Revision 4 Dated 12 June 2002

COUNTRY ENERGY NETWORK PRICE LIST EFFECTIVE 1 JULY 2001 (EXCLUDING GST) AMENDMENTS LIST

REVISION	DATE	AMENDMENT
1	3 January 2002	Initial issue of combined Country Energy Price List for the former NorthPower (Northern), Advance (Central) and Great Southern Energy (Southern) regions.
2	6 February 2002	1. Rationalise price list to a minimum of three (3) decimal places. 2. DLF code BS04 appeared twice in the original issue. 3. DLF codes BL24, BS00, BS02, BS06, BS91, BS92 added. 4. DLF codes BS07 deleted. 5. DLF code BH04 had been allocated the incorrect percentage of 9.25%. The correct percentage is 5.5%. 6. DLF code BL04 had been allocated the incorrect percentage of 8.75%. The correct percentage is 9.25%. 7. Other Fees and Charges added. 8. Key to Country Energy Network Tariff Codes added. 9. Key to Country Energy DLF Codes added. 10. BLNC1SU and BLNC1SR application changed from: "Supply will be made available for 9 hours per day on working week days and all hours on other days." To: "Supply will be made available for 7 to 9 hours overnight." 11. BLNC2SU, BLNC2SR, BLNC4SU, BLNC4SR, BLNC5SU and BLNC5SR application changed from: "Supply will be made available for 10-12 hours per day on working week days and all hours on other days." To: "Supply will be made available for 7 hours overnight with 5 hours daytime boost." 12. The Central Region Irrigation General Supply had been allocated the incorrect Tariff Code BLNN1CR. The correct Tariff Code is BLNN4CR. 13. The Central Region Irrigation TOU had been allocated the incorrect Tariff Code BLNT0CR. The correct Tariff Code is BLNT5CR.

REVISION	DATE	AMENDMENT
2 (cont)	6 February 2002	14. The Northern Region LV Business –TOU Urban had been allocated the incorrect Tariff Code BLNT1NU. The correct Tariff Code is BLNT2NU. 15. The Southern Region Urban Business –TOU had been allocated the incorrect Tariff Code BLNT1SU. The correct Tariff Code is BLNT2SU. 16. The Northern Region LV Business –TOU Non-Urban had been allocated the incorrect Tariff Code BLNT1NR. The correct Tariff Code is BLNT2NR. 17. The Southern Region Rural Business –TOU had been allocated the incorrect Tariff Code BLNT1SR. The correct Tariff Code is BLNT2SR. 18. BLNT1NO LV TOU Business is applicable to Urban and Non-Urban businesses. 19. The Southern Region Business –TOU had been allocated the incorrect Tariff Code BLNT2SU. The correct Tariff Code is BLNT1SU. 20. The Southern Region Rural Business –TOU had been allocated the incorrect Tariff Code BLNT2SR. The correct Tariff Code is BLNT1SR. 21. The Northern Region HV non-TOU Export had been allocated the incorrect Tariff Code BHNE3NO. The correct Tariff Code is BHNE1NO. 22. Tariff Codes BHNE3NO, BLNN2SM, BLNN2SP, BLNN2SQ, BLNN2ST, BLNN2SV, BLNN2SW, BLNN2SX, BLNN2SY, BLNN2SZ, BSS96NO, BSS97NO, BSS98NO, BSS99NO added. 23. Explanation of Southern Region Zones added.
3	22 February 2002	1. Northern Riverina Rural Residential Tariff allocated incorrect tariff code. Correct code BLNN2SZ. 2. References to NorthPower removed from Other Fees and Charges. 3. References to Northern and Southern Regions added for Other Fees and Charges. 4. Added Off Peak Conversion and Account Establishment Fees to Other Fees and Charges. 5. Other Fees and Charges added for Country Energy Central Region. 6. Table of Charges for Monopoly Services Associated with Contestable Work for Northern and Southern Regions added. 7. Table of Charges for Monopoly Services Associated with Contestable Work for Central Region added. 8. The Key to Country Energy Tariff Codes given in the price list is not applicable to Central Region. 9. Definition of Urban Tariff Customers and Rural Tariff Customers added. 10. BLNC4CO for Business Controlled Load One in the Central Region deleted. BLNC1CO Controlled Load One is applied to both Residential and Business Customers. 11. BLND1CU Business Demand TOU LV Central Region is applicable in urban areas only. 12. BHND1CU Business Demand TOU HV Central Region is applicable in urban areas only. 13. Application of BSSD1CO Demand Time of Use Sub-transmission amended. Connection is at 33kV, 66kV or above.

REVISION	DATE	AMENDMENT
3 (cont)	22 February 2002	14. Central Region Tariff Codes did not correlate with the codes in the NMI Discovery database. Tariff codes have been changed as listed below.

Tariff Code as published in Revision 2	New Tariff Code
BHND1CO	BHND1CU
BLNN1CO	BLNB2CB & BLNN1CB
BLNC5CO	BLNB2CO
BLNC1CO & BLNC4CO	BLNC1CO
BLND1CO	BLND1CU
BLNN4CR	BLNN1CO
BLNN2CR	BLNN1CR
BLNN2CU	BLNN1CU
BLNT0CO	BLNT1CB
BLNT5CR	BLNT1CO
BSS31CU	BSS01CU
BSS32CU	BSS02CU
BSS33CU	BSS03CU
BSS34CU	BSS04CU
BSS35CU	BSS05CU
BSS36CU	BSS06CU
BSS37CU	BSS07CU
BSS38CU	BSS08CU
BSS39CU	BSS10CU
BSS40CU	BSS11CU
BSS41CU	BSS12CU
BSS42CU	BSS13CU

4	12 June 2002	1 Network Access Charge Rates for the following tariff codes had quarterly values published instead of monthly values as their label suggested.
---	--------------	---

Tariff Code	Incorrect Rate as published in Revision 3	Correct Rate (Network Access Charge \$ / Month)
BLNN2SM	\$41.0920	\$13.6970
BLNN2SP	\$41.0920	\$13.6970
BLNN2SQ	\$20.6960	\$6.8990
BLNN2ST	\$41.0920	\$13.6970
BLNN2SV	\$25.6840	\$8.5613
BLNN2SW	\$24.3410	\$8.1138
BLNN2SX	\$10.2760	\$3.4252
BLNN2SY	\$32.6130	\$10.8711
BLNN2SZ	\$41.0920	\$13.6973
BLNT3SU	\$35.2365	\$11.7455
BLNT3SR	\$63.6880	\$21.2293

- 2 The Location description of tariff code BLNN2NR had the words "excluding Zone 2 Region C & Zone 3" added.
- 3 The Application description of tariff code BSSD1CO had the words "Connection is at 33kV, 66kV or above at the terminals..." changed to "Connection is at 11kV, 22kV or 33kV at the terminals..."
- 4 Tariff Codes BLNN2SP, BLNN2SQ, BLNN2ST, BLNN2SV, BLNN2SW, BLNN2SX, BLNN2SY and BLNN2SZ had block sizes added.

REVISION	DATE	AMENDMENT
4 (cont)	12 June 2002	5 The Central Urban Tariff Customer Definition has been incorrectly described. The definition which stated: "URBAN TARIFF CUSTOMER A customer will be classified as Urban for the application of Network prices if that customer's 415 LV supply is connected to the meshed interconnectable LV network allowing an alternative supply in the event of the failure of a transformer and is supplied from a Substation rated at 63kVA or greater" Has been replaced with: "URBAN TARIFF CUSTOMER A customer will be classified as Urban for the application of Network prices if that customer's connection is one that is located within the physical boundaries of a city, town or village and will generally be connected to a low voltage reticulation system. A low voltage reticulation system consists of more than twenty customers connected to a transformer." This definition was as appeared in the Advance Energy Network Price List Effective 1 July 2001. 6 The Central Rural Tariff Customer Definition has been incorrectly described. The definition which stated: "RURAL TARIFF CUSTOMER A customer will be classified as Rural for the application of Network prices if that customer's 415 LV supply connection does not meet the definition of an Urban customer." Has been replaced with: "RURAL TARIFF CUSTOMER A customer will be classified as Rural for the application of Network prices if that customer's connection is one located outside a city, town or village and not connected to a low voltage reticulation system. A low voltage reticulation system consists of more than twenty customers connected to a transformer." This definition was as appeared in the Advance Energy Network Price List Effective 1 July 2001. 7 The Southern Urban Tariff Customer Definition has been incorrectly described. The definition which stated: "URBAN TARIFF CUSTOMER A customer will be classified as Urban for the application of Network prices if that customer's 415 LV supply is connected to the meshed interconnectable LV network allowing an alternative supply in the event of the failure of a transformer and is supplied from a Substation rated at 63kVA or greater" Has been replaced with: "URBAN TARIFF CUSTOMER A customer will be classified as Urban for the application of Network prices if that customer's connection is connected to a 33kV distribution transformer. A 33kV Distribution Substation is considered a Zone Substation (for LV Demand customers only)." This definition was as appeared in the Great Southern Energy Network Price List Effective 1 July 2001.

REVISION	DATE	AMENDMENT
4 (cont)	12 June 2002	8 The Southern Rural Tariff Customer Definition has been incorrectly described. The definition which stated: "RURAL TARIFF CUSTOMER A customer will be classified as Rural for the application of Network prices if that customer's 415 LV supply connection does not meet the definition of an Urban customer. " The correct definition is as given in "RURAL PRICES AND LOSSES". This definition was as appeared in the Great Southern Energy Network Price List Effective 1 July 2001. 9 Replaced "SAC", "NAC", "Supply Availability Charge " and "Access Charge" with the words "Network Access Charge" to Integrate pre-existing descriptions from the former organisations using uniform terminology. 10 The Tariff Code assigned to site specific customer NFFFNRKD47 has been changed from BSSD1NO to tariff code BSSOBNO 11 The following codes were added to the Key to Country Energy Network Tariff Codes for Northern and Southern Regions - TOU Types: OB - Sub Transmission TOU 1 Rate Demand (Obsolete) D9 Demand and Capacity Code 12 The Tariff Code assigned to site specific customer NAAA000437 has been changed from BSS02CU to tariff code BSS04NO 13 BLNC4SU Southern Urban Business Controlled Load One and BLNC4SR Southern Rural Business Controlled Load One supply has been incorrectly described as available for 7 hours overnight. The supply will be made available for 7 - 9 hours overnight. 14 The Central Region Business Controlled Load Two had been allocated the incorrect Tariff Code BLNB2CO. The correct Tariff Code is BLNC5CO. 15 Tariff Codes BLNE1NU, BLNE1NQ, BLNC1NO, BLNC2NO, BLNC3NO, BLND3NR, BLNT1NU, BLNT1NR, BLNC4NO, BLNC5NO, BLNC6NO, BLNT3CU, BLNT3CR, BLNT4NU, BLNT4SU, BLNT4NR, BLNT4SR and BLNN2SR added. 16 Description of BLNP3NO, BLNP3CO & BLNP3SO varied so that they apply to all Unmetered Supplies. 17 Tariff Codes BLN03NO, BLN03CO & BLN03SO deleted. These Tariff Codes were for RTA Traffic Lights which are now incorporated into the General Unmetered Supply Tariffs BLNP3NO, BLNP3CO & BLNP3SO.

NETWORK PRICE LIST AND ACCESS CRITERIA EFFECTIVE 1 JULY 2001 EXCLUDES GST

1. COUNTRY ENERGY NETWORK USE OF SYSTEM PRICES 2001/2002

Transmission Loss Factors should be applied in addition to the distribution loss factors quoted throughout this document. Transmission loss factors vary depending on the customers Transmission Node Identifier (TNI). Loss factors for Country Energy transmission nodes are available on NEMMCO's website at www.nemmco.com.au

1.1 RESIDENTIAL NETWORK USE OF SYSTEM CHARGES

Tariff Code	BLNN2NU
Description:	Domestic – Non TOU
Type:	Residential
Urban/Non-urban	Urban
Location:	All Country Energy Northern Region
Billing/Meter Reading Frequency	2 monthly
Application:	To premises wholly used by a private residence and located within the inter-connected LV Distribution Network.
	Unit Rate
Network Access Charge \$ / Month	\$5.552
Energy c/kWh All Periods	5.216
Distribution Loss Factor %	8.380

Tariff Code	BLNN1CU
Description:	Domestic – Non TOU
Type:	Residential
Urban/Non-urban	Urban
Location:	All Country Energy Central Region
Billing/Meter Reading Frequency	2 or 3 monthly
Application:	To premises wholly used by a private residence and located within the inter-connected LV Distribution Network with more than 20 customers connected to a transformer.
	Unit Rate
Network Access Charge \$ / Day	\$0.1583
Energy c/kWh Flat rate	5.547
Distribution Loss Factor %	8.750

Tariff Code	BLNN2SU
Description:	Urban Residential
Type:	Residential
Urban/Non-urban	Urban
Location:	All Country Energy Southern Region
Billing/Meter Reading Frequency	3 monthly
Application:	To premises wholly used by a private residence and located within the inter-connected LV Distribution Network.
	Unit Rate
Network Access Charge \$ / Month	\$5.980
Energy c/kWh All Periods	3.940
Distribution Loss Factor %	7.600

Tariff Code	BLNN2NQ
Description:	Domestic – Non TOU
Type:	Residential
Urban/Non-urban	Non-Urban
Location:	Country Energy Northern Region Zone 2 Region C & Zone 3
Billing/Meter Reading Frequency	2 monthly
Application:	To premises wholly used by a private residence and located outside the inter-connected LV Distribution Network.
	Unit Rate
	Zone 2 Region C & Zone 3
Network Access Charge \$ / Month	\$11.567
Energy c/kWh All Periods	6.548
Distribution Loss Factor %	16.110

Tariff Code	BLNN2NR
Description:	Domestic – Non TOU
Type:	Residential
Urban/Non-urban	Non-Urban
Location:	All Country Energy Northern Region excluding Zone 2 Region C & Zone 3
Billing/Meter Reading Frequency	2 monthly
Application:	To premises wholly used by a private residence and located outside the inter-connected LV Distribution Network excluding Zone 2 Region C & Zone 3.
	Unit Rate
Network Access Charge \$ / Month	\$6.660
Energy c/kWh All Periods	6.548
Distribution Loss Factor %	16.110

Tariff Code	BLNN1CR
Description:	Non TOU Domestic
Type:	Domestic
Urban/Non-urban	Non-Urban
Location:	All Country Energy Central Region
Billing/Meter Reading Frequency	3 monthly
Application:	Available for all consumption in rural premises used wholly or principally as private dwellings. A private dwelling is a house, flat or similar premises.
	Unit Rate
Network Access Charge \$ / Day	\$0.4371
Energy c/kWh Flat Rate	6.095
Distribution Loss Factor %	17.500

Tariff Code	BLNN2SR
Description:	Rural Residential
Type:	Residential
Urban/Non-urban	Non- Urban
Location:	Country Energy Southern Region This Rural Residential Tariff will apply to all new Southern Region Rural Residential customers and any that are not in the areas covered by codes BLNN2SM, BLNN2SP, BLNN2SQ, BLNN2ST, BLNN2SV, BLNN2SW, BLNN2SX, BLNN2SY and BLNN2SZ.
Billing/Meter Reading Frequency	3 monthly
Application:	Available for all consumption in rural premises used wholly or principally as private dwellings. A private dwelling is a house, flat or similar premises.
	Unit Rate
Network Access Charge \$ / Month	\$5.1326
Energy c/kWh Block 1 Block 1 = 1st 3.28 kWhs / day	15.140
Energy c/kWh Block 2 Block 2 = the next 13.15kWhs / day	5.463
Energy c/kWh Block 3 Block 3 = all remaining kWhs / day	6.330
Distribution Loss Factor %	15.700

Tariff Code	BLNN2SM
Description:	Rural Residential
Type:	Residential
Urban/Non-urban	Non- Urban
Location:	Country Energy Southern Region Southern Riverina Zone 1 Refer explanatory notes for towns in this area
Billing/Meter Reading Frequency	3 monthly
Application:	Available for all consumption in rural premises used wholly or principally as private dwellings. A private dwelling is a house, flat or similar premises.
	Unit Rate
Network Access Charge \$ / Month	\$13.697
Energy c/kWh All Periods	6.950
Distribution Loss Factor %	15.700

Tariff Code	BLNN2SP
Description:	Rural Residential

Tariff Code	BLNS1NO
Description:	LV TOU Seasonal Demand
Type:	Business
Urban/Non-urban	Both
Location:	All Country Energy Northern Region
Billing/Meter Reading Frequency	Monthly
Application:	This tariff is available to customers with a minimum on-season anytime Demand of 1500kVA and a load factor for at least 4 months of the year of better than 60%. Demand Charges will be calculated as follows: 1. The daily kVA maximum demand in each of the Peak, Shoulder, and Off Peak periods will be metered for each day of the month. 2. The metered kVA Demand for each day for each of the Peak, Shoulder and Off Peak periods will be summed for the month and divided by the number of days in the month when the load occurs. This means that Peak and Shoulder Demand will be divided by the number of weekdays excluding public holidays. Off Peak Demand will be divided by the total number of days. 3. The average TOU Demand calculated above will be multiplied by the TOU Demand rates.
	Unit Rate
Network Access Charge \$ / Month	\$131.270
Demand Charge Peak / kVA / Month	\$4.810
Demand Charge Shoulder/ kVA / Month	\$4.090

NETWORK PRICE LIST OTHER FEES AND CHARGES EFFECTIVE 1 JULY 2001

2. OTHER FEES AND CHARGES NORTHERN AND SOUTHERN REGIONS

2.1 SPECIAL METER READING FEE

When a special meter reading is requested by a customer, other than a check reading in relation to a disputed ordinary account or upon the termination of the occupancy of the premises by the customer, an appropriate fee will be charged.

The meter reading will generally be carried out during normal working hours.

Amount of fee: In normal working hours \$30-00 excluding GST, \$33-00 including GST

Outside normal working hours \$75-00 excluding GST, \$82-50 including GST

2.2 DISCONNECTION VISIT FEE

This charge applies to the cost of a visit by Country Energy staff with the specific intent to disconnect a customer at the time of the visit.

The visit to the customer with the intent of disconnection can only occur once the provisions of the Electricity Supply (General) Regulation 1996 (Schedule 2, Part 4, Division 2, Clause 40) with respect to the disconnection of customers have been completed in full.

The Disconnection Visit fee may be levied only in circumstances where:

1. The customer has been warned of impending disconnection by issue of a late payment reminder notice. This notice must clearly provide information to customers regarding financial assistance available, particularly through the Energy Account Payment Assistance (EAPA) scheme. Subject to the rules applicable to Late Payment charges, the \$5.00 excluding GST, \$5.50 Including GST. Late Payment charge may be levied for this notice.
2. Country Energy has sent to the customer at least 2 written notices of Country Energy's intention to disconnect, the second notice to be sent no earlier than one week after the first notice.
3. Country Energy has made and documented reasonable attempts to deal with the customer in person or by telephone, whether before or after sending any disconnection notice, for the purpose of assisting the customer to do whatever is necessary to remove the grounds referred to in that notice.
4. Having completed this process, a Country Energy representative visits the customer personally with an intention to disconnect. The Tribunal considers it important that the customer be given the opportunity to make an acceptable payment on the account before a Personal Visit fee is levied. At the time of the personal visit, the customer may avoid disconnection by making an acceptable payment on the account (not necessarily the full outstanding balance).

If an acceptable payment is received, and the Country Energy representative does not proceed with disconnection, Country Energy may charge the \$30 excluding GST, \$33.00 including GST, Personal Visit fee. In cases where the customer does not make an acceptable payment and disconnection proceeds, Country Energy may charge the \$60 excluding GST, \$66.00 including GST, Personal Visit fee. This also covers the cost of a second visit to reconnect the customer. If the customer makes an acceptable payment on the overdue account, and pays the \$60 excluding GST, \$66.00 including GST disconnection visit charge, during normal business hours, then the customer is entitled to be reconnected that day at no extra cost; that is, no after hours fees can be charged for the reconnection. A collection fee is charge for all accounts when a Country Energy collector or agent endeavours to collect an overdue account payment. This fee may not exceed the maximum allowable as determined by the appropriate government regulator.

Amount of fee: **\$30-00 excluding GST, \$33.00 including GST when collection involves site visit and a satisfactory arrangement to pay is negotiated with the customer, or**

\$60-00 excluding GST, \$66.00 including GST where an acceptable payment is not received and supply is disconnected

\$100-00 excluding GST, \$110-00 including GST where disconnection occurs at a pole top/pillar box and meter disconnection

2.3 METER TEST FEE

Any customer applying for a meter test must, before any test is made, pay a meter fee to cover the cost of the test. The fee will be returned to the customer if the meter is found to be registering incorrectly as defined by the franchise customer metering code. Any account in dispute must be paid in full before the meter is tested.

This fee may not exceed the maximum allowable as determined by the appropriate government regulator.

Amount of fee: **\$50-00 excluding GST, \$55.00 including GST per meter tested.**

2.4 RECTIFICATION OF ILLEGAL CONNECTION

When rectification to Country Energy owned equipment is needed following an illegal reconnection of supply by a customer, an appropriate fee will be charged.

Amount of fee: **Normal Business Hours \$150-00 excluding GST, \$165-00 including GST**

Outside Normal Business Hours \$475-00 excluding GST, \$522-50 including GST

2.5 CONVEYANCING INQUIRY

When information is required by a customer in response to an enquiry relating to conveyancing activity, an appropriate fee will be charged.

Amount of fee: **Desk enquiry \$25-00 excluding GST, \$27-50 including GST**

Field visit \$50-00 excluding GST, \$55-00 including GST

Total \$75-00 excluding GST, \$82-50 including GST

2.6 PROVISION OF TIME OF USE OR HALF HOURLY METERING DATA (PER HALF HOUR)

When information is required by a customer in response to an enquiry relating to the provision of time of use or half hourly metering data, an appropriate fee will be charged.

Amount of fee: **\$25-00 excluding GST, \$27-50 including GST**

2.7 ACCOUNT ESTABLISHMENT FEE

The Account Establishment fee is to cover the costs of establishing a new customer in its records, including but not limited to recording the initial meter readings and reconnecting supply (if it has been temporarily disconnected)

Amount of fee: In normal working hours \$35-00 excluding GST, \$38.50 including GST

Outside normal working hours \$87-50 excluding GST, \$96-25 including GST

2.8 TRANSFER BETWEEN TARIFFS AND OTHER PRODUCTS (OFF PEAK CONVERSION)

Where it is known that a different tariff becomes applicable due to an alteration in the use of electricity in a premises, the tariff may be changed subject to the approval of Country Energy.

Where a customer requests a change in product option then a changeover fee may become applicable. Typically this applies to optional controlled load products.

Customers will be allowed to change their off-peak pricing option once in a 12 month period at no cost. Should the customer request a further change in off-peak pricing option within that 12 month period then this fee will apply.

This charge does not cover repairs to damaged metering or time control equipment.

Amount of fee: In normal working hours \$40-00 excluding GST, \$44-00 including GST

Outside normal working hours \$100-00 excluding GST, \$110-00 including GST

2.9 CHARGES FOR MONOPOLY SERVICES ASSOCIATED WITH CONTESTABLE WORK

Notes:

- Level of inspection determined prior to commencement of job and based on grade of accredited service provider.
- \$600 for a simple substation (single transformer/RMI unit) other at hourly rate including setting/re-setting protection equipment.
- Where individual service connections are required for multiple dwelling subdivisions, the per lot fee should be applied per service connection.
- Inspections are based on 3 visits. Substation poles are not included.
The inspection for substation poles is:
 - A Grade – 3.5 hours @ R2;
 - B Grade – 7.0 hours @ R2;
 - C Grade – 9.0 hours @ R2.
- Hourly rate to be determined based on complexity of the job.

Hourly Labour Rates Applicable to Monopoly Services:

Labour Class	Hourly Rate
Admin R1	\$44.00
Design R2a	\$54.00
Inspector R2b	\$54.00
Engineer R3	\$65.00

- All Monopoly Fees are subject to the GST of 10%.
- Effective 1 February 2000.

All Monopoly Fees are subject to the GST of 10%.

Effective 1 February 2000.

3. OTHER FEES AND CHARGES CENTRAL REGION

3.1 SPECIAL METER READING FEE

When a special meter reading is requested by a customer, other than a check reading in relation to a disputed ordinary account or upon the termination of the occupancy of the premises by the customer, an appropriate fee will be charged.

The meter reading will generally be carried out during normal working hours.

Amount of fee: In normal working hours \$29.90 excluding GST, \$32.89 including GST

Outside normal working hours \$74.75 excluding GST, \$82.23 including GST

3.2 DISCONNECTION VISIT FEE

This charge applies to the cost of a visit by Country Energy staff with the specific intent to disconnect a customer at the time of the visit.

The visit to the customer with the intent of disconnection can only occur once the provisions of the Electricity Supply (General) Regulation 1996 (Schedule 2, Part 4, Division 2, Clause 40) with respect to the disconnection of customers have been completed in full.

The Disconnection Visit fee may be levied only in circumstances where:

1. The customer has been warned of impending disconnection by issue of a late payment reminder notice. This notice must clearly provide information to customers regarding financial assistance available, particularly through the Energy Account Payment Assistance (EAPA) scheme. Subject to the rules applicable to Late Payment charges, the \$5.00 excluding GST, \$5.50 Including GST. Late Payment charge may be levied for this notice.
2. Country Energy has sent to the customer at least 2 written notices of Country Energy's intention to disconnect, the second notice to be sent no earlier than one week after the first notice.
3. Country Energy has made and documented reasonable attempts to deal with the customer in person or by telephone, whether before or after sending any disconnection notice, for the purpose of assisting the customer to do whatever is necessary to remove the grounds referred to in that notice.
4. Having completed this process, a Country Energy's representative visits the customer personally with an intention to disconnect. The Tribunal considers it important that the customer be given the opportunity to make an acceptable payment on the account before a Personal Visit fee is levied. At the time of the personal visit, the customer may avoid disconnection by making an acceptable payment on the account (not necessarily the full outstanding balance).

If an acceptable payment is received, and the Country Energy representative does not proceed with disconnection, Country Energy may charge the \$30 excluding GST, \$33.00 including GST, Personal Visit fee. In cases where the customer does not make an acceptable payment and disconnection proceeds, Country Energy may charge the \$60 excluding GST, \$66.00 including GST, Personal Visit fee. This also covers the cost of a second visit to reconnect the customer. If the customer makes an acceptable payment on the overdue account, and pays the \$60 excluding GST, \$66.00 including GST disconnection visit charge, during normal business hours, then the customer is entitled to be reconnected that day at no extra cost; that is, no after hours fees can be charged for the reconnection. A collection fee is charge for all accounts when a Country Energy collector or agent endeavours to collect an overdue account payment. This fee may not exceed the maximum allowable as determined by the appropriate government regulator.

Amount of fee: \$29.90 excluding GST, \$32.89 including GST when collection involves site visit and a satisfactory arrangement to pay is negotiated with the customer, or

\$59.80 excluding GST, \$65.78 including GST where an acceptable payment is not received and supply is disconnected

\$99.67 excluding GST, \$109.64 including GST where disconnection occurs at a pole top/pillar box and meter disconnection

3.3 METER TEST FEE

Any customer applying for a meter test must, before any test is made, pay a meter fee to cover the cost of the test. The fee will be returned to the customer if the meter is found to be registering incorrectly as defined by the franchise customer metering code. Any account in dispute must be paid in full before the meter is tested.

This fee may not exceed the maximum allowable as determined by the appropriate government regulator.

Amount of fee: In normal working hours \$49.84 excluding GST, \$54.82 including GST per meter tested.

Outside normal working hours \$124.59 excluding GST, \$137.05 including GST per meter tested.

3.4 RECTIFICATION OF ILLEGAL CONNECTION

When rectification to Country Energy owned equipment is needed following an illegal reconnection of supply by a customer, an appropriate fee will be charged.

Amount of fee: Normal Business Hours \$149.51 excluding GST, \$164.46 including GST

Outside Normal Business Hours \$473.45 excluding GST, \$520.80 including GST

3.5 CONVEYANCING INQUIRY

When information is required by a customer in response to an enquiry relating to conveyancing activity, an appropriate fee will be charged.

Amount of fee: Desk enquiry \$24.92 excluding GST, \$27.41 including GST

Field visit \$49.84 excluding GST, \$54.82 including GST

Total \$74.75 excluding GST, \$82.23 including GST

3.6 PROVISION OF TIME OF USE OR HALF HOURLY METERING DATA (PER HALF HOUR)

When information is required by a customer in response to an enquiry relating to the provision of time of use or half hourly metering data, an appropriate fee will be charged.

Amount of fee: \$24.92 excluding GST, \$27.41 including GST

3.7 ACCOUNT ESTABLISHMENT FEE

The Account Establishment fee is to cover the costs of establishing a new customer in its records, including but not limited to recording the initial meter readings and reconnecting supply (if it has been temporarily disconnected)

Amount of fee: In normal working hours \$34.89 excluding GST, \$38.38 including GST

Outside normal working hours \$87.21 excluding GST, \$95.93 including GST

3.8 TRANSFER BETWEEN TARIFFS AND OTHER PRODUCTS (OFF PEAK CONVERSION)

Where it is known that a different tariff becomes applicable due to an alteration in the use of electricity in a premises, the tariff may be changed subject to the approval of Country Energy.

Where a customer requests a change in product option then a changeover fee may become applicable. Typically this applies to optional controlled load products.

Customers will be allowed to change their off-peak pricing option once in a 12 month period at no cost. Should the customer request a further change in off-peak pricing option within that 12 month period then this fee will apply.

This charge does not cover repairs to damaged metering or time control equipment.

Amount of fee: In normal working hours \$39.87 excluding GST, \$43.86 including GST

Outside normal working hours \$99.67 excluding GST, \$109.64 including GST

3.9 CHARGES FOR MONOPOLY SERVICES ASSOCIATED WITH CONTESTABLE WORK

Notes:

1. Level of inspection determined prior to commencement of job and based on grade of accredited service provider.
2. \$598.04 for a simple substation (single transformer/RMI unit) other at hourly rate including setting/re-setting protection equipment.
3. Where individual service connections are required for multiple dwelling subdivisions, the per lot fee should be applied per service connection.
4. Inspections are based on 3 visits. Substation poles are not included.
The inspection for substation poles is:
 - A Grade – 3.5 hours @ R2;
 - B Grade – 7.0 hours @ R2;
 - C Grade – 9.0 hours @ R2.
5. Hourly rate to be determined based on complexity of the job.

Hourly Labour Rates Applicable to Monopoly Services:

Labour Class	Hourly Rate
Admin R1	\$43.86
Design R2a	\$53.82
Inspector R2b	\$53.82
Engineer R3	\$64.79

6. All Monopoly Fees are subject to the GST of 10%.
7. Effective 1 February 2000.

NETWORK PRICE LIST EXPLANATORY NOTES NORTHERN REGION EFFECTIVE 1 JULY 2001

7. APPLICABILITY OF NETWORK CHARGES – NORTHERN REGION

7.1 CHOICE OF NETWORK CHARGES

Contestable customers may transfer from Transitional Rates to either the LV Demand Option 1 price, the LV Demand Option 2 or the LV TOU price at any time provided such a request is received in writing from the customer's Retailer of Choice. The LV TOU price is not available to customers whose consumption exceeds 750 MWh per year. It is a matter for the Retailer of Choice to determine the most economical choice between the LV Demand Option 1 and LV Demand Option 2 and LV TOU prices. The LV Demand Option 1 rates are most likely to be more economical for customers with higher load factors whilst LV Demand Option 2 and LV TOU prices are most likely to be more economical for customers with lower load factors.

Such transfers from Transitional rates will apply from the beginning of month following the month in which written advice is received and will not be made retrospective. Only one price change per 12 months will be permitted after the transition period.

7.2 MID-MONTH CHANGE OF RETAILER OF CHOICE

Where customers change their Retailer Of Choice in the middle of a calendar month, network bills will be allocated between the Retailers on a pro-rata basis depending on the number of days of the month that the customer was contracted with each Retailer.

7.3 REDUCED SUPPLY AVAILABILITY CHARGE

For Customers whose consumption exceeds 100MWh per year, who have hot water, process heating or any other approved circuits which are controlled by Country Energy to reduce demand on its feeders, a 20 percent reduction in the Supply Availability Charge is available. These circuits will not be separately metered and the reduced S.A.C will be applicable when the Customer agrees to allow Country Energy to control these loads.

7.4 SUPPLY TO LOW LOAD FACTOR CUSTOMERS:

Where a customer's annual load factor at a point of supply is less than 10%, the chargeable demand may be based upon an assessment of the capacity provided.

7.5 STANDBY SUPPLY

Where customers such as embedded generators require standby supply, the network charges applicable will be negotiated on the basis of the assets involved and the frequency and duration of use of the standby supply.

8. DEFINITIONS

PEAK PERIOD is from 7.00 am to 9.00 am and 5.00 pm to 8.00 pm on working weekdays.

SHOULDER PERIOD is from 9.00 am to 5.00 pm and 8.00 pm to 10.00 pm on working weekdays.

OFF-PEAK PERIOD is at all other times.

All times are Eastern Standard Time and Eastern Daylight Saving Time as appropriate.

SUPPLY VOLTAGES Country Energy reserves the right to determine the voltage at which supply shall be made available to any particular Customer. The general voltage levels referred to in the prices are:

Low Voltage (LV)	nominally 240/415V
High Voltage (HV)	nominally 11 or 22kV
Subtransmission (ST)	33kV and above.

DISTRIBUTION AND TRANSMISSION LOSS FACTORS This factor is used in the market settlements process to increase the energy consumed by the customer by the average energy lost in the distribution network. The distribution loss factor does not include the Transmission Loss Factor. Transmission loss factors for NSW connected customers vary depending on the customers Transmission Node Identifier (TNI). Loss factors for Country Energy transmission nodes are available on NEMMCO's website at www.nemmco.com.au

SERVICE AVAILABILITY CHARGE (SAC) This is a fixed charge applied to each position at which Country Energy's energy or demand/ energy metering equipment/ CTs are installed. For summated metering only one SAC is applied per site.

TIME OF USE (TOU) RATES With a time of use meter installed, the energy is charged according to peak, shoulder and off-peak time periods.

NON-TOU RATES The Non Time of Use charge (in ¢/kWh) is applied to the total energy determined from the meter.

DEMAND The Demand charge (\$/kVA/month) is applied to the calendar monthly kVA demand measured by the meter for the peak, shoulder and off peak periods. The monthly kVA demand is the maximum half hour demand for the month occurring within the peak, shoulder and off peak periods and is calculated using the kWh and kVARh energy components recorded by the Code compliant meter. The method of demand measurement is 30 minute clocked. LV TOU Seasonal Demand and HV TOU Seasonal Demand tariffs are exceptions to this description. Demand charges for these tariffs are calculated as set out in the tariff description.

URBAN TARIFF CUSTOMER A customer will be classified as Urban for the application of Network prices if that customer's 415 LV supply is connected to the meshed interconnectable LV network allowing an alternative supply in the event of the failure of a transformer and is supplied from a Substation rated at 63kVA or greater.

RURAL TARIFF CUSTOMER A customer will be classified as Rural for the application of Network prices if that customer's 415 LV supply connection does not meet the definition of an Urban customer.

Zone 1 Region C- Supply to this zone is covered by the following regional post codes.

Bulahdelah-2423, Cessnock-2325, Dungog-2420, East Gresford-2311, Gloucester-2422, Maitland-2320, Maitland Far West District-2321, Mount George-2424, Nabadac-2312, Newcastle Far West District-2301, Paterson-2421, Raymond Terrace-2324, Stroud Road-2415, Stroud-2425.

Zone 2 Region C- Supply to this zone is covered by the following regional post codes.

Armidale-2350, Bendemeer-2352, Black Mountain-2365, Ebor-2453, Guyra-2365, Uralla-2358, Walcha-2354

Zone 3- Supply to this zone is covered by the following regional post codes.

Bellata-2397, Boggabri-2382, Bourke-2840, Breeza-2381, Brewarrina-2839, Burren Junction-2386, Carinda-2831, Caroona-2343, Carroll-2340, Collarenebri-2833, Gunnedah-2380, Gwabegar-2356, Lightning Ridge-2834, Mullaley-2379, Narrabri-2390, Rowena-2387, Walgett-2832, Wee Waa-2388

NETWORK PRICE LIST ENQUIRIES These can be directed to our Customer Service Centre, telephone 13 23 56.

NETWORK PRICE LIST EXPLANATORY NOTES CENTRAL REGION EFFECTIVE 1 JULY 2001

9. CENTRAL REGION

FRANCHISE CUSTOMERS Franchise network prices are applicable to customers who have not been declared non-franchise in accordance with an Order under Section 92 of the New South Wales Electricity Supply Act 1995 and are not eligible to enter the contestable electricity market.

The network use of system prices are exclusive of the 10% Goods and Services Tax.

The Electricity Distributor Levy is not included. The New South Wales Government has suspended the Electricity Distributor Levy from 1 July 2001.

The price categories are relevant to franchise customers (not yet declared non-franchise) only to the extent that the prices shown establish the portion of retail tariffs which are allocated to network services. Until such time as customers become non-franchise, franchise customers will be billed according to Country Energy Central Region's published Retail Price List. Franchise customers are referred to the Retail Price List for all electricity charges in the interim.

DECLARED NON-FRANCHISE Available to all customers connected to the Country Energy Central Region network who have been declared non-franchise in accordance with an Order under Section 92 of the New South Wales Electricity Supply Act 1995.

The network use of system prices are exclusive of the 10% Goods and Services Tax.

The Network Usage Rates do not include the Electricity Distributor Levy. The New South Wales Government has suspended the Electricity Distributor Levy from 1 July 2001.

All customers entering the 750 MWh tranche of the contestable electricity market will automatically be charged the appropriate Demand Time of Use network price according to the voltage or point of network connection. The Time of Use network price is not available to customers whose consumption exceeds 750 MWh per annum.

All customers entering the 160 and 100 MWh tranche of the contestable electricity market who were formerly on a franchise Business Demand Time of Use price will automatically be charged the Low Voltage Demand Time of Use network price. Customers who were formerly on a franchise Business Time of Use price will automatically be charged the Business Time of Use network price. The customer or the customer's Retailer of Choice is encouraged to apply for the most economical choice between the Time of Use and the Demand Time of Use network price for the customer's connected load.

All other customers entering the contestable electricity market will normally be transferred to the appropriate network price reflecting the customer's previous regulated retail tariff.

10. EXPLANATORY NOTES

DOMESTIC Available for all consumption in urban premises used wholly or principally as private dwellings. A private dwelling is a house, flat, home unit, town house or similar premises and includes boarding houses, churches, the residential sections of nursing homes, hospitals and educational institutions, and approved caravan parks.

An urban connection is one that is located within the physical boundaries of a city, town or village and will generally be connected to a low voltage reticulation system. A low voltage reticulation system consists of more than twenty customers connected to a transformer.

RURAL DOMESTIC Available for all consumption in rural premises used wholly or principally as private dwellings. A private dwelling is a house, flat or similar premises.

A rural service is one located outside a city, town or village and not connected to a low voltage reticulation system. A low voltage reticulation system consists of more than twenty customers connected to a transformer.

CONTROLLED LOAD Applicable to electricity used for operating storage water heaters, thermal storage space heaters, and other approved appliances.

The Controlled Load Off-Peak 1 applies where specific appliances are controlled by Country Energy Central Region's equipment so that supply is generally available between 10.00 pm and 7.00 am on working weekdays plus all weekends and public holidays. The Controlled Load Off-Peak 2 applies where approved specific appliances are controlled by Country Energy Central Region's equipment so that electricity is available for restricted periods not exceeding 17 hours in any period of 24 hours. Country Energy Central Region reserves the right to vary these times to suit network conditions without affecting the customer's usage of the appliances. The load control receiver remains the property of Country Energy Central Region.

When a customer with controlled load enters the contestable electricity market, the controlled load meter will be removed and this load will be charged at the same price as the principal tariff of the premises. The customer for economic reasons may wish to consider the retention of the load control receiver.

BUSINESS GENERAL SUPPLY (NON-TIME OF USE) Available for low voltage electricity supplied to premises for any purpose. This price is generally applicable to factories, warehouses, hotels, motels, shops, offices, schools, sporting and social clubs.

BUSINESS TIME OF USE Available for the same purposes as the Business General Supply price. This option enables financial benefits for controlled usage at predetermined time periods as listed below.

Peak period	7.00 am to 9.00 am and 5.00 pm to 8.00 pm on working weekdays.
Shoulder period	9.00 am to 5.00 pm and 8.00 pm to 10.00 pm on working weekdays.
Off-Peak period	All other times.

IRRIGATION GENERAL SUPPLY Available for electricity supplied to a rural property for water storage or irrigation purposes.

IRRIGATION TIME OF USE Available for the same purposes as the Irrigation General Supply price. This option enables financial benefits for controlled usage at predetermined time periods as listed below.

Peak period	7.00 am to 9.00 am and 5.00 pm to 8.00 pm on working weekdays.
Shoulder period	9.00 am to 5.00 pm and 8.00 pm to 10.00 pm on working weekdays.
Off-Peak period	All other times.

DEMAND TIME OF USE This category generally provides for larger business uses. The charges include a monthly maximum demand charge. The maximum demand is metered on a half-hour basis in kVA, which reflects the customer's power factor. Cost savings may be achieved through the installation of power factor equipment to minimise the kVA Demand. There are three Demand Time of Use prices according to the voltage and point of connection within the network.

Low Voltage	Connection is at 240/415 volts.
High Voltage	Connection is at 11, 22 or 33 kV.
Subtransmission	Connection is at 11, 22 or 33 kV at the terminals of a subtransmission substation or through assets contributed by the customer and dedicated to supplying the customer.

Country Energy Central Region reserves the right to determine the voltage at which supply shall be made available to any particular customer.

Customers should formally notify Country Energy Central Region Networks when there is an anticipated change in demand at their site, for example where plant or apparatus is being commissioned or undergoing tests or where load is being transferred or rearranged.

There is no minimum chargeable demand for Country Energy Central Region's Demand Time of Use network prices.

LOCATION SPECIFIC (CRNP) A locational specific network price will be negotiated with a contestable customer where:

1. The customer is connected at subtransmission voltages (66 or 132 kV), or
2. The customer is connected to the terminals of a subtransmission substation and has contributed discretely to the cost of the subtransmission system supplying the customer, or

CRNP is a procedure of allocating networks costs in accordance with National Grid protocols. On achieving eligibility a customer will receive the CRNP price. These customers will be subject to individual price formulation based on the CRNP methodology. Country Energy Central Region's "Network Pricing Information Guide" provides more details of the methodology.

Customers not eligible for a CRNP tariff will receive the standard network price.

SUPPLY TO LOW LOAD FACTOR CUSTOMERS Where a customer's annual load factor (average load divided by maximum load) at a point of supply is less than 15%, the chargeable demand will be based on an assessment of the capacity provided.

DEFAULT SUPPLY (SUPPLIER OF LAST RESORT) Available to customers who have been declared non-franchise under a Section 92 Order and who have not contracted for supply of electricity from a retailer. Where a customer falls into this category, the charges for supply of electricity will be the applicable published franchise retail tariff or the pool price plus a margin whichever is the greater. This is in accordance with the Electricity Association of New South Wales "Last Resort Supply" Code of Practice and Country Energy Central Region's Standard Form Customer Connection Contract.

MID-MONTH CHANGE OF RETAILER OF CHOICE Where customers change their Retailer of Choice in the middle of a calendar month, network bills will be allocated between the Retailers on a pro-rata basis depending on the number of days of the month that the customer was contracted with each Retailer.

TRANSITIONAL NETWORK PRICES Transitional network prices will not be available after 30 June 2001.

11. DEFINITIONS

DECLARED NON-FRANCHISE The "Declared Non-Franchise" categories are applicable to all customers declared "Non-Franchise" by virtue of an order in force under Section 92 of the Electricity Supply Act 1995 and are inclusive of the NSW Electricity Distributor Levy.

VOLTAGES OF SUPPLY Country Energy Central Region reserves the right to determine the voltage at which supply shall be made available to any particular customer based on the size and nature of the load to be connected. The general voltage levels referred to in the Network Price List are:

Low Voltage	nominally 240/415 volt
High Voltage	nominally 11, 22 or 33 kV
Sub-transmission	66 or 132 kV

NETWORK ACCESS CHARGE This is a fixed charge applied to each point of connection at which energy or demand is measured reflecting the fixed nature of network operational and asset related costs. A separate Network Access Charge will apply to each National Market Identifier (NMI) as defined in the NEMMCO "NMI Procedure" document ME_GN059 for the configuration of metering at a given site. The Network Access Charge has been altered to a daily rate in order to facilitate customer transfers under full retail competition.

NON TOU NETWORK USAGE RATES The Non Time of Use charge (c/kWh) is applied to the total energy determined from an energy only meter.

OPERATING TIMES FOR PEAK, SHOULDER AND OFF-PEAK NETWORK USAGE RATES Country Energy Central Region's application of its prices for peak, shoulder and off-peak periods shall be based on the following time periods.

Peak period	7.00 am to 9.00 am and 5.00 pm to 8.00 pm on working weekdays.
Shoulder period	9.00 am to 5.00 pm and 8.00 pm to 10.00 pm on working weekdays.
Off-Peak period	All other times.

All times are Eastern Standard Time and Eastern Daylight Saving Time as appropriate.

DEMAND ALL PERIODS The Demand Charge (\$/kVA) is applied to the monthly kVA demand measured by the meter located at each connection point. The monthly kVA demand is the maximum half-hour demand in the month and is calculated using the kWh and kVAh energy components recorded by the National Electricity Code compliant meter.

The method of demand measurement is 30 minute clocked interval.

A monthly period is defined as the period of approximately one month between consecutive readings of the metering equipment.

A separate demand will apply at each individual connection point as defined by the NEMMCO NMI procedure document. Coincident or summated demand from multiple connection points is not permitted without the written approval of the Manager, Asset Planning and Pricing.

DISTRIBUTION (AND TRANSMISSION) LOSS FACTORS This factor is used by the retailer in the market settlement process to add to the energy consumed by the customer, an amount equivalent to the average energy losses for the applicable network price category. The Distribution Loss Factors shown in the Network Price List do not include Country Energy Central Region's Transmission Loss Factor (TLF).

Transmission loss factors for NSW connected customers vary depending on the customers Transmission Node Identifier (TNI). Loss factors for Country Energy Central Region transmission nodes are available on NEMMCO's website at www.nemmco.com.au.

NATIONAL METERING IDENTIFIER Country Energy Central Region Networks will issue National Metering Identifiers (NMI) for each site in accordance with Section 1.7 of NEMMCO's "NMI Procedure" document ME_GN059.

CHANGE OF PRICING OPTION Country Energy Central Region Networks reserves the right to review a customer's network price in the event of load changes and notify the customer's retailer of any resulting changes.

The final decision on the appropriate network price for a customer shall be at the discretion of the Manager, Asset Planning and Pricing.

NETWORK SERVICES: PRICING AND SERVICE INFORMATION GUIDE In accordance with Independent Pricing and Regulatory Tribunal Rule 99/2 Country Energy Central Region has published a booklet detailing pricing strategy and information about Country Energy Central Region's Networks business. A copy of this booklet can be obtained by visiting our website at www.AdvanceEnergy.com.au.

FULL RETAIL COMPETITION Retail competition will be introduced to all smaller customers starting 1 January 2002. Country Energy Central Region will publish its treatment of these customers and the range of network prices for smaller customers when the framework for full retail contestability and the operation of the market, including the type of metering, become known.

URBAN TARIFF CUSTOMER A customer will be classified as Urban for the application of Network prices if that customer's connection is one that is located within the physical boundaries of a city, town or village and will generally be connected to a low voltage reticulation system. A low voltage reticulation system consists of more than twenty customers connected to a transformer.

RURAL TARIFF CUSTOMER A customer will be classified as Rural for the application of Network prices if that customer's connection is one located outside a city, town or village and not connected to a low voltage reticulation system. A low voltage reticulation system consists of more than twenty customers connected to a transformer.

NETWORK PRICE LIST ENQUIRIES These can be directed to our Customer Service Centre, telephone 13 23 56.

NETWORK PRICE LIST EXPLANATORY NOTES SOUTHERN REGION EFFECTIVE 1 JULY 2001

12. SOUTHERN REGION

NETWORK CHARGES Network charges are a Use-of-System charge and apply separately to each different point of supply.

OBSELETE NETWORK PRICES Some urban residential customers may be on obsolete network prices. Please ring for details.

LV DEMAND PRICES LV Demand Prices apply to all customers with a maximum demand greater than 72kVA in the preceding twelve months.

CAPACITY CHARGE Capacity Charge is the highest half-hour kVA demand in the preceding twelve months rounded up to 20, 40, 60, 80, 100, 150, 200, 300, 400, 500kVA and so on in 100kVA increments.

MINIMUM CAPACITY CHARGE The minimum Capacity Charge for HV Direct and HV Network customers is 500kVA

DEMAND CHARGE Demand Charge is based on the highest measured half-hour kVA demand during the month. Concessional demand rates may be available to customers with maximum demand in the 0000 - 0600 period.

OPERATING TIMES FOR PEAK, SHOULDER AND OFF-PEAK NETWORK USAGE RATES Country Energy Southern Region's application of its prices for peak, shoulder and off-peak periods shall be based on the following time periods.

Peak period	7.00 am to 9.00 am and 5.00 pm to 8.00 pm on working weekdays.
Shoulder period	9.00 am to 5.00 pm and 8.00 pm to 10.00 pm on working weekdays.
Off-Peak period	10.00 pm to 7.00 am on working weekdays plus all weekend and public holidays.

All times are Eastern Standard Time during non daylight saving periods and Daylight Saving Time during daylight saving periods as gazetted by NSW Government.

RURAL PRICES AND LOSSES Rural prices and losses apply to sites that are more than 10 kilometres (radius) from an 11kV Zone Substation or 20 kilometres (radius) from a 22kV Zone substation, but not those in an area served by a low voltage reticulation system. A 33kV Distribution Substation is considered a Zone Substation (for LV Demand customers only) so all low voltage demand customers with a 33kV distribution transformer are deemed as urban.

OTHER DISTRIBUTION LOSS FACTORS Other distribution loss factors may apply to certain sites - For information, please ring for details.

HV DIRECT PRICES HV Direct prices apply to sites supplied at 11kV, 22kV or 33kV and connected directly to a Zone Substation or through assets contributed by the customer and dedicated to supplying only that customer.

HV NETWORK PRICES HV Network prices apply to sites supplied at 11kV, 22kV or 33kV, through a HV distribution system.

URBAN TARIFF CUSTOMER A customer will be classified as Urban for the application of Network prices if that customer's connection is connected to a 33kV distribution transformer. A 33kV Distribution Substation is considered a Zone Substation (for LV Demand customers only).
