Network Price Book

1. INTRODUCTION

1.1 Who this Price Book Applies To

This Network Price Book has been developed for Network Users (contestable customers and embedded generators) connected to Ergon Energy Corporation Limited's distribution supply network. It sets out network prices and application rules for customer connection services after the customer has entered the contestable electricity market.

NOTE: The Queensland gazetted Retail Electricity Prices for non-contestable customers apply to:

- (a) those customers who are eligible to be contestable but who have not entered the contestable electricity market; and
- (b) customers not yet eligible to be contestable (Mt Isa customers, SAC < 100 MWh, Controlled Supplies and Unmetered Supplies).

The Network Charges shown in this Price Book for not yet eligible to be contestable customers are for information only and are NOT charged to any individual customer. These categories of network charges, with 2007-08 rates, will become available with the introduction of Full Retail Competition (FRC) on 1 July 2007.

Network Prices for Mt Isa customers will not be published as the contestable electricity market will not be available in the Mt Isa zone.

1.2 Format of this Price Book

Each Network customer category has a separate section within this Price Book which includes the relevant DUOS and TUOS price tables. Details on standard Distribution Loss Factors are provided in Section 5.

NMIs for customers with site-specific prices are listed in Appendix 1. This table of NMIs should be checked prior to determining applicable network rates for customers.

Site-specific prices are issued by Ergon Energy Network Pricing and are available to the customer and/or their Retailer of choice, or to a third party with the customer's written consent.

To assist with the selection of Network Prices for customers currently under Retail Electricity Prices published in the Queensland Government "Tariff Gazette", a matrix showing the indicative Network Charge Categories for each Tariff Code is provided in Appendix 2.

1.3 Where are Prices Derived From?

The Queensland Competition Authority (QCA), as the Jurisdictional Regulator under the National Electricity Code, has released its Final Determination "Regulation of Electricity Distribution", April 2005.

The Final Determination sets out the process for network price development to be applied for the new regulatory period 1 July 2005 to 30 June 2010, and requires that prices be published annually.

Ergon Energy has a "Network Pricing Principles Statement" (PPS) approved by the Queensland Competition Authority in May 2006, which sets out the steps for price development.

1.4 **Where Can More Information Be Obtained?**

In accordance with the QCA's requirements, Ergon Energy publishes 3 documents relating to distribution network pricing:

- (c) a "Network Pricing Principles Statement" which sets out the approach to be adopted during the regulatory control period 2005-06 to 2009-10.
- (d) this "Network Price Book" which is applicable to the 2006-07 financial year.
- (e) a "Guide to Transmission Network Connection Point by Postcode & Pricing Zone" that can be used to assist with the process of referencing the customers to a Transmission Network Connection Point.

These documents are available on the Ergon Energy web site at:

http://www.ergon.com.au/network_info/price_guide.asp

1.5 **How To Contact Ergon Energy Corporation Limited**

Network users and Retailers who are uncertain about the network pricing process or their particular circumstances are encouraged to contact us for assistance.

CONTACT DETAILS

Network Pricing Manager

P O Box 1090

TOWNSVILLE Q 4810

Ph (07) 4727 6683

FAX: (07) 4727 6849

E-mail: netprice@ergon.com.au

2. COMMON TERMS

- (a) AD – means Authorised Demand in kilowatts
- (b) CAC - means Connection Asset Customer
- (c) CPI – Consumer Price Index
- (d) DLF - means Distribution Loss Factor
- (e) DNSP - means Distribution Network Service Provider
- (f) DUOS - means Distribution Use of System.
- (g) EG - means Embedded Generator
- (h) FRC – Full Retail Competition
- (i) ICC - means Individually Calculated Customer
- (j) NEMMCO – National Electricity Market Management Company
- (k) Network Prices – consist of rates for DUOS and TUOS
- (l) NMI - means National Metering Identifier
- (m) Pricing Zones – means East, West and Mt Isa zones
- (n) ROC - means Retailer of Choice
- (o) SAC - means Standard Asset Customer
- (p) TNI - means Transmission Node Identifier
- (q) TUOS - means Transmission Use of System.

3. ADDITIONAL CONTRACTUAL PROVISIONS

The following contractual provisions in relation to distribution network price application apply to all contestable customers without Negotiated Customer Connection Contracts in addition to the provisions of the Standard Customer Connection Contract developed by Ergon Energy and approved by the Office of Energy:

- (a) It is intended that a network price will apply to each connection with the network and that those Network Users with multiple network connections will pay Network Charges for each connection.

This approach is entirely consistent with the NEMMCO issued NMI Procedure.

- (b) The distribution network price category as nominated by the customer or their Retailer of Choice may be subject to review in line with the following provisions:
 - (i) Ergon Energy may review the distribution network price category selected by the customer or their ROC after the customer enters the market. The

purpose of this provision is to ensure customers enter the market under the appropriate network price category.

- (ii) Ergon Energy must give the customer at least one month's notice of a proposed change in their distribution network price category.
 - (iii) The customer may elect to review the applied distribution network price category six months after entering the contestable market.
 - (iv) After the initial six month period, the customer shall only be able to request that their distribution network price category be changed once in any twelve month period at no cost, unless there has been a substantial step load change.
 - (v) Changes in distribution network price category will only proceed upon approval by Ergon Energy.
 - (vi) Any change of distribution network price category will take effect from the commencement of the next billing period.
- (c) Demand and/or volume are to be measured at each individual network connection point.
 - (d) Where Ergon Energy's load control relays and metering exist, they may not be disconnected without the DNSPs prior written consent.
 - (e) Customers or their ROC will be billed on a monthly basis.
 - (f) Where applicable, the fixed, service availability and demand charges will be calculated on a pro rata daily basis for initial and final accounts.

4. ZONES

4.1 Number of Zones

Three pricing zones have been delineated in the Ergon Energy area of supply, broadly based on Local Government areas of Queensland and apply to DUOS prices only. TUOS prices are not impacted by zones.

- (a) **East Zone** - includes those Local Government areas where the Network Users are supplied from the distribution system connected to the National Grid and having a relatively low cost to supply.
- (b) **West Zone** - includes those Local Government areas outside the East Zone and connected to the National Grid, which have a significantly higher distribution cost of supply than the East Zone.
- (c) **Mt Isa Zone** - broadly defined as those local government areas supplied from the isolated Mount Isa system. This zone is not connected to the National Grid and as such is excluded from the application of the Code. However, oversight of the network cost to supply the regulated network within the zone is carried out by the Jurisdictional Regulator.

4.2 Definitions of Zones

- (a) The **East Zone** consists of:

The cities of Bundaberg, Cairns, Gladstone, Hervey Bay, Mackay, Maryborough, Rockhampton, Thuringowa, Toowoomba and Townsville;

The Town of Dalby;

The whole of the Shires of Atherton, Banana, Biggenden, Bowen, Broadsound, Burdekin, Burnett, Calliope, Cambooya, Cardwell, Clifton, Duaringa, Eacham, Eidsvold, Fitzroy, Gayndah, Hinchinbrook, Isis, Johnstone, Jondaryan, Kingaroy, Kolan, Livingstone, Milmerran, Mirani, Miriam Vale, Monto, Mt Morgan, Munduberra, Murgon, Nanango, Nebo, Perry, Pittsworth, Rosalie, Sarina, Wambo, Warwick, Whitsunday, Wondai, and Woocoo;

Parts of the Shires of Belyando, Boonah, Cooloolo, Crows Nest, Esk, Douglas, Gatton, Herberton, Inglewood, Kilkivan, Mareeba, Peak Downs, Stanthorpe, and Tiaro.

Specific Parts of these shires are:

- (a) Belyando - Moranbah township;
- (b) Boonah, Cooloolo, Crows Nest, Esk, Gatton, Inglewood, Kilkivan, Stanthorpe and Tiaro - Ergon Energy supply area only;
- (c) Douglas - area south of the Daintree River
- (d) Herberton and Mareeba - Atherton Tableland area supplied from the "East" distribution system;
- (e) Peak Downs - Tieri township.

- (b) The **West Zone** consists of:

The City of Charters Towers;

The Town of Roma;

The whole of the Shires of Aramac, Barcaldine, Bauhinia, Bendemere, Blackall, Booringa, Bulloo, Bungil, Carpentaria, Chinchilla, Cook, Croydon, Dalrymple, Emerald, Etheridge, Flinders, Ilfracombe, Isisford, Jericho, Longreach, McKinlay, Murilla, Murweh, Paroo, Quilpie, Richmond, Tambo, Taroom, Warroo, and Winton;

Parts of the Shires of Balonne, Belyando, Douglas, Herberton, Mareeba, Peak Downs, Tara and Waggamba.

Specific Parts of these shires are:

- (a) Balonne, Tara and Waggamba - Ergon Energy supply area only ;
- (b) Belyando - other than Moranbah township;
- (c) Douglas - North of the Daintree River not excluded by the Distribution Authority;
- (d) Herberton and Mareeba - other than the Atherton Tableland area.
- (e) Peak Downs - other than Tieri township.

- (c) The **Mt Isa Zone** consists of the regulated network within the following areas:

The City of Mt Isa

The whole Shire of Cloncurry

(d) NOTE: those areas supplied from isolated generation are **NOT** included in any of the above zones.

The following map depicts the East, West and Mount Isa Zones.

5. DISTRIBUTION LOSS FACTORS (DLFs)

5.1 General Information

- (a) The DLF is a multiplier used to convert the customer's actual metered energy into the equivalent energy passing through the appropriate Transmission Network Connection Point by allowing for the distribution network losses that the customer's energy usage causes between their meter and the Transmission Network Connection Point.
- (b) The DLF is applied to the metered consumption for the calculation of TUOS volume charges. DLFs are generally assigned on the basis of the standard metering voltage for the type of connection however a specific loss factor may be applied where there is a unique network configuration supplying a particular customer.
- (c) Every contestable customer must have a DLF. The appropriate DLF is associated with the location of their metering point.
- (d) The DLFs applicable to all Ergon Energy contestable customers including site-specific DLFs for some larger ICCs, CACs and EGs are published on the NEMMCO web site:
<http://nemmco.com.au/>
- (e) Where site-specific DLFs have not been published the DLFs from Table A will apply.
- (f) Detailed information about the purpose and application of DLFs may also be obtained from the NEMMCO web site.

5.2 TABLE A - STANDARD DISTRIBUTION LOSS FACTORS

The following table of DLFs has been approved by the QCA and published by NEMMCO for the 2006-07 year.

Table A - Customers' Distribution Loss Factors for 2006-07						
Network Customer	Subtransmission Bus	Subtransmission Line	22/11kV Bus	22/11kV Line	Low Voltage Bus	Low Voltage Line
East Zone	1.014	1.025	1.023	1.044	1.076	1.103
West Zone	1.043	1.054	1.083	1.120	1.158	1.229

5.3 DLF Rules

- (a) The DLFs in this guide do NOT apply to ICC customers and EGs with individually calculated loss factors.
- (b) DLFs for all ICCs, CACs, and EGs will be included in the Schedule of Network Charges issued to the customer and/or their ROC.
- (c) The zonal boundaries are identical to those used for the Network Prices.
- (d) For SACs, the customer or ROC must nominate the DLF appropriate to the connection. The customer or ROC may be required to justify any nominated DLF.
- (e) The DLFs will be reviewed and published on a periodic basis in line with the requirements of the National Electricity Code.
- (f) Where the voltage at the metering point is not listed, or there is doubt about the application of these rules, please request advice from Ergon Energy.

5.4 DLF Categories

- (a) **Subtransmission Bus** – Applicable to connection points that are HV metered at a Subtransmission Bus with a voltage greater than 30kV.
- (b) **Subtransmission Line** – Applicable to connection points that are HV metered at a Subtransmission Line with a voltage greater than 30kV.
- (c) **22/11kV Bus** - Applicable to connection points that are HV metered at a 22/11kV Bus with a voltage less than 30kV and greater than 1,000 volts.
- (d) **22/11kV Line** – Applicable to connection points that are HV metered at a 22/11kV Line with a voltage less than 30kV and greater than 1,000 volts.
- (e) **Low Voltage Bus** - Applicable to connection points that are LV metered at a Low Voltage Bus with a voltage less than 1,000 volts.
- (f) **Low Voltage Line** – Applicable to connection points that are LV metered at a Low Voltage Line with a voltage less than 1,000 volts.

5.5 DLF Applications

(a) Subtransmission and 22/11kV Bus

If customers believe that they qualify for a high voltage Bus DLF rather than a high voltage Line DLF they should submit details justifying their claim to their DNSP. As an example, customers who are supplied from a zone substation by dedicated 22/11kV lines and are metered at or immediately adjacent to the zone substation would be eligible for a 22/11kV Bus DLF.

Furthermore, customers who are supplied from a zone substation by dedicated greater than 30kV lines and are metered at or immediately adjacent to the zone substation would be eligible for a Subtransmission Bus DLF.

Zone substations are defined as substations where the voltage level is stepped down from a voltage greater than 30kV.

(b) **Subtransmission Line**

The Subtransmission Line DLF will apply to all customers who are connected to high voltage subtransmission lines (greater than 30kV) and are metered at the same voltage as the line is energised.

(c) **22/11kV Line**

The 22/11kV Line DLF will apply to all customers who are connected to high voltage distribution lines and are metered at the same voltage as the line is energised.

(d) **LV Bus**

Customers who are supplied from a distribution substation on their site (owned or leased) and are metered at the low voltage level are eligible for a LV Bus DLF.

(e) **LV Line**

All customers not covered by any of the above categories

6. TRANSMISSION NODE IDENTIFIERS (TNIs)

(a) Ergon Energy advises Retailers of the TNI applicable to particular customers at the time of issuing Certificates of Contestability. If uncertain, customers and Retailers should confirm the TNI by contacting Ergon Energy.

(b) A guide to TNIs related to postcodes and zones is available on the Ergon Energy web site. Caution should be applied when using this guide as there are many places in the Ergon Energy supply area where regions represented by a single postcode can have a number of different TNIs.

7. SIDE CONSTRAINTS

(a) **DUOS**

It is a requirement of QCA that a customer's individual annual network distribution price increase must not exceed CPI plus 5% unless price paths apply (refer below). Where a customer's price increase exceeds this amount, Ergon Energy has produced a site-specific or side-constrained price that will be issued directly to the customer and/or the customer's ROC.

(b) **TUOS**

A number of customers will have side constraints applied to their TUOS Prices. Where Ergon Energy has produced a site-specific or side-constrained TUOS price, that TUOS price will be issued directly to the customer and/or the customer's ROC.

(c) PRICE PATHS

For those customers paying less than cost (i.e. receiving side-constrained prices) the QCA requires that Ergon Energy propose a price path that would move these customers to cost reflective pricing by the end of the next regulatory period (i.e. by the end of the 2014-15 financial year.)

This has resulted in a small number of customers receiving increases above CPI plus 5% for the 2006-07 year and these customers and/or the customer's ROC will be advised separately of their site-specific prices, the actual increase applied and the likely future increases to apply.

(d) NMIs for customers with site-specific prices are listed in Appendix 1.

8. INDIVIDUALLY CALCULATED CUSTOMERS (ICCs)

8.1 Definition

ICCs are those customers:

- (a) with energy consumption typically greater than 40 GWh per annum; or
- (a) customers with energy consumption lower than 40 GWh per annum where:
 - (i) a customer has a dedicated supply system which is quite different and separate from the remainder of the supply network; or
 - (ii) there are only two or three customers in a supply system making average prices inappropriate; or
 - (iii) a customer is connected at or close to a transmission connection point and the inclusion of the cost of average shared network would increase their network price above stand-alone; or
 - (iv) inequitable treatment of otherwise comparable customers arising from the 40 GWh threshold.

8.2 DUOS Prices

- (a) DUOS Network Prices are based on:
 - (i) the actual dedicated connection assets utilised by the customer; plus;
 - (ii) the customer's specifically identified portion of any shared distribution network utilised for the electricity supply.
- (b) DUOS Prices incorporate a Fixed Charge (\$/month), a Capacity Charge (\$/kW of AD/month), an Actual Demand Charge (\$/kW/month) and a Volume Charge (c/kWh).

Where the actual demand exceeds the authorised demand in any one month the actual demand will be substituted for the authorised demand in the calculation of the capacity charge for that month.

- (c) DUOS Prices for ICCs are site-specific and are available to the customer and/or their ROC, or to a third party with the customer's written consent.
- (d) NMIs for ICCs are listed in Appendix 1.

8.3 TUOS Prices

- (a) TUOS charges are calculated and levied by Powerlink for each transmission connection point and are passed through on a reflective basis proportional to the Authorised Demand of the customer and their energy consumption.
- (b) TUOS Prices incorporate a Fixed Charge (\$/month), a Capacity Charge (\$/kW of AD/month), a Common Service & General Charge (\$/month) and a Volume Charge (c/kWh)

Where the actual demand exceeds the authorised demand in any one month the actual demand will be substituted for the authorised demand in the calculation of the capacity charge for that month.

To determine the total TUOS volume charge, the customer energy must be multiplied by the customer DLF and then applied to the TUOS c/kWh rate.

- (c) TUOS Prices for ICCs are site-specific and are available to the customer and/or their ROC, or to a third party with the customer's written consent.
- (d) NMIs for ICCs are listed in Appendix 1.

9. CONNECTION ASSET CUSTOMERS (CACs)

9.1 Definition

CACs are those customers:

- (a) with energy consumption typically greater than 4 GWh per annum; or
- (b) Customers may be classed as a CAC with energy consumption lower than 4 GWh per annum where:
 - (i) a customer has a dedicated supply system which is quite different and separate from the remainder of the supply network; or
 - (ii) inequitable treatment of otherwise comparable customers arising from the 4 GWh threshold

9.2 DUOS Prices

- (a) DUOS Network Prices are based on:
 - (i) the actual dedicated connection assets utilised by the customer; plus
 - (ii) average charges for use of the shared network
- (b) DUOS Prices incorporate a Fixed Charge (\$/month), a Capacity Charge (\$/kW of AD/month), an Actual Demand Charge (\$/kW/month) and a Volume Charge (c/kWh).

Where the actual demand exceeds the authorised demand in any one month the actual demand will be substituted for the authorised demand in the calculation of the capacity charge for that month.

- (c) The Capacity Charge, Actual Demand Charge and Volume Charge components of CAC prices for each zone are published in Tables 1 and 2. These tables do **NOT** include TUOS. The CAC Fixed Charge is site-specific and not published in the public domain. Ergon Energy will provide the total distribution network price directly to the customer and/or their ROC, or to a third party with the customer's written consent.
- (d) NMIs for CACs are listed in Appendix 1

9.3 TUOS Prices

- (a) TUOS charges are calculated and levied by Powerlink for each transmission connection point and are passed through on a reflective basis proportional to the Authorised Demand of the customer and their energy consumption.
- (b) TUOS Prices incorporate a Fixed Charge (\$/month), a Capacity Charge (\$/kW of AD/month), a Common Service & General Charge (\$/month) and a Volume Charge (c/kWh)

Where the actual demand exceeds the authorised demand in any one month the actual demand will be substituted for the authorised demand in the calculation of the capacity charge for that month.

To determine the total TUOS volume charge, the customer energy must be multiplied by the customer DLF and then applied to the TUOS c/kWh rate.

- (c) TUOS Prices for CACs are site-specific and are available to the customer and/or their ROC, or to a third party with the customer's written consent.
- (d) NMIs for CACs are listed in Appendix 1.

9.4 Tables 1 & 2 – CAC DUOS Prices for Shared Network Components

{These prices are GST Inclusive - to determine GST Exclusive divide by 1.1}

Table 1 - East Zone					
Distribution Use Of System (DUOS) Prices for Connection Asset Customers					
These tables do NOT include TUOS. TUOS charges are site-specific and available on request.					
Network Charge Category	Network Charge Description	Fixed Charge \$/month	Capacity Charge \$/kW/month	Actual Demand Charge \$/kW/month	Volume Charge c/kWh
ECAC66	66kV	Site Specific	\$2.5080	\$1.4212	0.2409
ECAC33	33kV	Site Specific	\$2.9524	\$1.6841	0.2409
ECAC 22/11B	22/11kV Bus	Site Specific	\$3.3572	\$1.8238	0.2409
ECAC 22/11L	22/11kV Line	Site Specific	\$6.7111	\$3.4848	0.2409

Table 2 - West Zone					
Distribution Use Of System (DUOS) Prices for Connection Asset Customers					
These tables do NOT include TUOS. TUOS charges are site-specific and available on request.					
Network Charge Category	Network Charge Description	Fixed Charge \$/month	Capacity Charge \$/kW/month	Actual Demand Charge \$/kW/month	Volume Charge c/kWh
WCAC66	66kV	Site Specific	POA	POA	POA
WCAC33	33kV	Site Specific	\$12.6830	\$22.6237	0.4466
WCAC 22/11B	22/11kV Bus	Site Specific	POA	POA	POA
WCAC 22/11L	22/11kV Line	Site Specific	\$19.0773	\$12.7985	0.4466

Notes on Tables:

- Demand and/or volume are to be measured at each individual distribution network connection point.
- The CAC Fixed Charge is dependent upon the assets dedicated to the network user and therefore is site-specific.
- Where the actual demand exceeds the authorised demand in any one month the actual demand will be substituted for the authorised demand in the calculation of the capacity charge for that month.
- These tables do **NOT** include TUOS. TUOS for CACs is site-specific and is available from Ergon Energy on request.
- POA – Price on Application.
- NMIs for customers with site-specific prices are listed in Appendix 1.

10. EMBEDDED GENERATORS (EGs)

10.1 Definition

EGs can be separated into two categories

- (a) EGs that are connected to and only generate into the distribution system.
- (b) EGs that are connected to, generate into as well as take load from the distribution system.

10.2 DUOS Prices

- (a) For those EGs that only generate into the distribution system
 - (i) DUOS Price consists of a Fixed Charge (\$/month).
 - (ii) DUOS Prices for EGs are site-specific and are available to the generator or to another party with the customer's written consent.
 - (iii) NMIs for EGs are listed in Appendix 1.
- (b) For those EGs that generate into as well as take load from the distribution system
 - (i) DUOS Price for generated energy consists of a Fixed Charge (\$/month) and
 - (ii) DUOS Price for load taken from the distribution system will be allocated as per the appropriate Network Price category selected from ICCs, CACs or SACs.
 - (iii) DUOS Prices for EGs are site-specific and are available to the generator or to another party with the customer's written consent.
 - (iv) NMIs for EGs are listed in Appendix 1.

10.3 TUOS Prices

- (a) For those EGs that only generate into the distribution system.
 - (i) TUOS price for generated energy does not apply.
- (b) For those EGs that generate into as well as take load from the distribution system
 - (i) TUOS price for generated energy does not apply.
 - (ii) TUOS Price for load taken from the distribution system will be allocated as per the appropriate Network Price category selected from ICCs, CACs or SACs.

11. STANDARD ASSET CUSTOMERS >100 MWh Per Annum (SACs >100 MWh)

11.1 Definition

SACs >100 MWh are those customers:

- (a) with energy consumption typically greater than 100 MWh per annum; or
- (b) where the network prices are based on the averages of both the shared distribution network charges and connection charges for the Network User Group in the particular zone
- (c) currently eligible to enter the contestable electricity market

11.2 DUOS Prices

- (a) DUOS Network Prices are based on:
 - (i) the average of the connection charges and
 - (ii) the average of the shared distribution network charges.
- (b) DUOS Prices incorporate a Service Availability Charge (\$/month), a Demand Charge (\$/kW/month) and a Volume Charge (c/kWh).

The Minimum Chargeable Demand will be applied for each month where the monthly maximum demand fails to exceed this value.
- (c) The current approved DUOS rates for SACs > 100 MWh for the East and West zones are published in Tables 3 and 4. These tables do **NOT** include TUOS.
- (d) NMIs for SACs with site-specific prices are listed in Appendix 1.
- (e) The Network Price category applicable to a customer will be as nominated by the customer or their ROC from among the following categories:
 - (i) **Demand High Voltage (EDH or WDH)** is available to customers who have high voltage metering and take supply at high voltage. This category is **NOT** available to customers with non-standard or significant connection arrangements, who have distribution transformer(s) provided by Ergon Energy, or to customers who are metered at other than high voltage.
 - (ii) **Demand Large (EDL or WDL), Demand Medium (EDM or WDM) and Demand Small (EDS or WDS)** are available to all SACs > 100 MWh. The network price categories are self-selecting with customers' load characteristics determining the optimum category.
- (f) Where a customer has a change in their load characteristics, it is the customer's responsibility to review their network prices to determine if a different network price category is appropriate.
- (g) When a contestable network user's annual energy consumption falls below the current contestability threshold level (i.e. below 100 MWh per annum), the Queensland Electricity Regulation does not currently allow these network users to revert to franchise tariff.

To ensure these network users are not unfairly penalised Ergon Energy, at its discretion, may allow these network users to access the East or West Volume Large (EVL or WVL) rate, for both DUOS and TUOS, applicable to the SACs < 100 MWh non-contestable network users in the appropriate zone, as currently approved by QCA.

[The current approved rates for EVL and WVL are shown in Tables 6 and 7 for DUOS and in Table 8 for TUOS.]

An example for when this may occur is when a site is closed down but the contestable network user still has responsibility for the site and leaves the supply connected for security purposes.

11.3 TUOS Prices

- (a) TUOS charges are calculated and levied by Powerlink for each transmission connection point. Ergon Energy will combine rates in geographical regions and pass through TUOS charges to SACs >100 MWh thus providing an appropriate locational signal in each region.
- (b) TUOS prices incorporate a Fixed Charge (\$/month), Demand Charge (\$/kW/month) and Volume Charge (c/kWh).

The Minimum Chargeable Demand will be applied for each month where the monthly maximum demand fails to exceed this value.

To determine the total TUOS volume charge, the customer energy must be multiplied by the customer DLF and then applied to the TUOS c/kWh rate from Table 5 for the TNI applicable to the customer.

- (c) The current approved TUOS rates are published in Table 5.
- (d) NMIs for SACs with site-specific prices are listed in Appendix 1.

11.4 Mt Isa

Network Prices for Mt Isa customers will not be published as the contestable electricity market will not be available in the Mt Isa zone.

11.5 Tables 3 & 4 – SACs > 100 MWh DUOS Prices

{These prices are GST Inclusive - to determine GST Exclusive divide by 1.1}

Table 3 - East Zone						
Distribution Use Of System (DUOS) Prices for Standard Asset Customers > 100 MWh						
(These tables do NOT include TUOS, add on TUOS from Table 5)						
Network Charge Category	Network Charge Description	Default Distribution Loss Factor	Minimum Chargeable Demand kW	Service Availability Charge \$/month	Demand Charge \$/kW/month	Volume Charge c/kWh
EDH	High Voltage	1.044	400	\$418.22	\$9.3489	0.2431
EDL	Large Demand	1.103	400	\$943.91	\$10.8581	0.2431
EDM	Medium Demand	1.103	120	\$339.35	\$12.3695	0.2431
EDS	Small Demand	1.103	30	\$49.17	\$14.7884	0.2431

Table 4 - West Zone						
Distribution Use Of System (DUOS) Prices for Standard Asset Customers > 100 MWh						
(These tables do NOT include TUOS, add on TUOS from Table 5)						
Network Charge Category	Network Charge Description	Default Distribution Loss Factor	Minimum Chargeable Demand kW	Service Availability Charge \$/month	Demand Charge \$/kW/month	Volume Charge c/kWh
WDH	High Voltage	1.120	400	\$402.49	\$26.6277	0.4477
WDL	Large Demand	1.229	400	\$956.01	\$41.0740	0.4477
WDM	Medium Demand	1.229	120	\$370.81	\$42.5348	0.4477
WDS	Small Demand	1.229	30	\$60.50	\$45.1286	0.4477

Notes on Tables:

1. Demand and/or volume are to be measured at each individual distribution network connection point.
2. Minimum Chargeable Demand will be applied for each month where the monthly maximum demand fails to exceed this value.
3. These tables do **NOT** include TUOS. Add TUOS from Table 5.
4. NMIs for customers with site-specific prices are listed in Appendix 1.

11.6 Table 5 – SACs > 100 MWh TUOS Prices

{These prices are GST Inclusive - to determine GST Exclusive divide by 1.1}

Table 5 - Transmission Use of System Charges for SAC Customers with Network Charge Categories EDH, EDL, EDM and EDS, or WDH, WDL, WDM and WDS.				
NOTE 1: Customer energy must be multiplied by customer distribution loss factor to obtain the correct TUOS kWh, then apply the Volume Charge c/kWh.				
NOTE 2: The demand to be used for the demand charge is the greater of the monthly maximum demand or the Minimum Chargeable Demand from Table 3 or 4.				
Transmission Connection Point	TNI	Fixed charge \$/mth	Demand Charge \$/kW/mth (see Note 2)	Volume Charge c/kWh (see Note 1)
Alligator Creek	QALC	\$64.90	\$1.3090	0.8349

12. STANDARD ASSET CUSTOMERS < 100 MWh Per Annum – VOLUME LARGE (SACs < 100 MWh)

12.1 Definition

SACs < 100 MWh – Volume Large are those customers:

- (a) with energy consumption in the range of approximately 26 MWh to 100 MWh per annum; and
- (b) where the network prices are based on the averages of both the shared distribution network charges and connection charges for the Network User Group in the particular zone.
- (c) not eligible to enter the contestable electricity market until 1 July 2007

12.2 DUOS Prices

- (a) DUOS Network Prices are based on:
 - (i) the average of the connection charges and
 - (ii) the average of the shared distribution network charges.
- (b) DUOS Prices incorporate a Service Availability Charge (\$/month) and a Volume Charge (c/kWh).
- (c) Where a customer has a change in their load characteristics, it is the customer's responsibility to review their network prices to determine if a different network price category is appropriate.
- (d) The current approved DUOS rates for this category for the East and West zones is published in Tables 6 & 7. These tables do **NOT** include TUOS.

Note that these Network Charges are shown for information only and are not available to customers at this time.

12.3 TUOS Prices

- (a) TUOS charges are calculated and levied by Powerlink for each transmission connection point. Ergon Energy will combine rates in geographical regions and pass through TUOS charges to SACs < 100 MWh thus providing an appropriate locational signal in each region.
- (b) TUOS prices for **Volume Large** incorporate a Fixed Charge (\$/month) and Volume Charge (c/kWh).

To determine the total TUOS volume charge, the customer energy must be multiplied by the customer DLF and then applied to the TUOS c/kWh rate.

- (c) The current approved TUOS rates for **Volume Large (EVL or WVL)** category are published in Table 8.

Note that these Network Charges are shown for information only and are not available to customers at this time.

12.4 Mt Isa

Network Prices for Mt Isa customers will not be published as the contestable electricity market will not be available in the Mt Isa zone.

12.5 Tables 6 & 7 – SACs < 100 MWh DUOS Prices - Volume Large [For Information Only]

{These prices are GST Inclusive - to determine GST Exclusive divide by 1.1}

Table 6 - East Zone				
Distribution Use Of System (DUOS) Prices for Standard Asset Customers < 100MWh - Volume Large				
Network Charge Category	Network Charge Description	Default Distribution Loss Factor	Service Availability Charge \$/month	Volume Charge c/kWh
EVL	Volume Large	1.103	\$40.150	5.9070
(EVL rates do NOT include TUOS, add on TUOS from Table 8)				

Table 7 - West Zone				
Distribution Use Of System (DUOS) Prices for Standard Asset Customers < 100MWh - Volume Large				
Network Charge Category	Network Charge Description	Default Distribution Loss Factor	Service Availability Charge \$/month	Volume Charge c/kWh
WVL	Volume Large	1.229	\$82.610	19.3809
(WVL rates do NOT include TUOS, add on TUOS from Table 8)				

Notes on Tables:

1. Volume is to be measured at each individual distribution network connection point.
2. These tables do **NOT** include TUOS. Add TUOS from Table 8.
3. Note that these Network Charges are shown for information only and are not available to customers at this time. These categories of network charges will become available with the introduction of Full Retail Competition on 1 July 2007.

12.6 **Table 8 –SACs < 100 MWh TUOS Prices - Volume Large [For Information Only]**

{These prices are GST Inclusive - to determine GST Exclusive divide by 1.1}

Table 8 - Transmission Use of System Charges for SAC Customers with Network Charge Categories of EVL or WVL.			
NOTE 1: Customer energy must be multiplied by customer distribution loss factor to obtain the correct TUOS kWh, then apply the Volume Charge c/kWh.

Ross (Kidston & Millchester)	QROS	\$32.34	0.8349
Tangkam	QTKM	\$14.41	0.6259
Tully	QTLL	\$50.60	1.2023
Tarong 132	QTRH	\$14.41	0.6259
Tarong	QTRL	\$14.41	0.6259
Turkinje (Port Douglas)	QTUH	\$50.60	1.2023
Turkinje	QTUL	\$50.60	1.2023
Townsville South	QTVS	\$32.34	0.8349
Woolooga	QWLG	\$14.41	0.6259

Note: These Network Charges are shown for information only and are not available to customers at this time. These categories of network charges will become available with the introduction of Full Retail Competition on 1 July 2007.

13. STANDARD ASSET CUSTOMERS < 100 MWh Per Annum – VOLUME SMALL (SACs < 100 MWh)

13.1 Definition

SACs < 100 MWh – Volume Small are those customers:

- (a) with energy consumption in the range of approximately 0 MWh to 26 MWh per annum; and
- (b) where the network prices are based on the averages of both the shared distribution network charges and connection charges for the Network User Group in the particular zone.
- (c) not eligible to enter the contestable electricity market until 1 July 2007

13.2 DUOS Prices

- (a) DUOS Network Prices are based on:
 - (i) the average of the connection charges and
 - (ii) the average of the shared distribution network charges.
- (b) DUOS Prices incorporate a Service Availability Charge (\$/month) and a Volume Charge (c/kWh).
- (c) Where a customer has a change in their load characteristics, it is the customer's responsibility to review their network prices to determine if a different network price category is appropriate.
- (d) The current approved DUOS rates for this category for the East and West zones are published in Tables 9 & 10. These tables do **NOT** include TUOS.

Note that these Network Charges are shown for information only and are not available to customers at this time.

13.3 TUOS Prices

- (a) TUOS charges are calculated and levied by Powerlink for each transmission connection point. Ergon Energy will combine rates in geographical regions and pass through TUOS charges to SACs < 100 MWh thus providing an appropriate locational signal in each region.
- (b) TUOS prices for **Volume Small** incorporate a Fixed Charge (\$/month) and Volume Charge (c/kWh).

To determine the total TUOS volume charge, the customer energy must be multiplied by the customer DLF and then applied to the TUOS c/kWh rate.

- (a) The current approved TUOS rates for **Volume Small (EVS or WVS)** category are published in Table 11.

Note that these Network Charges are shown for information only and are not available to customers at this time.

13.4 Mt Isa

Network Prices for Mt Isa customers will not be published as the contestable electricity market will not be available in the Mt Isa zone.

13.5 Tables 9 & 10 – SACs < 100 MWh DUOS Prices - Volume Small **[For Information Only]**

{These prices are GST Inclusive - to determine GST Exclusive divide by 1.1}

Table 9 - East Zone				
Distribution Use Of System (DUOS) Prices for Standard Asset Customers < 100MWh - Volume Small				
Network Charge Category	Network Charge Description	Default Distribution Loss Factor	Service Availability Charge \$/month	Volume Charge c/kWh
EVS	Volume Small	1.103	\$22.770	5.9070
(EVS rates do NOT include TUOS, add on TUOS from Table 11)				

Table 10 - West Zone				
Distribution Use Of System (DUOS) Prices for Standard Asset Customers < 100MWh - Volume Small				
Network Charge Category	Network Charge Description	Default Distribution Loss Factor	Service Availability Charge \$/month	Volume Charge c/kWh
WVS	Volume Small	1.229	\$24.420	19.3809
(WVS rates do NOT include TUOS, add on TUOS from Table 11)				

Notes on Tables:

- Volume is to be measured at each individual distribution network connection point.
- These tables do **NOT** include TUOS. Add TUOS from Table 11.
- Note that these Network Charges are shown for information only and are not available to customers at this time. These categories of network charges will become available with the introduction of Full Retail Competition on 1 July 2007.

13.6 **Table 11 – SACs < 100 MWh TUOS Prices - Volume Small [For Information Only]**

{These prices are GST Inclusive - to determine GST Exclusive divide by 1.1}

Table 11 - Transmission Use of System Charges for SAC Customers with Network Charge Categories of EVS or WVS.

Note: These Network Charges are shown for information only and are not available to customers at this time. These categories of network charges will become available with the introduction of Full Retail Competition on 1 July 2007.

14. STANDARD ASSET CUSTOMERS < 100 MWh Per Annum – CONTROLLED SUPPLIES

14.1 Definition

There are additional Network Price categories - Controlled Supplies that only apply to SAC < 100 MWh customers whose primary Network Price category is Volume Large or Volume Small and where specified permanently connected appliances are controlled by network equipment¹.

The additional categories that may be nominated by the customer or their ROC are:

- (i) **Volume Night - Controlled (EVN or WVN)** applies where specified permanently connected appliances are controlled by network equipment so that supply will be available for a minimum period of 8 hours at the discretion of Ergon Energy but usually between the hours of 10:00pm and 7:00am.
- (ii) **Volume Controlled (EVC or WVC)** applies where specified permanently connected appliances are controlled by network equipment so that supply will be available for a minimum period of 18 hours per day during time periods set at the discretion of Ergon Energy.

14.2 DUOS Prices

- (a) DUOS Network Prices are based on:
 - (i) the average of the connection charges and
 - (ii) the average of the shared distribution network charges.
- (b) DUOS Prices incorporate a Service Availability Charge (\$/month) and a Volume Charge (c/kWh).
- (c) The current approved DUOS rates for these additional categories for the East and West zones are published in Tables 12 and 13. These tables do **NOT** include TUOS.

Note that these Network Charges are shown for information only and are not available to customers at this time.

¹ A controlled load pricing option only applies where electricity load is to permanently connected appliances; separately metered and controlled at a supply point.

Switching times will be managed to minimise network investment and meet customer needs for the load being controlled.

For the suitability of appliances and other tariff conditions, reference should be made to the Queensland Government "Tariff Gazette" (http://www.nrme.qld.gov.au/energy/electricity/franchise_prices.html)

Volume Night – Controlled equates to Tariff 31 and Volume Controlled equates to Tariff 33 in the Queensland Government "Tariff Gazette".

14.3 TUOS Prices

- (a) TUOS charges are calculated and levied by Powerlink for each transmission connection point. Ergon Energy will combine rates in geographical regions and pass through TUOS charges to SACs < 100 MWh – Controlled Supplies thus providing an appropriate locational signal in each region.
- (b) TUOS prices for **Volume Night-Controlled** and **Volume Controlled** incorporate a Volume Charge (c/kWh) only.

To determine the total TUOS volume charge, the customer energy must be multiplied by the customer DLF and then applied to the TUOS c/kWh rate.

- (c) The current approved TUOS rates for **Volume Night-Controlled (EVN or WVN)** and **Volume Controlled (EVC or WVC)** categories are published in Table 14.

Note that these Network Charges are shown for information only and are not available to customers at this time.

14.4 Mt Isa

Network Prices for Mt Isa customers will not be published as the contestable electricity market will not be available in the Mt Isa zone.

14.5 Table 12 & 13 – SACs < 100 MWh DUOS Prices - Controlled Supplies **[For Information Only]**

Controlled Supplies are only available to customers whose primary Network Price category is EVL, EVS or WVL, WVS.

{These prices are GST Inclusive - to determine GST Exclusive divide by 1.1}

Table 12 - East Zone				
Distribution Use Of System (DUOS) Prices for Standard Asset Customers - Controlled Supplies				
(These tables do NOT include TUOS, add on TUOS from Table 14)				
Network Charge Category	Network Charge Description	Default Distribution Loss Factor	Service Availability Charge \$/month	Volume Charge c/kWh
EVC	Volume Controlled	1.103	\$2.310	1.2782
EVN	Volume Night - Controlled	1.103	\$2.310	0.1278

Table 13 - West Zone				
Distribution Use Of System (DUOS) Prices for Standard Asset Customers - Controlled Supplies				
(These tables do NOT include TUOS, add on TUOS from Table 14)				
Network Charge Category	Network Charge Description	Default Distribution Loss Factor	Service Availability Charge \$/month	Volume Charge c/kWh
WVC	Volume Controlled	1.229	\$2.970	3.7994
WVN	Volume Night - Controlled	1.229	\$2.970	0.2684

Notes on Tables:

- Volume is to be measured at each individual distribution network connection point.
- These tables do **NOT** include TUOS.
- Note that these Network Charges are shown for information only and are not available to customers at this time. These categories of network charges will become available with the introduction of Full Retail Competition on 1 July 2007.

15. STANDARD ASSET CUSTOMERS < 100 MWh Per Annum – UNMETERED SUPPLIES

15.1 Definition

Unmetered supplies should be avoided where possible; however, approval may be given at certain installations due to remoteness and/or excessive metering costs.

SACs – Unmetered Supplies are available to small uniform steady loads as approved by Ergon Energy:

- (a) where it is considered impractical to read or maintain a meter or where metering equipment would be susceptible to damage and includes, for example, public lamps, traffic signals, watchman lighting and temporary services;
- (b) not eligible to enter the contestable market until 1 July 2007

15.2 Assessment of Consumption

In cases such as rail crossing warning lights, intermittently operating traffic signals and loads of a similar nature, consumption will be billed as for existing standard installations.

Where a non standard installation is to be assessed, the load may be initially metered for a period sufficient to allow an average consumption to be calculated. The meters are then removed, but provision for reinstallation must remain.

In cases of fixed load, the assessed consumption may be calculated on the basis of the wattage rating of the installation multiplied by the hours of operation, and the initial metering can be avoided.

15.3 DUOS Prices

- (a) DUOS Network Prices are based on:
 - (i) the average of the connection charges and
 - (ii) the average of the shared distribution network charges.
- (b) DUOS Prices incorporate a Service Availability Charge (\$/month) and a Volume Charge (c/kWh).
- (c) The Network price category applicable to a customer will be as nominated by the customer or their ROC from among the following categories:
 - (i) **Unmetered Supply (EVU or WVU)** is applicable to unmetered supplies where the customer owns and maintains all assets after the customer's connection point to the network. These include installations such as Traffic Signals, temporary services, Rate 3 streetlights etc.
 - (ii) **Streetlights - minor (EL1 or WL1)** is applicable to unmetered public lighting where Ergon owns and maintains all assets after the customers connection point to the network.
 - Ergon standard minor public lights are 50, 80 and 125 watt Mercury Vapour and 70 watt High Pressure Sodium vapour lights

- Also includes any other non standard or obsolete public lights that would be replaced with any of the above Ergon standard minor public lights in accordance with Ergon Energy policy.
- (iii) **Streetlights** - major (**EL2 or WL2**) is applicable to unmetered public lighting and watchman lighting where Ergon owns and maintains all assets after the customers connection point to the network.
- Ergon standard major public lights are 100, 150, 250 and 400 watt High Pressure Sodium vapour lights
 - Also includes any other non standard or obsolete public lights that would be replaced with any of the above Ergon standard major public lights in accordance with Ergon Energy policy.
 - All watchman lights
- (d) The current approved DUOS rates for **Unmetered Supplies** for the East and West zones are published in Tables 15 and 16. These tables do **NOT** include TUOS.

Note that these Network Charges are shown for information only and are not available to customers at this time.

15.4 TUOS Prices

- (a) TUOS charges are calculated and levied by Powerlink for each transmission connection point. Ergon Energy will combine rates in geographical regions and pass through TUOS charges to SACs < 100 MWh - Unmetered Supplies thus providing an appropriate locational signal in each region.
- (b) TUOS prices incorporate a Volume Charge (c/kWh) only.
- To determine the total TUOS volume charge, the customer energy must be multiplied by the customer DLF and then applied to the TUOS c/kWh rate.
- (c) The current approved TUOS rates for **Unmetered Supplies (EVU or WVU, EL1 or WL1, EL2 or WL2)** categories are published in Table 14.

Note that these Network Charges are shown for information only and are not available to customers at this time.

15.5 Mt Isa

Network Prices for Mt Isa customers will not be published as the contestable electricity market will not be available in the Mt Isa zone.

15.6 **Table 15 & 16 – SACs < 100 MWh DUOS Prices - Unmetered Supplies [For Information Only]**

{These prices are GST Inclusive - to determine GST Exclusive divide by 1.1}

Table 15 - East Zone				
Distribution Use Of System (DUOS) Prices for Standard Asset Customers - Unmetered Supplies				
(These tables do NOT include TUOS, add on TUOS from Table 14)				
Network Charge Category	Network Charge Description	Default Distribution Loss Factor	Service Availability Charge \$/month	Volume Charge c/kWh
EVU	Unmetered Supply	1.103	\$4.290	4.7553
EL1	Streetlights - minor	1.103	\$7.480	4.7553
EL2	Streetlights - major	1.103	\$10.780	4.7553

Table 16 - West Zone				
Distribution Use Of System (DUOS) Prices for Standard Asset Customers - Unmetered Supplies				
(These tables do NOT include TUOS, add on TUOS from Table 14)				
Network Charge Category	Network Charge Description	Default Distribution Loss Factor	Service Availability Charge \$/month	Volume Charge c/kWh
WVU	Unmetered Supply	1.229	\$5.500	14.1372
WL1	Streetlights - minor	1.229	\$8.800	14.1372
WL2	Streetlights - major	1.229	\$13.200	14.1372

Notes on Tables:

1. Volume is to be measured at each individual distribution network connection point.
2. These tables do **NOT** include TUOS.
3. Note that these Network Charges are shown for information only and are not available to customers at this time. These categories of network charges will become available with the introduction of Full Retail Competition on 1 July 2007.

APPENDIX 2 – MATRIX OF TARIFF CODES TO NETWORK CHARGE CATEGORIES

MATRIX OF TARIFF CODES TO NETWORK CHARGE CATEGORIES									
Customer consumption per annum		0 to 26 MWh	26 MWh to 100 MWh	100 MWh to <4,000 MWh	100 MWh to <4,000 MWh	100 MWh to <4,000 MWh	100 MWh to <4,000 MWh	4,000 MWh to <40,000 MWh	> 40,000 MWh
Minimum chargeable demand		No Demand Charge	No Demand Charge	30 kW	120 kW	400 kW	400 kW	Authorised Demand as agreed	Authorised Demand as agreed
Metering Voltage level		Low Voltage	Low Voltage	Low Voltage	Low Voltage	Low Voltage	High Voltage	Low or High Voltage	Low or High Voltage
Queensland Tariff Code	Comments	Check in Appendix 1 if NMI has site-specific price, otherwise choose indicative applicable Network Charge Category from Matrix. Please refer to Ergon Energy Corporation Limited Network Price Book 2006-07 for further information.							
11		EVS or WVS	EVL or WWL	EDS or WDS	EDM or WDM	EDL or WDL			
20		EVS or WVS	EVL or WWL	EDS or WDS	EDM or WDM	EDL or WDL	EDH or WDH	Site specific charges - refer to Ergon Energy	Site specific charges - refer to Ergon Energy
21		EVS or WVS	EVL or WWL	EDS or WDS					
22		EVS or WVS	EVL or WWL	EDS or WDS	EDM or WDM	EDL or WDL	EDH or WDH	Site specific charges - refer to Ergon Energy	Site specific charges - refer to Ergon Energy
31	Only available with EVS, WVS, EVL and WWL	EVN or WVN	EVN or WVN	EDS or WDS	EDM or WDM				
33	Only available with EVS, WVS, EVL and WWL	EVC or WVC	EVC or WVC	EDS or WDS	EDM or WDM				
37		EVS or WVS	EVL or WWL	EDS or WDS	EDM or WDM	EDL or WDL	EDH or WDH	Site specific charges - refer to Ergon Energy	Site specific charges - refer to Ergon Energy
41				EDS or WDS	EDM or WDM	EDL or WDL	EDH or WDH	Site specific charges - refer to Ergon Energy	Site specific charges - refer to Ergon Energy
43						EDL or WDL	EDH or WDH	Site specific charges - refer to Ergon Energy	Site specific charges - refer to Ergon Energy
53							EDH or WDH	Site specific charges - refer to Ergon Energy	Site specific charges - refer to Ergon Energy
62		EVS or WVS	EVL or WWL	EDS or WDS	EDM or WDM	EDL or WDL			
63 (Obsolete)		EVS or WVS	EVL or WWL						
64 (Obsolete)		EVS or WVS	EVL or WWL						
65		EVS or WVS	EVL or WWL	EDS or WDS	EDM or WDM	EDL or WDL			
66		EVS or WVS	EVL or WWL	EDS or WDS	EDM or WDM	EDL or WDL			
67		EVS or WVS	EVL or WWL						
68		EVS or WVS	EVL or WWL	EDS or WDS	EDM or WDM	EDL or WDL			
71 - Rate 1	Public Lamps - All incandescent, fluorescent, 50, 80 & 125 W MV & 70W HPS	EL1 or WL1							
	Public Lamps - 100, 150, 250 & 400W HPS		EL2 or WL2						
71 - Rate 2	Public Lamps - All incandescent, fluorescent, 50, 80 & 125 W MV & 70W HPS	EL1 or WL1							
	Public Lamps - 100, 150, 250 & 400W HPS		EL2 or WL2						
71 - Rate 3	Public Lamps - All incandescent, fluorescent, 50, 80 & 125 W MV & 70W HPS	EVU or WVU							
	Public Lamps - 100, 150, 250 & 400W HPS		EVU or WVU						
81	Traffic Signals	EVU or WVU	EVU or WVU						
91	Watchman Service lighting - 100, 150, 250 & 400W HPS		EL2 or WL2						
20U- unmetered	Ergon tariff code	EVU or WVU	EVU or WVU						
21U- unmetered	Ergon tariff code	EVU or WVU	EVU or WVU
