \$/kVA pa 43.40

Minimum Demand 50 kVA

NEE60 Medium two rate 7 Day (closed to new entrants)

Peak Times – 7:00AM to 11:00PM Monday – Sunday

Off Peak – All other times

Standing Charge \$/customer pa \$ 97.20

Peak Energy c/kWh 8.778

Off Peak Energy c/kWh 3.197

Attachment 2

Schedule Of Distribution Use Of System Tariffs

SPI Electricity Pty Ltd

Date of Application - 1 January 2006

GST not included

Large Customer Tariffs

Applies to > 150kVA & > 400 MWh/pa

NEE71 Large demand - Either > 150kVA & > 400 MWh/pa & < 750MWh/pa

Or <280kVA & >750MWh (closed to new entrants)

Peak Times – 7:00AM to 11:00PM Monday – Friday

Off Peak – All other times

Standing Charge	\$/customer pa	\$ 2,847.60
Peak Energy	c/kWh	3.614
Off Peak Energy	c/kWh	1.966
Contract Demand	\$/kVA pa	46.97
Minimum Demand 150kVA		

NEE72 Large demand - > 280kVA & > 750MWh/pa (closed to new entrants)

Peak Times – 7:00AM to 11:00PM Monday – Friday

Off Peak – All other times

Standing Charge	\$/customer pa	\$ 2,847.60
Peak Energy	c/kWh	2.507
Off Peak Energy	c/kWh	1.957
Contract Demand	\$/kVA pa	55.20
Minimum Demand 280kVA		

NEE74 Large two rate 5 Day (closed to new entrants)

Peak Times – 7:00AM to 11:00PM Monday – Friday

Off Peak – All other times

Standing Charge	\$/customer pa	\$ 111.60
Peak Energy	c/kWh	9.395
Off Peak Energy	c/kWh	2.926

NEE75 Large demand multi-rate - Either > 150kVA & > 400 MWh/pa & < 750MWh/pa Or <280kVA & >750MWh

Peak Times – 7:00AM to 10:00AM and 4:00PM to 11:00PM Monday – Friday

Shoulder Times – 10:00AM to 4:00PM Monday – Friday

Off Peak – All other times

Standing Charge	\$/customer pa	\$ 2,847.60
Peak Energy	c/kWh	2.518
Shoulder Energy	c/kWh	2.017
Off Peak Energy	c/kWh	1.865
Contract Demand	\$/kVA pa	46.97
Minimum Demand 150kVA		

Attachment 2

Schedule Of Distribution Use Of System Tariffs

SPI Electricity Pty Ltd

Date of Application - 1 January 2006

GST not included

NEE76 Large demand multi-rate - > 280kVA & > 750MWh/pa

Peak Times – 7:00AM to 10:00AM and 4:00PM to 11:00PM Monday – Friday

Shoulder Times – 10:00AM to 4:00PM Monday – Friday

Off Peak – All other times

Standing Charge	\$/customer pa	\$ 2,847.60
Peak Energy	c/kWh	2.170
Shoulder Energy	c/kWh	1.732
Off Peak Energy	c/kWh	1.305
Contract Demand	\$/kVA pa	55.20
Minimum Demand 280kVA		

High Voltage Tariffs

Applies to 22,000 Volt supplies

NEE81 High Voltage demand

Peak Times – 7:00AM to 11:00PM Monday – Friday

Off Peak – All other times

Standing Charge	\$/customer pa	\$ 2,985.60
Peak Energy	c/kWh	0.563
Off Peak Energy	c/kWh	0.356
Contract Demand	\$/kVA pa	51.46
Minimum Demand 1150kVA		

NEE82 Traction

Peak Times – 7:00AM to 10:00AM and 4:00PM to 11:00PM Monday – Friday

Shoulder Times – 10:00AM to 4:00PM Monday – Friday

Off Peak – All other times

Standing Charge	\$/customer pa	\$ 2,985.60
Peak Energy	c/kWh	0.710
Shoulder Energy	c/kWh	0.528
Off Peak Energy	c/kWh	0.375
Contract Demand	\$/kVA pa	47.91
Minimum Demand 1150kVA		

NEE83 Small High Voltage demand

Peak Times – 7:00AM to 10:00AM and 4:00PM to 11:00PM Monday – Friday

Shoulder Times – 10:00AM to 4:00PM Monday – Friday

Off Peak – All other times

Standing Charge	\$/customer pa	\$ 2,985.60
Peak Energy	c/kWh	6.300
Shoulder Energy	c/kWh	5.040
Off Peak Energy	c/kWh	0.426
Contract Demand	\$/kVA pa	12.000
Minimum Demand 150kVA		

Date of Application - 1 January 2006

GST not included

Subtransmission Tariffs

Applies to 66,000 Volt supplies

NEE91 Subtransmission demand - <25000kVA and < 20km from Terminal Station

Peak Times – 7:00AM to 11:00PM Monday – Friday

Off Peak – All other times

Standing Charge	\$/customer pa	\$ 17,511.60
Peak Energy	c/kWh	0.226
Off Peak Energy	c/kWh	0.010
Contract Demand	\$/kVA pa	8.52
Minimum Demand 10500kVA		

NEE93 Latrobe Valley mines

Peak Times – 7:00AM to 11:00PM Monday – Friday

Off Peak – All other times

Standing Charge	\$/customer pa	\$ 0.0
Peak Energy	c/kWh	0.693
Off Peak Energy	c/kWh	0.693
Contract Demand	\$/kVA pa	0.00
Minimum Demand 25000kVA		

NEE94 Subtransmission demand - >25000kVA and < 20km from Terminal Station

Peak Times – 7:00AM to 11:00PM Monday – Friday

Off Peak – All other times

Standing Charge	\$/customer pa	\$ 17,511.60
Peak Energy	c/kWh	0.213
Off Peak Energy	c/kWh	0.032
Contract Demand	\$/kVA pa	5.34
Minimum Demand 25000kVA		

NEE95 Subtransmission demand - <25000kVA and > 20km from Terminal Station

Peak Times – 7:00AM to 11:00PM Monday – Friday

Off Peak – All other times

Standing Charge	\$/customer pa	\$ 17,511.60
Peak Energy	c/kWh	0.229
Off Peak Energy	c/kWh	0.031
Contract Demand	\$/kVA pa	7.84
Minimum Demand 10500kVA		

Date of Application - 1 January 2006

GST not included

RULES APPLYING TO REASSIGNMENT OF NETWORK TARIFFS

Provisions relating to the assignment of distribution customers to distribution tariffs can be found under section 2.1 of the Essential Services Commission *Electricity Distribution Price Review 2006 – 2010, Final Decision Volume II Price Determination*.

As part of its 2002 Network Tariff Submission, SP AusNet requested the Essential Services Commission to approve a tariff condition that customers seeking tariff reassignment must remain on the reassigned tariff for a minimum 12-month period. This request was approved and a 12-month timeframe now applies to all tariff reassignment requests, with exceptions made at SP AusNet's discretion. For example, SP AusNet may waive this requirement where it can be demonstrated that to not do so would result in unreasonable penalties or impose hardship on a customer.

This condition prevents customers changing tariffs to take advantage of seasonal variations in prices according to their individual load, thereby bypassing payment that reflects use of the distribution network over a full 12-month cycle.

RULES FOR DETERMINING A CUSTOMERS MAXIMUM DEMAND

For the purposes of determining a customer's Maximum Demand for Network Tariffs the following rules apply:

Definitions:

“Maximum Demand” means the demand determined in accordance with paragraphs (1) and (2) below which is made available by a Distributor for use by a customer at the Supply Point and is the basis for setting maximum demand charges to be paid by the customer to the Distributor each billing period. The Maximum demand is measured in kilo volt amps (kVA) and is calculated as the energy consumption recorded over the demand integration period divided by the demand integration period in hours. The demand integration period is 30 minutes. The Maximum Demand for a Supply Point is always more than or equal to the minimum chargeable demand applicable to the tariff, as specified in the Distribution Tariff Schedule (Attachment 1).

The formula for determining kVA is:

$$kVA = \sqrt{(KW^2 + kVAR^2)}$$

Where:

kW = kilo watts recorded over a 30 minute period

KVAR = kilo volt amp reactive recorded over a 30 minute period.

1. Initial Selection of Maximum Demand

(a) Supply Points not previously supplied under a contract demand tariff:

If a customer requests a supply of electricity under a demand metered Network Tariff, then an initial level of Maximum Demand must be agreed between the customer and SP AusNet as set out below:

- (i) **For existing Supply Points:** during the third month of supply, the customer and SP AusNet must negotiate a Maximum Demand to apply for the following 12 months having regard to:
 - (A) the minimum chargeable demand applicable to the relevant Distribution Tariff as set out in the schedule of Distribution Tariffs (Attachment 1).

Attachment 5

- (B) the actual highest metered maximum demand recorded since supply commenced.
- (ii) **For new Supply Points:** the customer and SP AusNet must negotiate a Maximum Demand to apply for a minimum of the following 12 months having regard to:
 - (A) the minimum chargeable demand applicable to the relevant Distribution Tariff as set out in the schedule of Distribution Tariffs (Attachment 1).
 - (B) the expected maximum demand of the relevant Supply Point.

(b) Supply Points previously supplied under a demand tariff

The records of metered demand for the customer in respect of the relevant Supply Point for the preceding 12 months must be examined. The Maximum Demand, for the customer in respect of the relevant Supply Point, is the highest of:

- (i) the maximum recorded demand that occurred in the preceding 12 month period; and
- (ii) the minimum chargeable demand applicable to the relevant Distribution Tariff (as specified in Attachment 1); and
- (iii) the contract demand under the previous tariff.

Where (i) is the highest and the customer satisfies SP AusNet that the maximum recorded demand was due to an unusual situation that is unlikely to recur, then the customer and SP AusNet must negotiate a Maximum Demand to apply for a minimum of the following 12 months having regard to:

- (i) the minimum chargeable demand applicable to the relevant Distribution Tariff as set out in Attachment 1; and
- (ii) the expected maximum demand of the relevant Supply Point.

2. Changes to Maximum Demand

(a) Increases in Maximum Demand

- (i) Where a customer requires an increase in Maximum Demand at a Supply Point, the customer must make a written request to SP AusNet. The increased level of Contract Demand shall apply from the requested date or as near as possible thereafter, subject to any required work being completed by SP AusNet.
- (ii) Temporary increases in Maximum Demand may be made available by SP AusNet to the customer in respect of the relevant Supply Point to cover specific, short-term needs, such as the commissioning of new plant, subject to:
 - (A) a minimum of one month's written notice from the customer; and
 - (B) prior agreement from the local DB (which agreement will be conditional upon the necessary capacity being available in SP AusNet Distribution System).

(b) Temporary Increases in Maximum Demand

Temporary increases in Maximum Demand will:

Attachment 5

- (i) be defined in terms of “additional demand” for a specific period;
- (ii) apply for one full billing period, except in the case of commissioning of new plant, in which case the duration of the temporary increase may be extended for the duration of the commissioning;
- (iii) be charged at the standard Maximum Demand price; and
- (iv) be limited to once occurrence in any 12 month period unless otherwise agreed by the local DB.

(c) Reduction in Maximum Demand

- (i) Where a customer requires a reduction in Maximum Demand at Supply Point, the customer must give 12 months written notice of this requirement. If SP AusNet agrees to reduce the Maximum Demand to any level down to the level sought by the customer, SP AusNet must notify the customer in writing within the 12-month notice period of a new Maximum Demand. The new Maximum Demand is to be applied from the reading date following the reading date that falls at the end of that 12-month notice period.

However, following installation by the customer of load management equipment approved by SP AusNet or the implementation of a demand management initiative approved by SP AusNet, the 12-month notice period may be reduced at the discretion of SP AusNet.

- (ii) If, in the 12 months following any reduction in Maximum Demand under sub-paragraph (i), the reduced Maximum Demand is exceeded, then the demand so recorded becomes the Maximum Demand applicable from the time of the reduction. This shall not apply to temporary increases in demand negotiated under clause 2(a)(ii).

(d) Changes following Maximum Demand being exceeded

In the event that the metered maximum demand in a billing period exceeds the Maximum Demand for that customer in respect of the relevant Supply Point;

- (i) a new Maximum Demand is established equal to the metered demand in that billing period;
- (ii) the new Maximum Demand shall apply for at least 12 months unless an exemption is obtained under sub-paragraph (iii) below;
- (iii) If the new Maximum Demand is established as a result of a fault in the customer’s electrical installation in respect of the relevant Supply Point, then SP AusNet may reduce the Maximum Demand back to the previous level after 3 months, provided:
 - (A) SP AusNet receives a written application for such a reduction from the customer within 30 days of billing following the fault; and
 - (B) SP AusNet is satisfied that:
 - (I) the fault has been diagnosed; and
 - (II) action has been taken to avoid a recurrence of that or similar faults; and
- (iv) Where the capacity of SP AusNet Distribution System is inadequate to make supply available at a higher rate on a continuous basis, SP AusNet may advise the customer that the new Maximum Demand will apply only for the billing period in

Attachment 5

which it was established, pending augmentation of SP AusNet Distribution System and renegotiation of a revised Maximum Demand. The maximum demand thereafter is limited to the available capacity of SP AusNet Distribution System, as determined by SP AusNet, by suitable load limiting equipment installed by the customer to the satisfaction of SP AusNet.

3. Multiple Supplies

Where SP AusNet provides multiple supplies, including alternative supplies to a customer in respect of a particular Supply Point, each supply shall be separately metered and billed under the Network Tariff selected by the customer for each supply. However, where such multiple supplies are taken from and metered at a single Supply Point they are to be treated as a single supply for Network Tariff and billing purposes.

STANDARD SERVICE PRICES

Effective 1 January 2006

NOTE: ALL PRICES INCLUSIVE OF GST

The following prices apply throughout SPI Electricity's Distribution Area.

After-hours rates will apply for work performed outside of normal SP AusNet Customer Service Centre business hours which includes weekends and public holidays

Charges for work performed after hours include award overtime and call-back provisions. When a charge is recorded as recoverable work (RW), RW rates and award penalty rates apply. Major works on large commercial or industrial installations, blocks or flats and CT operated metering are charged at RW rates.

When SP AusNet is unable to keep an appointment, every effort is made to inform the person or firm requesting the service.

1. NEW PREMISES CONNECTION PRICES

Applies to customers moving into new premises or requesting a temporary supply. The price includes all reasonable material, transport, equipment and labour. The prices cover overhead and underground supplies as indicated.

Charge Code	Service Description	Normal Hours \$ GST Incl.	After Hours \$ GST Incl.
Connections where SPI Electricity Pty Ltd is the Responsible Person			
010107	Single Ø Overhead - Non Off Peak Meter	194.21	303.90
010108	Single Ø Overhead - Off Peak Meter	263.51	373.20
010109	Single Ø Underground - Non Off Peak Meter	90.00	238.05
010110	Single Ø Underground - Off Peak Meter	159.30	307.35
010111	Multi Ø Overhead - Direct Connected Meter	441.30	510.40
010112	Multi Ø Overhead - CT Connected Meter	804.30	873.40
010113	Multi Ø Underground - Direct Connected Meter	291.01	428.15
010114	Multi Ø Underground - CT Connected Meter	654.01	791.15
	Temporary Supply		
010115	Overhead Supply - Coincident Disconnection 2 (Truck visit)	172.25	R/W
Connections where SPI Electricity Pty Ltd is not the Responsible Person			
010116	Single Ø Overhead - Non Off Peak Meter	131.51	241.20
010117	Single Ø Overhead - Off Peak Meter	131.51	241.20
010118	Single Ø Underground - Non Off Peak Meter	27.30	175.35
010119	Single Ø Underground - Off Peak Meter	27.30	175.35
010120	Multi Ø Overhead - Direct Connected Meter	276.30	345.40
010121	Multi Ø Overhead - CT Connected Meter	276.30	345.40
010122	Multi Ø Underground - Direct Connected Meter	126.01	263.15
010123	Multi Ø Underground - CT Connected Meter	126.01	263.15
	Temporary Supply		
010124	Overhead Supply - Coincident Disconnection 2 (Truck visit)	109.55	R/W

Supply Information

A direct-metered temporary supply is provided subject to:

•Sufficient supply being available at the pillar, pit or distribution pole, and this supply being within servicing distance of the desired location.

•Execution of an Application and Agreement for a Supply of Electricity form or equivalent document with a licensed Electricity Retailer.

Coincident Disconnection means that the Temporary Installation is removed by SPI Electricity after receipt of the Certificate of Electrical Safety (CES) form and is usually performed in conjunction with the installation of the permanent service and/or metering equipment.

Independent Disconnection means that upon payment of the Appropriate fee, a temporary installation is left connected until a request for disconnection is received from the customer.

Conversion from Coincident to Independent Disconnection can be arranged with payment in advance of an additional \$159.05 fee.

When a temporary supply is disconnected, reconnection requires a new application and additional fees. All other requirements for Temporary Supplies are included under the Service and Installation Rules.

2. FIELD OFFICER VISITS

Charge Code	Service Description	Normal Hours \$	After Hours \$
020600	Visit by a Field Officer	21.95	120.65

3. SERVICE TRUCK VISITS

Charge Code	Service Description	Normal Hours \$	After Hours \$
030000	Service Truck Visit	159.05	263.30

Applies to all customer and contractor requested Service Truck visits except:

- Emergency and fault calls unless the customer is clearly at fault - for example, not checked that the main switch or safety switch is "ON".
- The installation of a Meter and Time switch in a domestic premise because of the addition of off peak load.

4. LOW VOLTAGE METER CONVERSION (TYPE 6 TO TYPE 5)

Applies to work carried out at a customers or retailers request to convert basic (non interval) metering sites to interval metering.

Charge Code	Service Description	Installation Charge \$	Annual Charge \$
040100	Existing Installations 1Ø, 1 Element	120.42	
040102			50.00
040200	Existing Installations 1Ø, 2 Element	131.31	
040202			67.39
040300	Existing Installations multi 3Ø, Direct Connected	175.26	
040302			118.65
040400	Existing Installations 3Ø, CT Connected	171.99	
040402			157.18
040101	New Installations 1Ø, 1 Element		45.59
040201	New Installations 1Ø, 2 Element		67.39
040301	New Installations 3Ø, Direct Connected		101.49
040401	New Installations 3Ø, CT Connected		157.18

5. METER EQUIPMENT TEST

Where metering data is in dispute SP AusNet will conduct an insitu test of the meter. The following charges must be paid in advance of the test being undertaken, where the meter is found to be faulty the payment will be refunded.

Charge Code	Service Description	Normal Hours \$	After Hours \$
060100	Single Ø meter	159.05	N/A
060200	Each additional single Ø meter	54.85	N/A
060300	Single multi Ø meter	213.90	N/A
060400	Each additional multi Ø meter	71.30	N/A

6. TEMPORARY COVER OF LV MAINS

SP AusNet provides temporary covers for mains and services to ensure a safe working environment for those required to work in close proximity to overhead powerlines. The following charges cover the cost of installation and removal of the covers plus rental of the covers for a period of up to 3 months. Additional rental charges may apply for periods longer than 3 months. Where installation and removal is required outside normal working hours the After Hours charge will apply

Charge Code	Service Description	Normal Hours \$	After Hours \$
120100	Install 2 Wire Cover or Service Cable Cover	279.75	307.15
120200	All Wire Cover	438.80	499.75
120500	Plus Month Rental per Service Cable Cover	246.85	274.25
120600	Plus Monthly Rental per Cover		

7. RECOVERABLE WORKS RATES

Where SP AusNet undertakes works to be charged on the basis of Recoverable Works the following rates will be applied

Charge Code	Service Description	Normal Hours \$	After Hours \$
	Designers (Technical Non Engineer)	74.38	74.38
	Operations Officer	75.00	75.00
	Planner	62.15	62.15
	Surveyor	60.90	60.90
	Crew Leader	65.67	65.67
	Electrical Tester	60.14	60.14
	Line Worker Glove & Barrier, Line Worker Inspector	61.20	61.20
	Line Worker, Line Worker Cable Jointer	58.19	58.19

8. PROVISION OF SWITCHING SERVICE

Charge Code	Service Description	Normal Hours \$	After Hours \$
070100	Provision of Switching Service	71.30	R.W
	If a special truck visit is required then charge an additional \$159.05		

9. PROVISION OF SERVICE FUSES

Charge Code	Service Description	Normal Hours \$	After Hours \$
	Fuse Switch Disconnecter		
070100	160A 4 Pole	356.50	N/A
070100	400A 3 Pole	614.30	N/A
070100	400A 4 Pole	702.10	N/A

10. ELECTIVE UNDERGROUND SERVICING

The customer is responsible for all civil works, all Cable and conduit costs
 PLUS:

090100 Supply up to 100A per Phase (SPI Det. Max Demand)

New Installations - No Additional Charge

Charge Code	Service Description	Normal Hours \$	After Hours \$
090101	Existing Installations	318.15	R.W
	Plus cost of Cable per metre		
090102	2 Wire	2.65	
090103	3 Wire	4.13	
090104	4 Wire	5.47	
090105	Plus cost of Conduit per metre	2.44	
090200	Supply -Between 100A and 170A per phase		
	New Installations - At Cost	R.W	
090201	Existing Installations	405.90	R.W
090202	Plus cost of Cable per metre (50mm2)	10.67	
090203	Plus cost of Conduit per metre	3.61	

11. SERVICE CABLE PULLED DOWN BY HIGH LOADS

Charge Code	Service Description	Normal Hours \$	After Hours \$
140100	Single Phase	219.45	323.60
140200	Multi Phase	378.45	400.40

12. PUBLIC LIGHTING OPERATION, REPAIR, REPLACEMENT AND MAINTENANCE CHARGES

The following prices apply to Standard and Non Standard public lights that are maintained by SPI Electricity under the Public Lighting Code throughout its distribution area unless an alternative charge has been negotiated and agreed in writing with the public lighting customer.

Meter Provision

>160 MWh a year

Multi Phase Direct Connected Meter

Fixed Charge	\$/meter/pa	\$ 162.00
--------------	-------------	-----------

Multi Phase Current Transformer Connected Meter

Fixed Charge	\$/meter/pa	\$ 279.60
--------------	-------------	-----------

<160 MWh a year

Single Phase Single Element Meter (Non Off Peak)

Fixed Charge	\$/meter/pa	\$ 2.97
--------------	-------------	---------

Single Phase Two Element Meter With Contactor (Off Peak)

Fixed Charge	\$/meter/pa	\$ 6.60
--------------	-------------	---------

Multi Phase Direct Connected Meter

Fixed Charge	\$/meter/pa	\$ 39.26
--------------	-------------	----------

Multi Phase Current Transformer Connected Meter

Fixed Charge	\$/meter/pa	\$ 36.52
--------------	-------------	----------

NOTE: The above charges apply to all customers using less than 160 000 kWh a year and first tier customers with annual usage greater than 160 000 kWh that elect not to take a contestable meter option offered by their Retailer.

The charges will be applied on a per meter basis in the following manner:

1. Where a site is > 160 MW, a > 160 MWh Multi Phase CT Connected Meter Provisioning tariff will be applied on a per meter basis.
2. For < 160 MWh sites:
 - a. Which have Multi-phase connections with CT equipment, a Multi Phase CT Connected Meter Provisioning tariff will be applied on a per meter basis.
 - b. Which have Multi-phase connections with a Direct Connection, a Multi Phase, Direct Connected tariff will be applied on a per meter basis.

Date of Application - 1 January 2006

GST not included

- c. With only one meter, which is a Single-phase, single register connection a Single Phase Non Off Peak Meter Provisioning tariff will be applied.
- d. With Single-phase connections that do not receive a Single Phase Non Off Peak Meter tariff, a Single Phase Off Peak Meter tariff will be applied.

Note that if a site fits the criteria for more than one of the < 160 MW tariffs, all applicable tariffs may be applied.

The Meter Provisioning charges will be calculated by applying a daily rate to the time period covered in the related NUoS bill.

These charges will be visible in the detailed Billing file, provided on a monthly basis. The charges will be presented in the "600" line structure.

- The "Quantity" field in this structure will reflect the number of days being charged for. In a situation where there are multiple Multi-Phase meters being charged under the same tariff, the "quantity" will be the number of days multiplied by the number of meters.
- The "EventDate" field will reflect the "EndDate" presented in the NUoS record.

These charges are applicable from 1-Jan-2006, and bills for periods that commence before this date will be pro-rated to ensure the charges are only for this period forward.
