Network Price List
Effective 1 July 2003
Excluding GST**

Country Energy Network Price List Effective 1 July 2003 (Excluding GST)

The rates in this booklet are not Retail Tariffs.

The rates in this booklet are the rates charged to retailers of electricity for the use of Country Energy's distribution system. These rates are inclusive of charges levied on Country Energy by transmission network service providers. They do not include the cost of energy.

Transmission and distribution loss factors, applicable for the purchase of energy transported through Country Energy's network, are available on NEMMCO's website at www.nemmco.com.au. Loss factors are not to be applied to network charges.

Country Energy Network Price List Effective 1 July 2003 (Excluding GST) Amendments List

Revision	Date	Amendment
1	1 June 2003	Original Issue.
2	16 June 2003	Incorrect prices had been included for the following tariffs: BHND3AO, BHND3NO, BHND1CU, BHND1CO, BHND1SU, BHND1SO, BHTD1SU, BHTD1SO, BHNS1AO and BHNS1NO.
3	2 December 2003	1. Removal of Obsolete tariff codes that are a copy of the new All Country Energy tariff codes. 1.1 Residential Network Use of System Charges BLNN2AU (obsolete tariffs BLNN2NU, BLNN1CU & BLNN2CU) BLNN2AR (obsolete tariffs BLNN2NR, BLNN2NQ) BLNT3AU (obsolete tariffs BLNT3NU, BLNT3CU) BLNT3AR (obsolete tariffs BLNT3NR, BLNT3CR) BLNC1AU (obsolete tariffs BLNC1NO & BLNC1NU, BLNC1CO & BLNC1CU) BLNC1AR (obsolete tariffs BLNC1NR, BLNC1CR) BLNC2AU (obsolete tariffs BLNC2NU & BLNC2NO, BLNC2CO & BLNC2CU) BLNC2AR (obsolete tariffs BLNC2NR, BLNC2SR) 1.2 Business Network Use of System Charges BLNN1AU (BLNN1NU, BLNN1CO & BLNN1CB & BLNN2CB, BLNN1SU) BLNN1AR (BLNN1NR, BLNN1CR, BLNN1SR) BLNT2AU (BLNT2NU, BLNT2CU, BLNT2SU) BLNT4AU (BLNT4NU, BLNT4CU, BLNT4SU) BLNT2AR (BLNT2NR, BLNT2CR, BLNT2SR) BLNT4AR (Obsolete) (BLNT4NR, BLNT4SR) BLND3AO (BLND3NO & BLND3NU) BLNT1AO (BLNT1NO & BLNT1NU & BLNT1NR, BLNT1CO) BHND3AO (BHND3NO) BLNS1AO (BLNS1NO) BHNS1AO (BHNS1NO) BLNC4AU (BLNC4NU & BLNC4NO, BLNC4CO & BLNC4CU, BLNC4SU) BLNC4AR (BLNC4NR, BLNC4SR) BLNC5AU (BLNC5NU & BLNC5NO, BLNC5CO & BLNC5CU, BLNC5SU) BLNC5AR (BLNC5NR, BLNC5SR) <u>NB:</u> Where the application of the Country Energy Tariff does not exactly align with the obsolete tariff, existing customers will not be disadvantaged and will remain on their existing obsolete tariff. 2. Tariff BLNB2NR in Section 1.2 has been made obsolete. New customers should be connected on the appropriate business or residential tariff. 3. 1.3 Customer Specific Network Use of System Charges Replaced "or traffic lights are connected" with "other loads that generally have a highly inductive nature are connected." in the Application description of BLNP3AO 4. Insertion of new tariff BLNT5AO – added T5 to the key to the tariff codes. 5. Updated the Application of tariffs to reflect the Urban and Rural definitions in Section 9. 6. Deletion of Zone 2 Region C and Zone 3 from the Definitions under Northern Region Explanatory Notes. 7. Section 2.1 Special Meter Read added "the fee will be returned if the reading was found to be incorrect."

Revision	Date	Amendment
3 cont.	2 December 2003	8. Section 2.9, point 8, Grading of contractors upgraded according to CEK8004'2 – Customer Installation Safety Plan. (Available on the website) 9. Insertion of Section 6 – Site Specific DLF codes table. 10. Added paragraph to Clause 8.2 Choice of Network Charges – if you move off an obsolete tariff, all tariffs on that premise should be non-obsolete. 11. Addition to Section 8.4 regarding separate Controlled Load meter & Relay for inslab heating. 12. Addition of Section 8.11 regarding Subtractive Metering 13. Addition of Section 8.12 regarding Premise Amalgamation. 14. BLNT4AR is an obsolete tariff. New customers should be connected on BLNT2AR.
4	22 nd April 2004	1. 1.2 Business Network Use of System Charges. BLNT4AU Obsolete 2. 1.2 Business Network Use of System Charges. Removed “exceeds 100 MWh/y” from HV Tariffs. 3. 1.2 Business Network Use of System Charges Removed reference to excluding public holidays from BLNS1AO & BHNS1AO (This means that Peak, Shoulder Demand will be divided by the number of week days excluding public holidays). 4. 1.3 Customer Specific Network Use of System Charges – Added BSS21SU BSS22SU BSS23SU 5. Network Pricelist Explanatory Notes 3. Key to Country Energy Network Tariff Codes added 21,22 & 23. 6. Network Pricelist Explanatory Notes 5. DLF Codes. Added Transmission Node Passthrough. 7. Network Pricelist Explanatory Notes 8.4. Added “All hot water boost facilities... charge of \$40.00 will be charged to activate the boost button”. 8. 9 Definitions Urban Tariff Customer has had the wording changed from and to or so that the clause now reads “...and or is supplied from a Substation rated at 63 KVA...” 9. Network Price List Explanatory Notes. Southern Region. Added (rounded to the nearest whole KVA) to Capacity charge definition.

Network Price List and Access Criteria Effective 1 July 2003

Excludes GST

1. Country Energy Network Use of System Prices 2003/2004

Transmission Loss Factors should be applied in addition to the distribution loss factors quoted throughout this document. Transmission loss factors vary depending on the customers Transmission Node Identifier (TNI). Loss factors for Country Energy transmission nodes are available on NEMMCO's website at www.nemmco.com.au

1.1 Residential Network Use of System Charges

Tariff Code	BLNN2AU (Also Obsolete Tariffs BLNN2NU, BLNN1CU & BLNN2CU)
Description:	Domestic – Non TOU
Type:	Residential
Urban/Non-urban	Urban
Location:	All Country Energy
Billing/Meter Reading Frequency	2 monthly
Application:	To premises wholly used as a private residence and identified as an Urban Tariff Customer. (Refer to Section 9 Definitions).
	Unit Rate
Network Access Charge \$ / Day	0.24692
Energy c/kWh All Periods	5.4760

Tariff Code	BLNN2SU (Obsolete)
Description:	Urban Residential
Type:	Residential
Urban/Non-urban	Urban
Location:	Country Energy Southern Region
Billing/Meter Reading Frequency	3 monthly
Application:	To premises wholly used as a private residence and identified as an Urban Tariff Customer. (Refer to Section 9 Definitions). New customers should be connected on Tariff BLNN2AU.
	Unit Rate
Network Access Charge \$ / Day	0.22012
Energy c/kWh All Periods	4.3290

Tariff Code	BLNN2AR (Also Obsolete Tariffs BLNN2NR, BLNN2NQ)
Description:	Domestic – Non TOU
Type:	Residential
Urban/Non-urban	Non-Urban
Location:	All Country Energy
Billing/Meter Reading Frequency	2 monthly
Application:	To premises wholly used as a private residence and identified as a Rural Tariff Customer. (Refer to Section 9 Definitions).
	Unit Rate
Network Access Charge \$ / Day	0.32054
Energy c/kWh All Periods	6.7230

Tariff Code	BLNN2CR (Obsolete)
Description:	Domestic – Non TOU
Type:	Residential
Urban/Non-urban	Non-Urban
Location:	Country Energy Central Region
Billing/Meter Reading Frequency	2 monthly
Application:	Available for all consumption in rural premises used wholly or principally as private dwellings. A private dwelling is a house, flat or similar premises. New customers should be connected on Tariff BLNN2AR.
	Unit Rate
Network Access Charge \$ / Day	0.45922
Energy c/kWh All Periods	6.7230

Tariff Code	BLNN2SN (Obsolete)
Description:	Rural Residential
Type:	Residential
Urban/Non-urban	Non- Urban
Location:	Country Energy Southern Region
Billing/Meter Reading Frequency	3 monthly
Application:	This Rural Residential Tariff applies to Southern Region Rural Residential Customers. Available for all consumption in rural premises used wholly or principally as private dwellings. A private dwelling is a house, flat or similar premises. New customers should be connected on Tariff BLNN2AR.
	Unit Rate
Network Access Charge \$ / Day	0.45922
Energy c/kWh All Periods	6.7230

Tariff Code	BLNN2SR (Obsolete)
Description:	Rural Residential
Type:	Residential

Tariff Code	BLNS1AO (Also Obsolete Tariff BLNS1NO)
Description:	LV TOU Seasonal Demand
Type:	Business
Urban/Non-urban	Both
Location:	All Country Energy
Billing/Meter Reading Frequency	Monthly
Application:	This tariff is available to customers with a minimum on-season anytime Demand of 1500kVA and a load factor for at least 4 months of the year of better than 60%. Demand Charges will be calculated as follows: 1. The daily kVA maximum demand in each of the Peak, Shoulder, and Off Peak periods will be metered for each day of the month. 2. The metered kVA Demand for each day for each of the Peak, Shoulder and Off Peak periods will be summed for the month and divided by the number of days in the month. This means that Peak and Shoulder Demand will be divided by the number of weekdays. Off Peak Demand will be divided by the total number of days. 3. The average TOU Demand calculated above will be multiplied by the TOU Demand rates. 4. No adjustments to billable demand shall be made for pre-season "test runs".
	Unit Rate
Network Access Charge \$ / Day	5.03851

Network Price List Other Fees and Charges

Effective 1 July 2003

2. Other Fees and Charges

2.1 Special Meter Reading Fee

When a special meter reading is requested by a customer or Retailer, or upon the termination of the occupancy of the premises by the customer, an appropriate fee will be charged. Where a special meter reading is requested by a customer or Retailer and the reading was found to be incorrect, the fee will be returned. The meter reading will generally be carried out during normal working hours.

Amount of fee: In normal working hours \$30-00 excluding GST, \$33-00 including GST

Outside normal working hours \$75-00 excluding GST, \$82-50 including GST

2.2 Disconnection Visit Fee

This charge applies to a visit by Country Energy staff with the specific intent to disconnect a customer at the time of the visit.

The visit to the customer with the intent of disconnection can only occur once the provisions of the Electricity Supply (General) Regulation 1996 (Schedule 2, Part 4, Division 2, Clause 40) with respect to the disconnection of customers have been completed in full.

The Disconnection Visit fee may be levied only in circumstances where:

1. The customer has been warned of impending disconnection by issue of a late payment reminder notice. This notice must clearly provide information to customers regarding financial assistance available, particularly through the Energy Account Payment Assistance (EAPA) scheme. Subject to the rules applicable to Late Payment charges, the \$5.00 excluding GST, \$5.50 including GST. Late Payment charge may be levied for this notice.
2. Country Energy has sent to the customer at least 2 written notices of Country Energy's intention to disconnect, the second notice to be sent no earlier than one week after the first notice.
3. Country Energy has made and documented reasonable attempts to deal with the customer in person or by telephone, whether before or after sending any disconnection notice, for the purpose of assisting the customer to do whatever is necessary to remove the grounds referred to in that notice.
4. Having completed this process, a Country Energy representative visits the customer personally with an intention to disconnect. The Tribunal considers it important that the customer be given the opportunity to make an acceptable payment on the account before a Personal Visit fee is levied. At the time of the personal visit, the customer may avoid disconnection by making an acceptable payment on the account (not necessarily the full outstanding balance).

If an acceptable payment is received, and the Country Energy representative does not proceed with disconnection, Country Energy may charge the \$30 excluding GST, \$33.00 including GST, Personal Visit fee. In cases where the customer does not make an acceptable payment and disconnection proceeds, Country Energy may charge the \$60 excluding GST, \$66.00 including GST, Personal Visit fee. This also covers the cost of a second visit to reconnect the customer. If the customer makes an acceptable payment on the overdue account, and pays the \$60 excluding GST, \$66.00 including GST disconnection visit charge, during normal business hours, then the customer is entitled to be reconnected that day at no extra cost; that is, no after hours fees can be charged for the reconnection. A collection fee is charge for all accounts when a Country Energy collector or agent endeavours to collect an overdue account payment. This fee may not exceed the maximum allowable as determined by the appropriate government regulator.

Amount of fee: \$30-00 excluding GST, \$33.00 including GST when collection involves site visit and a satisfactory arrangement to pay is negotiated with the customer, or

\$60-00 excluding GST, \$66.00 including GST where an acceptable payment is not received and supply is disconnected

\$100-00 excluding GST, \$110-00 including GST where disconnection occurs at a pole top/pillar box and meter disconnection

2.3 Meter Test Fee

Any customer applying for a meter test must, before any test is made, pay a meter fee to cover the cost of the test. The fee will be returned to the customer if the meter is found to be registering incorrectly as defined by the franchise customer metering code. Any account in dispute must be paid in full before the meter is tested.

This fee may not exceed the maximum allowable as determined by the appropriate government regulator.

Amount of fee: \$50-00 excluding GST, \$55.00 including GST per meter tested.

Outside Normal Business Hours \$125-00 excluding GST, \$137.50 including GST per meter tested

2.4 Rectification of Illegal Connection

When rectification to Country Energy owned equipment is needed following an illegal reconnection of supply by a customer, an appropriate fee will be charged.

Amount of fee: Normal Business Hours \$150-00 excluding GST, \$165-00 including GST

Outside Normal Business Hours \$475-00 excluding GST, \$522-50 including GST

2.5 Conveyancing Inquiry

When information is required by a customer in response to an enquiry relating to conveyancing activity, an appropriate fee will be charged. Note: no GST is applicable to conveyancing inquiries.

Amount of fee: Desk enquiry \$25-00 excluding GST

Field visit \$50-00 excluding GST

Total \$75-00 excluding GST

2.6 Provision of Time of Use or Half Hourly Metering Data (Per Half Hour)

When information is required by a customer in response to an enquiry relating to the provision of time of use or half hourly metering data, an appropriate fee will be charged.

Amount of fee: \$25-00 excluding GST, \$27-50 including GST

2.7 Account Establishment Fee

The Account Establishment fee is to cover the costs of establishing a new customer in its records, including but not limited to recording the initial meter readings and reconnecting supply (if it has been temporarily disconnected)

Amount of fee: In normal working hours \$35-00 excluding GST, \$38.50 including GST

Outside normal working hours \$87-50 excluding GST, \$96-25 including GST

2.8 Transfer between Tariffs and Other Products (Off Peak Conversion)

Where it is known that a different tariff becomes applicable due to an alteration in the use of electricity in a premise, the tariff may be changed subject to the approval of Country Energy.

Where a customer requests a change in product option then a changeover fee may become applicable. Typically this applies to optional controlled load products.

Customers will be allowed to change their off-peak pricing option once in a 12 month period at no cost. Should the customer request a further change in off-peak pricing option within that 12 month period then this fee will apply.

This charge does not cover repairs to damaged metering or time control equipment.

Amount of fee: In normal working hours \$40-00 excluding GST, \$44-00 including GST

Outside normal working hours \$100-00 excluding GST, \$110-00 including GST

2.9 Charges for Monopoly Services Associated with Contestable Work

Notes:

1. Level of inspection determined prior to commencement of job and based on grade of accredited service provider.
2. \$600 for a simple substation (single transformer/RMI unit) other at hourly rate including setting/re-setting protection equipment.
3. Where individual service connections are required for multiple dwelling subdivisions, the per lot fee should be applied per service connection.
4. Inspections are based on 3 visits. Substation poles are not included.

The inspection for substation poles is:

A Grade – 3.5 hours @ R2;
B Grade – 7.0 hours @ R2;
C Grade – 9.0 hours @ R2.

5. Hourly rate to be determined based on complexity of the job.

Hourly Labour Rates Applicable to Monopoly Services:

Labour Class	Hourly Rate
Admin R1	\$44.00
Design R2a	\$54.00
Inspector R2b	\$54.00
Engineer R3	\$65.00

6. All Monopoly Fees are subject to the GST of 10%.
7. Effective 1 July 2003.
8. Grading of Contractors is as defined in CEK8004 Customer Installation Safety Plan Issue 2, 23 June 2003.

The frequency and level of inspections/test will be based on a grading assigned to each Electrical Contractor/Service Provider. The grading will be established using the guidelines in the following table:

Table 1 Inspection rate subject to Grade

Grade	Inspection Rate
A	5% = 1 of 20 Notices
B	20% = 1 of 5 Notices
C	50% = 1 of 2 Notices

2.9 Charges for Monopoly Services Associated with Contestable Work (Cont)

7. Country Energy Regions

Country Energy supplies electricity to customers in the following Local Government areas:

7.1 Northern Region

Armidale Dumaresq	Great Lakes	Nundle
Ballina	Greater Taree	Parry
Barraba	Gunnedah	Pristine Waters
Balonne	Guyra	Quirindi
Bellingen	Hastings	Richmond Valley
Bingara	Inglewood	Severn
Bourke	Inverell	Stanthorpe
Brewarrina	Kempsey	Tamworth
Byron	Kyogle	Tenterfield
Coffs Harbour	Lismore	Tweed
Copmanhurst	Maclean	Urulla
Dungog	Manilla	Waggamba
Glen Innes	Moree Plains	Walcha
Gloucester	Murrurundi	Walgett
Goondiwindi	Nambucca	Yallaro
Grafton	Narrabri	

These local government areas include the following towns:

ABBOTSLEA ABERBALDIE ABERFOYLE ACACIA PARK ADGIN GREEN AFTERLEE ALDAVILLA ALDERLEY ALICE ALISON ALLEYS HILL ALLGOMERA ALLWORTH ALLYNBROOK ALPHA ALPHADALE ALSTONVILLE ALUMNY CREEK AMARINA AMPDALE ANDERSON HILL ANGELS BEACH ANGLEDPOOL ANGOURIE ANNA BAY APPLEBY	CHILCOTTS GRASS CHILLINGHAM CHINDERAH CHOWANS CREEK CINNABAR CITY ACRES CLARENCE RIVER CLARENCE TOWN CLARENZA CLARKS BEACH CLEARFIELD CLEVELAND CROSSING CLOTHIERS CREEK CLOVASS CLOVER PARK CLUNES CLYBUCCA COALDALE COBAKI COBAR COBARK COBBADAH CODRINGTON COFFEE CAMP COFFS HARBOUR COLEDALE	GRAMAN GRASSY HEAD GRAVESEND GRAWIN GREAT MARLOW GREEN FOREST GREEN PIDGEON GREEN POINT GREENHILLS GREENRIDGE GRESFORD GREVILLIA GREYS CROSSING GULF CREEK GULMARRAD GUM FLAT GUM SCRUB GUMMA GUNDABLOUI GUNDURIMBA GUNDY GUNGARRU ESTATE GUNNEDAH GUNNS GULLY GURLEY GURRANANG	MONALTRIE MONDROOK MONGOGARIE MONKERAI MONTECOLLUM MOOBALL MOOMIN COTTON MOONA MOONBI MOONEBAH MOONEE MOONIE MOORAL CREEK MOORE CREEK MOORLAND MOPARRABAH MOQUET FARM MOREE MORORO MORTONS CREEK MOTO MOUNT AMORE MOUNT BERRICO MOUNT BROWN MOUNT BURRELL MOUNT CHRISTOPHERSON MOUNT CRAWNEY MOUNT GEORGE MOUNT KAPUTAR MOUNT KREMOS MOUNT LINDSAY MOUNT LION MOUNT MCKENZIE MOUNT MITCHELL MOUNT NARDI MOUNT OXLEY MOUNT RAMORNIE MOUNT RIVERS MOUNT RUSSELL MOUNT SLOW MOUNT WARNING MOUNTAIN TOP MOUNTAIN VIEW MOUNTAIN WAY	STOCKYARD CREEK STOKERS SIDING STONEHENGE STONY CHUTE STONY CREEK STOTTS CREEK STRATFORD STRATHCEDAR STRATHEDEN STROUD STROUD ROAD STUARTS POINT SUFFOLK PARK SULCOR SULLIVANS GULLY SUMMER HILL SUMMER ISLAND SUNNYSIDE SWAN BAY SWAN CREEK SWAN LAKE SWAN VALE SYLVANIA TABBIL CREEK TABULAM TALARM TALISKER TALLAWUDJAH TALLOWOOD POINT TALOFA TALOUMBI TALWOOD TAMARANG TAMBAN TAMBAR SPRINGS TAMINDA TAMWORTH TANGALOO TANGLEWOOD TARBAN TARBUCK BAY TARCOON TAREE TARKEETH

Network Price List Explanatory Notes

Effective 1 July 2003

8. Applicability of Network Charges

8.1 Goods and Services Tax

The network use of system prices are **exclusive** of the 10% Goods and Services Tax.

8.2 Choice of Network Charges

It is a matter for the Retailer of Choice to determine the most economical available Network Tariff. Transfers between Tariffs will apply from the beginning of the normal billing period following the month in which written advice is received and will not be made retrospectively.

Retailers of choice/customers who choose to transfer off an obsolete tariff will lose all rights to all obsolete tariffs on that premise, i.e. the entire site will be required to move onto currently available tariffs. Exemptions to this rule are connection of additional services, e.g. if a site that currently has an obsolete General Supply Business tariff on a premise and they have Business Controlled Load One installed (i.e. new circuit, meter & relay); the Controlled Load One will be connected to the current Business Controlled Load One tariff while the obsolete General Supply tariff will remain.

Country Energy reserves the right to review a customer's network price in the event of load changes and notify the customer's retailer of any resulting changes. The final decision on the appropriate network price for a customer shall be at the discretion of Country Energy.

All customers entering the contestable electricity market will normally be transferred to the appropriate network price reflecting the customer's previous regulated retail tariff.

8.3 Mid-Month Change of Retailer of Choice

Where customers change their Retailer of Choice in the middle of a calendar month, network bills will be allocated between the Retailers on a pro-rata basis depending on the number of days of the month that the customer was contracted with each Retailer.

8.4 Controlled Load

All controlled load equipment for customers who have hot water, process heating or any other approved circuits which are controlled by Country Energy to reduce demand on its feeders shall remain a Network asset belonging solely to Country Energy and as such cannot be removed without permission.

Controlled Load One applies where permanently connected appliances are controlled by Country Energy's equipment so that supply is generally available for 5 to 9 hours overnight on weekdays and all hours on weekends except where the load is controlled by a time clock. Controlled Load Two applies where permanently connected appliances are controlled by Country Energy's equipment so that electricity is available for 10 to 18 hours per day on weekdays and all hours on weekends except where the load is controlled by a time clock. Country Energy reserves the right to vary these times to suit network conditions without affecting the customer's usage of the appliances. Inslab heating is to be metered and controlled separately to other controlled loads.

All hot water boost facilities are permitted but boost must be metered at primary tariff. This includes Big Blue hot water systems. Boost buttons supplied by Country Energy are **only available on A11 meters**. An additional charge of \$40.00 will be charged to activate the boost button.

8.5 Standby Supply

Where customers such as embedded generators require standby supply, the network charges applicable will be negotiated on the basis of the assets involved and the frequency and duration of use of the standby supply.

8.6 Domestic

Available for all consumption in premises used wholly or principally as private dwellings. A private dwelling is a house, flat, home unit, town house or similar premises and includes boarding houses, churches, the residential sections of nursing homes, hospitals and educational institutions, and approved caravan parks.

8.7 Business General Supply (Non-Time of Use)

BLNN1AU and BLNN1AR are available for low voltage electricity supplied to premises for any purpose. These prices are generally applicable to factories, warehouses, hotels, motels, shops, offices, schools, sporting and social clubs whose consumption does not exceed 100MWh per year.

8.8 Business Time of Use

BLNT2AU and BLNT2AR are available for the same purposes as Business General Supply. The Time of Use option enables financial benefits for controlled usage at predetermined time periods as listed in Definitions below.

8.9 Supply to Low Load Factor Customers

Where a customer's annual load factor (average load divided by maximum load) at a point of supply is less than 15%, the chargeable demand will be based on an assessment of the capacity provided.

8.10 Location Specific (CRNP)

A locational specific network price will be negotiated with a customer where:

1. The customer is connected at subtransmission voltages, or
2. The customer is connected to the terminals of a subtransmission substation and has contributed specifically to the cost of the subtransmission system supplying the customer between the subtransmission substation and the customer point of connection.

CRNP is a procedure of allocating networks costs in accordance with National Grid protocols. On achieving eligibility a customer will receive the CRNP price. These customers will be subject to individual price formulation based on the CRNP methodology.

Customers not eligible for a CRNP tariff will receive the standard network price.

8.11 Subtraction Metering

Subtraction Metering is not permissible for new connections. The removal of subtraction metering for existing customers should be encouraged where ever possible when an existing site is upgraded.

TOU Tariffs are not available to premises with subtractive metering.

8.12 Premise Amalgamation

Premises fed from different substations must have different National Market Identifiers.

9. Definitions

SUPPLY VOLTAGES Country Energy reserves the right to determine the voltage at which supply shall be made available to any particular Customer. The general voltage levels referred to in the prices are:

Low Voltage (LV)	nominally 240/415V
High Voltage (HV)	nominally 11, 22 or 33kV
Subtransmission (ST)	The voltage of any circuit which inter-connects sub-transmission or zone substations (on the primary side of the transformer).

PEAK PERIOD is from 7.00 am to 9.00 am and 5.00 pm to 8.00 pm on weekdays.

SHOULDER PERIOD is from 9.00 am to 5.00 pm and 8.00 pm to 10.00 pm on weekdays.

OFF-PEAK PERIOD is at all other times.

All times are Eastern Standard Time and standard Eastern Daylight Saving Time as appropriate.

DISTRIBUTION (AND TRANSMISSION) LOSS FACTORS This factor is used by the retailer in the market settlement process to add to the energy consumed by the customer, an amount equivalent to the average energy losses for the applicable network price category. The Distribution Loss Factors shown in the Network Price List do not include Transmission Loss Factors (TLF).

Transmission loss factors for NSW connected customers vary depending on the customers Transmission Node Identifier (TNI). Loss factors for Country Energy transmission nodes are available on NEMMCO's website at www.nemmco.com.au.

OTHER DISTRIBUTION LOSS FACTORS Other distribution loss factors may apply to certain sites - For information, please ring for details.

NATIONAL METERING IDENTIFIER Country Energy will issue National Metering Identifiers (NMI) for each site in accordance with Section 1.7 of NEMMCO's "NMI Procedure" document ME_GN059.

NETWORK ACCESS CHARGE This is a fixed charge applied to each point of connection at which energy or demand is measured reflecting the fixed nature of network operational and asset related costs. A separate Network Access Charge will apply to each National Market Identifier (NMI) as defined in the NEMMCO "NMI Procedure" document ME_GN059 for the configuration of metering at a given site. The Network Access Charge has been altered to a daily rate in order to facilitate customer transfers under full retail competition.

TIME OF USE (TOU) RATES With a time of use meter installed, the energy is charged according to peak, shoulder and off-peak time periods.

NON TOU NETWORK USAGE RATES The Non Time of Use charge (c/kWh) is applied to the total energy determined from an energy only meter.

THREE RATE DEMAND The Demand charge (\$/kVA/month) is applied to the calendar monthly kVA demand measured by the meter for the peak, shoulder and off peak periods. The monthly kVA demand is the maximum half hour demand for the month occurring within the peak, shoulder and off peak periods and is calculated using the kWh and kVARh energy components recorded by the Code compliant meter. The method of demand measurement is 30 minute clocked. LV TOU Seasonal Demand and HV TOU Seasonal Demand tariffs are exceptions to this description. Demand charges for these tariffs are calculated as set out in the tariff description.

A separate demand will apply at each individual connection point as defined by NEMMCO's "NMI Procedure" document ME_GN059. Coincident or summated demand from multiple connection points is not permitted without the written approval of Country Energy. Approval will not be given where connection points are supplied from different substations.

SINGLE RATE DEMAND The Demand Charge is based on the highest measured half-hour kVA demand during the month. Concessional demand rates may be available to customers with maximum demand in the 0000 - 0600 period.

A separate demand will apply at each individual connection point as defined by NEMMCO's "NMI Procedure" document ME_GN059. Coincident or summated demand from multiple connection points is not permitted without the written approval of Country Energy. Approval will not be given where connection points are supplied from different substations.

URBAN TARIFF CUSTOMER A customer will be classified as Urban for the application of Network prices if that customer's supply is connected to the meshed interconnectable LV network allowing an alternative supply in the event of the failure of a transformer or is supplied from a Substation rated at 63kVA or greater or is underground.

RURAL TARIFF CUSTOMER A customer will be classified as Rural for the application of Network prices if that customer's 415 LV supply connection does not meet the definition of an Urban customer.

OBSOLETE TARRIFS: The word "obsolete" means that no new customers can be connected to this tariff.

Here are some examples of what can and can't be done.

1. If a site is newly connected to the CE network (greenfield site) it cannot use an obsolete tariff.
2. If a site changes ownership ie if Jackson P/L moves out and Mathews P/L moves into a site that was on an obsolete tariff, then the new customer Mathews P/L cannot be connected on the obsolete tariff.
3. If a customer who is on an obsolete tariff chooses to move to a non obsolete tariff (ie because they think it is more cost effective) then the obsolete tariff is no longer available to them. They cannot transfer back at a later date.
4. If a customer who is on an obsolete tariff changes Retailer of Choice, this is not considered a change of customer (although as far as a Country Energy Network is concerned the site now belongs to the Retailer of Choice and is listed in our billing system under the Retailer of Choice's name). Since this scenario is not considered a change of customer the customer will remain on the obsolete tariff (unless instructed not to by the Retailer of Choice).
5. A site that is connected to one obsolete tariff cannot transfer to another obsolete tariff. The only tariffs available to any site is
 - a. the tariff the site is already on (except where its usage changes so that the site no longer meets the application criteria for the existing tariff), or
 - b. any non obsolete tariff that the site has available to it based on the application criteria of the tariff and limitations of the installed metering.
6. Customers who have sites on obsolete tariffs can move off an obsolete tariff at any time. This can be done via a request from the Retailer of Choice to Country Energy Network Pricing group. Please note all requests for tariff change will be considered, and if approved will apply from the beginning of the normal billing period following the month in which written advice is received and will not be made retrospectively.

Please note that the word obsolete may have a different meaning when applied to Retail tariffs.

UNMETERED SUPPLIES Unmetered supplies must conform to all of the following criteria;

1. Load level – The site supplies devices requiring minuscule loads consisting of:
 - a. Site load that is less than or equal to 400 watts for continuous loads. (ie approx 3,500 kWh/yr); or
 - b. Site load that is less than or equal to 850 watts using the assigned Unmetered Supplies & Public Lighting Profile. The controlled load equipment (ie PE Cell / Time Clock) must be maintained and controlled by Country Energy. (ie approx 3,500 kWh/yr); or
 - c. A combination of both continuous and controlled loads whose combined load is less than or equal to 3,500 kWh/yr.
2. The load must be permanently connected and have a quantifiable load pattern as per NEC Section 7.2.3.1 Notes 5 and 6.
3. The final decision on whether or not a site can be connected as an unmetered supply shall be at the discretion of Country Energy.

NETWORK PRICE LIST ENQUIRIES These can be directed to our Customer Service Centre, telephone 13 23 56.

Network Price List Explanatory Notes

Northern Region

Effective 1 July 2003

10. Applicability of Network Charges – Northern Region

10.1 Choice of Network Charges

It is a matter for the Retailer of Choice to determine the most economical choice between the BLND3AO LV Demand and BLND4NO LV Demand Option 2 and LV TOU prices. The LV Demand rates are most likely to be more economical for customers with higher load factors whilst LV Demand Option 2 and LV TOU prices are most likely to be more economical for customers with lower load factors.

10.2 Controlled Load

Controlled Load C applies where permanently connected appliances are controlled by Country Energy's equipment so that electricity is available for 14 to 18 hours per day on weekdays and all hours on weekends except where the load is controlled by a time clock. Country Energy reserves the right to vary these times to suit network conditions without affecting the customer's usage of the appliances. The load control receiver remains the property of Country Energy.

11. Definitions

Zone 1 Region C- Supply to this zone is covered by the following regional post codes.

Bulahdelah-2423, Maitland-2320, Nahiack-2312, Stroud Road-2415

NETWORK PRICE LIST ENQUIRIES These can be directed to our Customer Service Centre, telephone 13 23 56.

Network Price List Explanatory Notes

Southern Region

Effective 1 July 2003

CAPACITY CHARGE Capacity Charge is the highest half-hour kVA demand (rounded to the nearest whole kVA) in the preceding twelve months rounded up to 20, 40, 60, 80, 100, 150, 200, 300, 400, 500kVA and so on in 100kVA increments.

Tariff Code BLNN2SP is for SouthWest Zone 1 Rural Residential Customers - Supply to this zone includes the following regional towns. This Tariff is obsolete. New customers should be connected on tariff BLNN2AR.
